provides citations to and excerpts of reviews of current juvenile and adult fiction and nonfiction in the English language. Reviews of the following types of books are excluded: government publications, textbooks, and technical books in the sciences and law. Reviews of books on science for the general reader, however, are included. The reviews originate in a group of selected periodicals in the humanities, social sciences, and general science published in the United States, Canada, and Great Britain. Publisher: **Flying Magazine**, 1944-10. *Ask the Experts: The Human Body and Mind*. Scientific American Editors, 2015-03-09. For going on two decades, Scientific American's Ask the Experts column has been answering reader questions on all fields of science. We've taken your questions from the basic to the esoteric and reached out to top scientists, professors, and researchers to find out why the sky is blue or how planets acquire rings. Now we've combed through our archives and have compiled some of the most interesting questions and answers into a series of eBooks. Organized by subject, each eBook provides short, easily digestible answers to questions on that particular branch of the sciences. The Human Body and Mind is the third eBook in this series, and it tackles questions about our own strange and mysterious biology. Note: Health and medicine will be covered in a separate eBook. Our experts field queries on evolution, bodily quirks, and psychological feats. Have you ever wondered why humans lost their body hair? Curious about what causes a hangover? Or what makes that popping sound when we crack our knuckles? What about the oft-cited maxim that we only use 10 percent of our brains? Professors, scientists, and biologists provide answers that are at once accurate, understandable, and sometimes just plain funny.

Ask the Experts: Physics and Math. Scientific American Editors, 2014-08-11. For going on two decades, Scientific American's Ask the Experts column has been answering reader questions on all fields of science. We've taken your questions from the basic to the esoteric and reached out to top scientists, professors, and researchers to find out why the sky is blue or whether we really only use 10% of our brains. Now we've combed through our archives and have compiled some of the most interesting questions and answers into a series of eBooks. Organized by subject, each eBook provides short, easily digestible answers to questions on that particular branch of the sciences. The first eBook in our series, Physics and Math, explains a wide range of natural phenomena and mathematical concepts. Have you ever wondered what exactly antimatter is? How about game theory, quantum mechanics, and the origin of pi? Mathematicians and professors from universities across the country tackle these topics, drawing on their extensive expertise to give answers that are at once accurate and comprehensible by those who haven't studied physics or math since high school. **The New York Times Book of Science Questions and Answers**.
