## with Dr. Kat

Scientific evidence can be confusing! It's easy to mistake weak evidence for strong evidence. Sometimes people share unreliable things on social media with good intentions, but sometimes they're exploiting the public's lack of understanding of different levels of evidence. We all encounter claims online, but **all evidence is not created equal**. So, how can you tell the quality? This infographic can help you find your way.

### TIP Scientific evidence in the news

News reports and opinion pieces about scientific topics might cite a mix of different kinds of evidence. Be sure to examine what type is being presented & if it meets an expert's

#### Scan here

to watch Dr. Kat lead you through this chart

#### META-ANALYSIS

Statistical method that combines the results of multiple scientific studies

Example: Connection between intelligence test scores and education

#### SYSTEMATIC REVIEW

The gold standard for testing health claims. The reviewer does not include experiments but summarizes them. Researchers randomly assign participants to groups to make fair comparisons and test treatments & ways that evidence lies

Example: Does COVID-19 vaccine work

#### WELL-CONTROLLED STUDY

A study that compares a group of individuals with a specific condition to a group of people without that condition to find out what may have caused it

Example: A study used to determine a link between smoking and lung cancer

Don't forget: Correlation does NOT equal causation

#### TWO GROUP / CASE STUDIES

A study on one person (report) or one group (series) of people with similar clinical characteristics. Because these studies don't make comparisons, they aren't as strong as the evidence in higher levels of the pyramid

Example: Clinical outcomes reported with the coronavirus

#### OPINION PIECE

An educated opinion presented without data. More prone to bias

## META-ANALYSIS AND SYSTEMATIC REVIEW

## RANDOMIZED TRIAL

## COHORT STUDY

## CASE-CONTROL STUDY

## CROSS-SECTIONAL STUDY

## CASE REPORT / CASE SERIES

## EXPERT OPINION

#### INTERVIEW REVIEW

Synthesis of all data summarized in a meta-analysis. Offers interpretation and context

Example: Evidence synthesis, review or narrative for COVID-19

#### COHORT STUDY

Often a large, long-term study that looks at what causes diseases in different groups (cohorts). It is not randomized

Example: Framingham Heart Study

#### CASE-CONTROL STUDY

A study that measures the health of a particular group of people at a particular point in time

Example: National Health and Nutrition Examination Survey

Hydraulic Research in the United States and Canada United States. National Bureau of Standards, 1978     **The Scientific Evidence of Dr. Wang** Stephanie De Montalk, 2002 In these poems Dr Wang an expert witness presents testimony about the alchemy of everyday life with clarity and precision The evidence is that as long as the world is as round as an orange ideas will form words and stories will follow and wonderful things will happen     *Latest Research on Breast Cancer - Molecular Insights, Diagnostic Advances and Therapeutic Innovations* ,2025-05-28 Latest Research on Breast Cancer Molecular Insights Diagnostic Advances and Therapeutic Innovations brings together innovative and multidisciplinary contributions addressing one of the most complex and heterogeneous diseases in modern oncology This volume presents a comprehensive overview of recent advances in breast cancer research spanning from tumor biology and molecular heterogeneity to the development of diagnostic technologies and novel therapeutic strategies The book includes state of the art discussions on imaging modalities such as MRI ultrasound and artificial intelligence based diagnostic tools as well as in depth analyses of molecular mechanisms signaling pathways drug resistance and tumor microenvironmental interactions Contributions also explore emerging strategies in drug delivery biomarker discovery gene expression profiling and immunological insights into metastasis including the role of the microbiota and immune cell interactions in the bone metastatic niche By integrating basic science translational research and clinical applications this volume provides valuable perspectives for researchers clinicians and health professionals working in oncology molecular biology immunology and precision medicine The book aims to foster interdisciplinary dialogue and promote the development of innovative approaches for improving diagnosis treatment and patient outcomes in breast cancer Edited by Prof Ana Carolina Monteiro and Prof Lulu Wang the volume reflects contributions from international experts and provides a timely reference for those committed to advancing breast cancer research and care     *Fundamental Studies of Shock-Driven Hydrodynamic Instabilities* Yu Liang, 2022-09-09 This book illustrates the latest progress on the hydrodynamic instabilities induced by a shock wave particularly RM Richtmyer Meshkov instability The hydrodynamic instabilities play crucial roles in various industrial and scientific fields such as inertial confinement fusion supersonic combustion supernova explosion etc This book experimentally and theoretically explores the shock driven instabilities of complex gas gas and gas liquid interfaces The main difficulty in performing an experimental study on RM instability especially in a shock tube circumstance lies in creating an idealized initial interface because the RM instability is extremely sensitive to the initial condition This book introduces new experimental methods to generate shape controllable two dimensional gaseous interfaces thickness controllable gas layers and water droplets embedded with a vapour bubble in the shock tube experiments It covers the latest experiments and theories on the shock driven hydrodynamic instabilities of multi mode multi layer and multi phase interfaces It explores the

effects of the mode competition interface coupling and phase transition on interface evolution respectively This book establishes a universal nonlinear theory to predict the RM instability of a shocked multi mode interface based on spectrum analysis This book quantifies the effects of interface coupling and reverberating waves on the hydrodynamic instabilities of a shocked multi layer interface This book provides the experimental studies of the interaction of a shock wave and a multi phase droplet and proposes a modified Rayleigh Plesset equation to predict the vapour bubble collapse inside a droplet
