**Stephan Fuchs**

## **Scientific Temperaments Three Lives In Contemporary Science:**

**Scientific Temperaments** Philip J. Hilts, 1984      Beyond the Science Wars Ullica Christina Olofsdotter Segerstråle, Ullica Segerstråle, 2000-08-03 Contextualizes the Science Wars from interdisciplinary sociological historical scientific political and cultural perspectives      **The Baltimore Case** Daniel J. Kevles, 2000 Kevles tells the complete story of David Baltimore winner of a Nobel Prize for medicine in 1975 in the field of immunology who got caught up in a legal battle over fraudulent scientific papers Photos line drawings      **The Scientific Life** Steven Shapin, 2009-08-01 Who are scientists What kind of people are they What capacities and virtues are thought to stand behind their considerable authority They are experts indeed highly respected experts authorized to describe and interpret the natural world and widely trusted to help transform knowledge into power and profit But are they morally different from other people The Scientific Life is historian Steven Shapin's story about who scientists are who we think they are and why our sensibilities about such things matter Conventional wisdom has long held that scientists are neither better nor worse than anyone else that personal virtue does not necessarily accompany technical expertise and that scientific practice is profoundly impersonal Shapin however here shows how the uncertainties attending scientific research make the virtues of individual researchers intrinsic to scientific work From the early twentieth century origins of corporate research laboratories to the high flying scientific entrepreneurship of the present Shapin argues that the radical uncertainties of much contemporary science have made personal virtues more central to its practice than ever before and he also reveals how radically novel aspects of late modern science have unexpectedly deep historical roots His elegantly conceived history of the scientific career and character ultimately encourages us to reconsider the very nature of the technical and moral worlds in which we now live Building on the insights of Shapin's last three influential books featuring an utterly fascinating cast of characters and brimming with bold and original claims The Scientific Life is essential reading for anyone wanting to reflect on late modern American culture and how it has been shaped      *Superconducting Super Collider*, 1988      **Gaither's Dictionary of Scientific Quotations** Carl C. Gaither, Alma E. Cavazos-Gaither, 2012-01-05 This unprecedented collection of 27 000 quotations is the most comprehensive and carefully researched of its kind covering all fields of science and mathematics With this vast compendium you can readily conceptualize and embrace the written images of scientists laymen politicians novelists playwrights and poets about humankind's scientific achievements Approximately 9000 high quality entries have been added to this new edition to provide a rich selection of quotations for the student the educator and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject Gaither's Dictionary of Scientific Quotations Second Edition provides the finest reference source of science quotations for all audiences The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories      *Language Beyond Postmodernism* Eugene Gendlin, 1997-08-20 Eugene Gendlin's contribution to the

theory of language is the focus of this collection of essays edited by David Michael Levin This compilation of critical studies each followed by a comment from Gendlin himself investigates how concepts grow out of experience and explores relations between Gendlin's philosophy of language and experience and the philosophies of Wittgenstein Dilthey and Heidegger

**Epistemic Virtues in the Sciences and the Humanities** Jeroen van Dongen, Herman Paul, 2017-12-07 This book explores how physicists astronomers chemists and historians in the late nineteenth and early twentieth centuries employed epistemic virtues such as accuracy objectivity and intellectual courage In doing so it takes the first step in providing an integrated history of the sciences and humanities It assists in addressing such questions as What kind of perspective would enable us to compare organic chemists in their labs with paleographers in the Vatican Archives or anthropologists on a field trip with mathematicians poring over their formulas While the concept of epistemic virtues has previously been discussed primarily in the contexts of the history and philosophy of science this volume is the first to enlist the concept in bridging the gap between the histories of the sciences and the humanities Chapters research whether epistemic virtues can serve as a tool to transcend the institutional disciplinary boundaries and thus help to attain a post disciplinary historiography of modern knowledge Readers will gain a contextualization of epistemic virtues in time and space as the book shows that scholars themselves often spoke in terms of virtue and vice about their tasks and accomplishments This collection of essays opens up new perspectives on questions discourses and practices shared across the disciplines even at a time when the neo Kantian distinction between sciences and humanities enjoyed its greatest authority Scholars including historians of science and of the humanities intellectual historians virtue epistemologists and philosophers of science will all find this book of particular interest and value

**Biographies of Scientists** Roger Smith, 1998 Identifies over 500 sources of information about the lives of scientists for young and adult general readers and for scholars Entries ranging from a quarter to a half page in length explain briefly what the subjects achieved worthy of biography as well as describing the work in some detail The works cited include books encyclopedias and periodicals and both biography and autobiography The arrangement is by discipline the social sciences are not included with indexes by author and subject scientist Annotation copyrighted by Book News Inc Portland OR

**The Billion-Dollar Molecule** Barry Werth, 2013-08-20 Join journalist Barry Werth as he pulls back the curtain on Vertex a start up pharmaceutical company and witness firsthand the intense drama being played out in the pioneering and hugely profitable field of drug research Founded by Joshua Boger a dynamic Harvard and Merck trained scientific whiz kid Vertex is dedicated to designing atom by atom both a new life saving immunosuppressant drug and a drug to combat the virus that causes AIDS You will be hooked from start to finish as you go from the labs where obsessive fiercely competitive scientists struggle for a breakthrough to Wall Street where the wheeling and dealing takes on a life of its own as Boger courts investors and finally decides to take Vertex public Here is a fascinating no holds barred account of the business of science which includes an updated epilogue about the most recent developments in the quest for a drug to cure AIDS

*Conflicts of Interest in Science* Sheldon Krimsky, 2019-01-29 30 Years of Peer Reviewed Studies on the Corporate Ties and Vested Interests that Influence Scientific Research For over 500 years groups and organizations with political economic and personal interests have successfully exercised influence on the pursuit of scientific inquiry and knowledge History is replete with examples like the Papal authority muddying research into studies of the cosmos but far less attention is paid today to the various corporate and special interest groups who through funding and lobbying efforts have been able to shape the modern academic and scientific landscape to fit their agenda In *Conflicts of Interest Within Science* author Sheldon Krimsky compiles 21 peer reviewed academic articles that examine the complex relationship between the individual scientists conducting research and the groups who fund them Ultimately Krimsky's call to action concerns a collective movement among authors peer reviewers corporations and journal editors to disclose the sources of their funding By holding scientists and the groups that fund them more accountable through increased transparency we as a society can begin to rebuild trust in the integrity of knowledge

**Fermilab** Lillian Hoddeson, Adrienne W. Kolb, Catherine Westfall, 2009-08-01 Fermi National Accelerator Laboratory located in the western suburbs of Chicago has stood at the frontier of high energy physics for forty years *Fermilab* is the first history of this laboratory and of its powerful accelerators told from the point of view of the people who built and used them for scientific discovery Focusing on the first two decades of research at Fermilab during the tenure of the laboratory's charismatic first two directors Robert R Wilson and Leon M Lederman the book traces the rise of what they call megascience the collaborative struggle to conduct large scale international experiments in a climate of limited federal funding In the midst of this new climate *Fermilab* illuminates the growth of the modern research laboratory during the Cold War and captures the drama of human exploration at the cutting edge of science

[Role of Maps in Sci-Tech Libraries](#) Ellis Mount, 2020-06-04 Maps charts and related items present special problems to libraries for example a less organised bibliographic control mechanism more difficult means of acquisitions and problems of storage and preservation This book first published in 1985 deals with these problems and presents practical solutions for maps in library collections

[The Body in Pain: The Making and Unmaking of the World](#) Elaine Scarry, 1985-09-26 Part philosophical meditation part cultural critique *The Body in Pain* is a profoundly original study that has already stirred excitement in a wide range of intellectual circles The book is an analysis of physical suffering and its relation to the numerous vocabularies and cultural forces literary political philosophical medical religious that confront it Elaine Scarry bases her study on a wide range of sources literature and art medical case histories documents on torture compiled by Amnesty International legal transcripts of personal injury trials and military and strategic writings by such figures as Clausewitz Churchill Liddell Hart and Kissinger She weaves these into her discussion with an eloquence humanity and insight that recall the writings of Hannah Arendt and Jean Paul Sartre Scarry begins with the fact of pain's inexpressibility Not only is physical pain enormously difficult to describe in words confronted with it Virginia Woolf once noted language runs dry it also actively destroys language reducing

sufferers in the most extreme instances to an inarticulate state of cries and moans Scarry analyzes the political ramifications of deliberately inflicted pain specifically in the cases of torture and warfare and shows how to be fictive From these actions of unmaking Scarry turns finally to the actions of making the examples of artistic and cultural creation that work against pain and the debased uses that are made of it Challenging and inventive The Body in Pain is landmark work that promises to spark widespread debate The Leader's Edge Charles J. Palus, David M. Horth, 2002-10-01 Der ultimative Schritt f r Schritt

Leitfaden f r Manager die ihren F hrungsqualit ten mehr Kreativit t verleihen wollen Er basiert auf jahrelanger Forschungsarbeit Die Autoren stellen hier eine bew hrte Methode f r sicheren F hrungserfolg vor Sie beschreiben sechs unterschiedliche aber miteinander verflochtene Kompetenzen f r kreative F hrung die wichtige Aspekte menschlichen Verhaltens widerspiegeln aber bislang nur unzureichend f r eine funktionierende Unternehmensf hrung in Betracht gezogen wurden Mit genauer Anleitung welche Ma nahmen notwendig sind um die jeweilige Kompetenz zu erwerben Bietet eine F lle von Hilfsmitteln und Beurteilungstests mit deren Hilfe man die sechs Kompetenzen entwickeln kann Enth lt eine F lle von Beispielen und Fallstudien sowie Tipps und Hinweise wie man Missbrauch vermeidet Ein neuer Band zum Thema Leadership vom renommierten Center for Creative Leadership Cavendish Christa Jungnickel, Russell McCormack, 1996 The Cavendishes flourished during the high tide of British aristocracy following the revolution of 1688-89 and the case can be made that this aristocracy knew its finest hour when Henry Cavendish gently laid his delicate weights in the pan of his incomparable precision balance For this it took two generations and two kinds of invention one in social forms and the other in scientific technique This biography tells how it came to pass Book jacket Scientifically Speaking C.C. Gaither, Alma E. Cavazos-Gaither, 2000-11-21 In these days of ever increasing specialization it is important to gain a broad appreciation of science Entertaining and informative Scientifically Speaking A Dictionary of Quotations Second Edition contains the words and wisdom of several hundred scientists writers philosophers poets and academics The largest compilation of published sci

**Against Essentialism** Stephan Fuchs, 2009-07 Against Essentialism presents a sociological theory of culture This interdisciplinary and foundational work deals with basic issues common to current debates in social theory including society culture meaning truth and communication Stephan Fuchs argues that many mysteries about these concepts lose their mysteriousness when dynamic variations are introduced Fuchs proposes a theory of culture and society that merges two core traditions American network theory and European Luhmannian systems theory His book distinguishes four major types of social observers encounters groups organizations and networks Society takes place in these four modes of association Each generates levels of observation linked with each other into a culture the unity of these observations Against Essentialism presents a groundbreaking new approach to the construction of society culture and personhood The book invites both social scientists and philosophers to see what happens when essentialism is abandoned **Life Among the Scientists** Maxwell John Charlesworth, 1989 A study of research scientists working at the Walter and Eliza Hall Institute **The Genealogy of**

**a Gene** Myles W. Jackson, 2015-02-20 The history of the CCR5 gene as a lens through which to view such issues as intellectual property Big Pharma personalized medicine and race and genomics In *The Genealogy of a Gene* Myles Jackson uses the story of the CCR5 gene to investigate the interrelationships among science technology and society Mapping the varied genealogy of CCR5 intellectual property natural selection Big and Small Pharma human diversity studies personalized medicine ancestry studies and race and genomics Jackson links a myriad of diverse topics The history of CCR5 from the 1990s to the present offers a vivid illustration of how intellectual property law has changed the conduct and content of scientific knowledge and the social political and ethical implications of such a transformation The CCR5 gene began as a small sequence of DNA became a patented product of a corporation and then when it was found to be an AIDS virus co receptor with a key role in the immune system it became part of the biomedical research world and a potential moneymaker for the pharmaceutical industry When it was further discovered that a mutation of the gene found in certain populations conferred near immunity to the AIDS virus questions about race and genetics arose Jackson describes these developments in the context of larger issues including the rise of biocapitalism the patentability of products of nature the difference between U S and European patenting approaches and the relevance of race and ethnicity to medical research
