Scientific Culture And The Making Of The Industrial West:

Scientific Culture and the Making of the Industrial West Margaret C. Jacob, 1997 Seeking to understand the cultural origins of the Industrial Revolution of the eighteenth century this text first looks at the scientific culture of the seventeenth century focusing not only on England but following through with a study of the history of science and technology in France the Netherlands and Germany Comparative in structure this text explains why England was so much more successful at this transition than its continental counterparts It also integrates science with worldly concerns focusing mainly on the entrepreneurs and engineers who possessed scientific insight and who were eager to profit from its advantages demonstrating that during the mid seventeenth century British science was presented within an ideological framework that encouraged material prosperity English Culture and the Decline of the Industrial Spirit, 1850-1980 Martin J.

Wiener, 2004-09-13 Drawing upon a wide array of sources Martin Wiener explores the English ambivalence to modern industrial society **The Oxford Handbook of the History of Physics** Jed Z. Buchwald, Robert Fox, 2013-10 This Oxford Handbook brings together contributions by leading authorities on key areas of the history of physics since the seventeenth century In a single volume it offers a comprehensive introduction to scholarly contributions that have tended to be dispersed in journals and books not easily accessible to the student or general reader **Labor Before the Industrial Revolution**

Thomas Max Safley, 2018-11-09 One cannot conceive of capitalism without labor Yet many of the current debates about economic development leading to industrialization fail to directly engage with labor at all This collection of essays strives to correct this oversight and to reintroduce labor into the great debates about capitalist development and economic growth before the Industrial Revolution By attending to the effects of specific regulatory technological social and physical environments on producers and production in a set of specific industries these essays use an ecological approach that demonstrates how productivity knowledge and regime changed between 1400 and 1800 This book will be of interest to researchers in history especially labor history and European economic development **Fire and Light** James MacGregor Burns, 2013-10-29 The Pulitzer Prize winning historian explores history's most daring and transformational intellectual movement the European and American Enlightenment In this engaging provocative history James MacGregor Burns illuminates the two hundred year conflagration of the Enlightenment when audacious questions and astonishing ideas tore across Europe and the New World They transformed thought overturned governments and inspired visionary political experiments Fire and Light brings to life the revolutionary leaders who armed with a new sense of human possibility created the modern world Burns traces the origins of a distinctive American Enlightenment to men like Benjamin Franklin John Adams Thomas Jefferson and James Madison and their early encounters with incendiary European ideas about liberty and equality It was these thinker activists who framed the United States as a grand and continuing experiment in Enlightenment principles Today the same principles have taken on new urgency around the world in the turmoil of the Arab world in the

former Soviet Union and in China as well as in the United States itself What should a nation be What should citizens expect from their government Who should lead and how can leadership be made both effective and accountable What is happiness and what can the state contribute to it Burns's exploration of the ideals and arguments that formed the bedrock of our modern world shines a new light on these ever important questions Praise for Fire and Light With this profound and magnificent book Burns takes us into the fire's center Essential for deciphering the challenges of the world we will live in tomorrow Michael Beschloss New York Times bestselling author of Presidential Courage James MacGregor Burns is a national treasure and Fire and Light is the elegiac capstone to a career devoted to understanding the seminal ideas that made America for better and for worse what it is Joseph J Ellis Pulitzer Prize and National Book Award winning author of Revolutionary Summer A captivating tale Briskly and beautifully told Superb Publishers Weekly

India's Late, Late Industrial Revolution Sumit Kumar Majumdar, 2012-05-24 Catalogues and explains India's late late industrial revolution through a combination of rigorous analysis and entertaining anecdotes

Institutions and Chinese Economic Development Li Tan, 2021-11-10 China's rise as an economic power has posed some challenging questions how did China achieve GDP growth that was even faster than the Four Asian Tigers Is the Chinese model superior Why hasn't the rapid economic growth lead to democracy in the country as many observers expected And can China sustain its rapid economic growth with its existing social system Institutions and Chinese Economic Development A Comparative Historical Approach explores these questions by studying the historical relationship between institutions and economic development in China drawing comparisons with England Japan and other Asian economies as appropriate The investigation focuses on several junctures in China's economic development the starting point of the divergence between China and the West the externally provoked industrial development in the late 19th century and the contemporary Chinese Miracle The analysis foregrounds the role played by Chinese institutions and examines their effects on both the country's failure to industrialize in the past and its economic achievements in recent time The book also asks whether without reform to the existing state institutions China might still be subject to the historical dynastic cycles today despite its recent economic success This work is of great interest to students and scholars of the Chinese economy economic history and institutional economics as well as comparative history and Chinese studies more broadly

Shores of Knowledge: New World Discoveries and the Scientific Imagination Joyce Appleby, 2013-10-14 Uncommonly good makes a compelling case that intellectual curiosity not only changed Europe but launched modernity Cleveland Plain Dealer When Columbus first returned to Spain from the Caribbean he dazzled King Ferdinand and Queen Isabella with exotic parrots tropical flowers and bits of gold Inspired by the promise of riches countless seafarers poured out of the Iberian Peninsula and wider Europe in search of spices treasure and land Many returned with strange tales of the New World Curiosity began to percolate through Europe as the New World's people animals and plants ruptured prior assumptions about the biblical description of creation The Church long fearful of challenges to its authority

could no longer suppress the mantra Dare to know Noblemen began collecting cabinets of curiosities soon others went from collecting to examining natural objects with fresh eyes Observation led to experiments competing conclusions triggered debates The foundations for the natural sciences were laid as questions became more multifaceted and answers became more complex Carl Linneaus developed a classification system and sent students around the globe looking for specimens Museums botanical gardens and philosophical societies turned their attention to nature National governments undertook explorations of the Pacific Eminent historian Joyce Appleby vividly recounts the explorers triumphs and mishaps including Magellan s violent death in the Philippines the miserable trek of the new Argonauts across the Andes on their mission to determine the true shape of the earth and how two brilliant scientists Alexander Humboldt and Charles Darwin traveled to the Americas for evidence to confirm their hypotheses about the earth and its inhabitants Drawing on detailed eyewitness accounts Appleby also tells of the turmoil created in the all societies touched by the explorations This sweeping global story imbues the Age of Discovery with fresh meaning elegantly charting its stimulation of the natural sciences which ultimately propelled Western Europe toward modernity

Windows on the Chinese World Clara Wing-chung Ho,2009-01-01 The value of this collection lies in its linking together of a group of internationally renowned scholars who are at the forefront of their fields to present some of their recent findings on different historical issues By covering different topics and periods this volume is representative of contemporary Western scholarship in Chinese history

A House Built on Sand Noretta Koertge,1998 Cultural critics say that science is politics by other means arguing that the results of scientific inquiry are profoundly shaped by the ideological agendas of powerful elites They base their claims on historical case studies purporting to show the systematic intrusion of sexist racist capitalist colonialist and or professional interests into the very content of science In this hard hitting collection of essays contributors offer crisp and detailed critiques of case studies offered by the cultural critics as evidence that scientific results tell us more about social context than they do about the natural world Pulling no punches they identify numerous crude factual blunders e g that Newton never performed any experiments and egregious errors of omission such as the attempt to explain the slow development of fluid dynamics solely in terms of gender bias Where there are positive aspects of a flawed account or something to be learned from it they do not hesitate to say so Their target is shoddy scholarship Comprising new essays by distinguished scholars of history philosophy and science this book raises a lively debate to a new level of seriousness

The British Industrial Revolution in Global Perspective Robert C. Allen, 2009-04-09 Why did the industrial revolution take place in eighteenth century Britain and not elsewhere in Europe or Asia In this convincing new account Robert Allen argues that the British industrial revolution was a successful response to the global economy of the seventeenth and eighteenth centuries He shows that in Britain wages were high and capital and energy cheap in comparison to other countries in Europe and Asia As a result the breakthrough technologies of the industrial revolution the steam engine the cotton mill and the substitution of coal for wood in metal production were uniquely profitable to invent and use in Britain The high wage economy of pre industrial Britain also fostered industrial development since more people could afford schooling and apprenticeships It was only when British engineers made these new technologies more cost effective during the nineteenth century that the industrial revolution would spread around the world

Hubris and Hybrids Mikael Hård, Andrew Jamison, 2013-09-13 Human societies have not always taken on new technology in appropriate ways Innovations are double edged swords that transform relationships among people as well as between human societies and the natural

world Only through successful cultural appropriation can we manage to control the hubris that is fundamental to the innovative enterprising human spirit and only by becoming hybrids combining the human and the technological will we be able to make effective use of our scientific and technological achievements This broad cultural history of technology and science provides a range of stories and reflections about the past discussing areas such as film industrial design and alternative environmental technologies and including not only European and North American but also Asian examples to help resolve the contradictions of contemporary high tech civilization

The Rise and Decline of Dutch Technological Leadership (2 Vols) Karel Davids, 2008-09-17 This book provides a wide ranging overview of Dutch technological leadership in the early modern Europe it explains whence this leadership came about and why it ended and it explores to what extent the Dutch case illuminates the evolution of technological leadership in general

Science and Technology in World History James Edward McClellan, Harold Dorn, 2006-04-14 Publisher description

The Useful Knowledge of William Hutton Susan E. Whyman, 2018-09-20 The Useful Knowledge of William Hutton shows the rapid rise of a self taught workman and the growing prominence of the city of Birmingham during the two major events of the eighteenth century the Industrial Revolution and the Enlightenment Hutton achieved wealth land status and literary fame but later became a victim of violent riots The book boldly claims that an understanding of the Industrial Revolution requires engagement with the figure of the rough diamond a person of worth and character but lacking in manners education and refinement A cast of unpolished entrepreneurs is brought to life as they drive economic and social change and improve their towns and themselves The book also contends that the rise of Birmingham cannot be understood without accepting that its vibrant cultural life was a crucial factor that spurred economic growth Readers are plunged into a hidden provincial world marked by literacy bookshops printing authorship and the spread of useful knowledge We see that ordinary people read history and wrote poetry whilst they grappled with the effects of industrial change Newly discovered memoirs reveal social conflict and relationships in rare detail They also address the problems of social mobility income inequality and breath taking technological change that continue to perplex us today

Networks of Improvement Jon Mee, 2023-10-10 A new literary cultural history of the Industrial Revolution in Britain from the late eighteenth to the mid nineteenth centuries Working against the stubbornly persistent image of dark satanic mills in many ways so characteristic of literary Romanticism Jon Mee provides a fresh revisionary account of the Industrial Revolution as a story of unintended consequences In *Networks of Improvement* Mee reads a wide range of texts economic medical and more conventionally literary with a focus on their circulation through networks and institutions Mee shows how a project of enlightened liberal reform articulated in Britain s emerging manufacturing towns led to unexpectedly coercive forms of machine productivity a pattern that might be seen repeating in the digital technologies of our own time Instead of treating the Industrial Revolution as Romanticism s other Mee shows how writing practices and institutions emanating from these industrial towns developed a new kind of knowledge economy one

where local literary and philosophical societies served as important transmission hubs for the circulation of knowledge

Critical Terms for Religious Studies Mark C. Taylor, 2013-07-09 A century that began with modernism sweeping across Europe is ending with a remarkable resurgence of religious beliefs and practices throughout the world. Wherever one looks today from headlines about political turmoil in the Middle East to pop music and videos, one cannot escape the pivotal role of religious beliefs and practices in shaping selves, societies, and cultures. Following in the very successful tradition of *Critical Terms for Literary Studies* and *Critical Terms for Art History*, this book attempts to provide a revitalized self-aware vocabulary with which this bewildering religious diversity can be accurately described and responsibly discussed. Leading scholars working in a variety of traditions demonstrate through their incisive discussions that even our most basic terms for understanding religion are not neutral but carry specific historical and conceptual freight. These essays adopt the approach that has won this book's predecessors such widespread acclaim: each provides a concise history of a critical term, explores the issues raised by the term, and puts the term to use in an analysis of a religious work, practice, or event. Moving across Judaism, Christianity, Hinduism, Buddhism, Islam, and Native American and Mayan religions, contributors explore terms ranging from experience, territory, and image to God, sacrifice, and transgression. The result is an essential reference that will reshape the field of religious studies and transform the way in which religion is understood by scholars from all disciplines, including anthropology, sociology, psychology, cultural studies, gender studies, and literary studies.
