

Preparation of Papers for International Journal of Scientific & Engineering Research

First Author, Second Author, Third Author

Abstract— These instructions give you guidelines for preparing papers for IJSER JOURNALS. Use this document as a template if you are using Microsoft Word 6.0 or later. Otherwise, use this document as an instruction set. The electronic file of your paper will be formatted further at IJSER. Define all symbols used in the abstract. Do not cite references in the abstract. Do not delete the blank line immediately above the abstract; it sets the footnote at the bottom of this column. Don't use all caps for research paper title.

Index Terms— Minimum 7 keywords are mandatory. Keywords should closely reflect the topic and should optimally characterize the paper. Use about four key words or phrases in alphabetical order, separated by commas.

1 INTRODUCTION

THIS document is a template for Microsoft Word versions 6.0 or later. If you are reading a paper version of this document, please download the electronic file from the [template download page](#) so you can use it to prepare your manuscript.

When you open the document, select "Page Layout" from the "View" menu in the menu bar (View | Page Layout), which allows you to see the footnotes. Then type over sections of the document or cut and paste from another document and then use markup styles. Please keep the template at 8.5" x 11"—do not set the template for A4 paper. The pull-down style menu is at the left of the Formatting Toolbar at the top of your Word window (for example, the style at this point in the document is "Text"). Highlight a section that you want to designate with a certain style, then select the appropriate name on the style menu. The style will adjust your fonts and line spacing. Use italics for emphasis; do not underline. Do not change the font sizes or line spacing to squeeze more text into a limited number of pages. Please be certain to follow all submission guidelines when formatting an article or it will be returned for reformatting.

To modify the running headings, select View | Header and Footer. Click inside the text box to type the name of the journal the article is being submitted to and the manuscript identification number. Click the forward arrow in the pop-up tool bar to modify the header or footer on subsequent pages.

IJSER staff will edit and complete the final formatting of your paper.

2 PROCEDURE FOR PAPER SUBMISSION

2.1 Review Stage

Detailed submission guidelines can be found on the author resources Web pages. Author resource guidelines are specific to each journal, so please be sure to refer to the correct journal when seeking information. All authors are responsible for understanding these guidelines before submitting their manuscript. For further information on both submission guidelines, authors are strongly encouraged to refer to <http://www.ijser.org>.

2.2 Final Stage

For papers accepted for publication, it is essential that the electronic version of the manuscript and artwork match the hardcopy exactly! The quality and accuracy of the content of the electronic material submitted is crucial since the content is not recreated, but rather converted into the final published version.

All papers in IJSER Transactions are edited electronically. A final submission materials check list, transmission and compression information, and general publication materials can be found at: <http://www.ijser.org>.

2.3 Figures

All tables and figures will be processed as images. You need to embed the images in the paper itself. Please don't send the images as separate files.

2.4 Copyright Form

An IJSER copyright form must accompany your final submission. You can get a .pdf, .html, or .doc version at

Introduction to Engineering Research Wendy C. Crone, 2020-06-01 Undergraduate and first year graduate students engaging in engineering research need more than technical skills and tools to be successful From finding a research position and funding to getting the mentoring needed to be successful while conducting research responsibly to learning how to do the other aspects of research associated with project management and communication this book provides novice researchers with the guidance they need to begin developing mastery Awareness and deeper understanding of the broader context of research reduces barriers to success increases capacity to contribute to a research team and enhances ability to work both independently and collaboratively Being prepared for what s to come and knowing the questions to ask along the way allows those entering researcher to become more comfortable engaging with not only the research itself but also their colleagues and mentors Science & Engineering Indicators ,1998 **Engineering Research and America's Future** National Academy of Engineering, Committee to Assess the Capacity of the U.S. Engineering Research Enterprise, 2005-10-06 Leadership in innovation is essential to U S prosperity and security In a global knowledge driven economy technological innovation the transformation of new knowledge into products processes and services of value to society is critical to competitiveness long term productivity growth and an improved quality of life Preeminence in technological innovation depends on a wide array of factors one of which is leadership in engineering research education and practice A three decade long decline in the share of federal investment in research and development devoted to engineering and a perceived erosion of basic long term engineering research capability in U S industry and federal laboratories have raised serious questions about the long term health of engineering research in the United States This book illustrates the critical role of engineering research in maintaining U S technological leadership documents major challenges and opportunities facing the U S engineering research enterprise and offers specific recommendations for leaders in federal and state government industry and universities to help strengthen U S engineering research in the face of intensifying global competition **Sex-Specific Reporting of Scientific Research** Institute of Medicine, Board on Population Health and Public Health Practice, 2012-02-13 The number of women participating in clinical trials has increased during the last two decades but women are still underrepresented in clinical trials in general Some of the overall increase can be attributed to the greater number of women only trials of therapies for diseases that affect only women Even when women are included in clinical trials the results are often not analyzed separately by sex On August 30 2011 the Institute of Medicine IOM Board on Population Health and Public Health Practice hosted the workshop Sex Specific Reporting of Scientific Research The workshop explored the need for sex specific reporting of scientific results potential barriers and unintended consequences of sex specific reporting of scientific results experiences of journals that have implemented sex specific requirements including the challenges and benefits of such editorial policies and steps to facilitate the reporting of sex specific results Presenters and participants

included current and former editors of scientific journals researchers and scientists and policymakers from government industry and nonprofit organizations Presentations and discussions highlighted the importance to both women and men of having sex specific data the problems with sample size and financial constraints for conducting the research the appropriateness of sex specific analyses and the limitations of journal policies to change experimental designs Sex Specific Reporting of Scientific Research summarizes the presentations and discussions by the expert panelists during the IOM workshop The workshop s first session focused on why sex specific reporting is important Panelists highlighted historical and current events that have hindered or helped to advance the study of women In the next session panelists in academe discussed the challenges of collecting analyzing and reporting sex specific data from the researcher s perspective That was followed by two panels of leading journal editors who shared their experiences in developing and implementing editorial policies and the implications of sex specific reporting policies for journals

Forces Shaping the U.S. Academic Engineering Research Enterprise National Academy of Engineering, Committee on Academic Engineering Research, 1995-08-12 The way in which academic engineering research is financed and public expectations for the outcomes from such research are

changing at an unprecedented rate The decrease in support of defense related research coupled with the realization that many U S technological products are no longer competitive in the global market has sent a shock wave through research universities that train engineers This book argues for several concrete actions on the part of universities government and industry to ensure the flow and relevance of technical talent to meet national social and economic goals to maintain a position of leadership in the global economy and to preserve and enhance the nation s engineering knowledge base

A New Vision for Center-Based Engineering Research National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Committee on a Vision for the Future of Center-Based Multidisciplinary Engineering Research, 2017-07-18 The future security economic growth and competitiveness of the United States depend on its capacity to innovate Major sources of innovative capacity are the new knowledge and trained students generated by U S research universities However many of the complex technical and societal problems the United States faces cannot be addressed by the traditional model of individual university research groups headed by a single principal investigator Instead they can only be solved if researchers from multiple institutions and with diverse expertise combine their efforts The National Science Foundation NSF among other federal agencies began to explore the potential of such center scale research programs in the 1970s and 1980s in many ways the NSF Engineering Research Center ERC program is its flagship program in this regard The ERCs are interdisciplinary multi institutional centers that join academia industry and government in partnership to produce transformational engineered systems and engineering graduates who are adept at innovation and primed for leadership in the global economy To ensure that the ERCs continue to be a source of innovation economic development and educational excellence A New Vision for Center Based Engineering Research explores the future of center based engineering research the skills needed for effective center leadership and opportunities to enhance engineering education through the centers

Understanding Interventions That Encourage Minorities to Pursue Research Careers National Research Council, Division on Earth and Life Studies, Board on Life Sciences, 2007-11-12 Minority groups are severely underrepresented in the scientific workforce To encourage minorities to pursue careers in research a variety of intervention programs have been created at the pre college college and graduate school levels While there is a belief that these programs often achieve their goals there is relatively little understanding of the factors that contribute to that success The Division of Minority Opportunities in Research MORE at the National Institute of General Medical Sciences of the National Institutes of Health has established a grant program to support research to better understand the factors that contribute to the success of intervention programs The MORE Division asked the National Academies to organize a workshop focusing on issues addressed by the grant program This workshop summary presents examples of previous research on intervention programs describes ways to formulate effective research questions and conduct research to identify the key elements that lead to

successful intervention programs and outlines ways to foster a community of researchers in this area **Enabling Ocean Research in the 21st Century** National Research Council, Division on Earth and Life Studies, Ocean Studies Board, Committee on the Implementation of a Seafloor Observatory Network for Oceanographic Research, 2003-11-14 As the importance of the oceans to society grows so does the need to understand their variation on many temporal and spatial scales This need to understand ocean change is compelling scientists to move beyond traditional expeditionary modes of investigation Observing systems will enable the study of processes in the ocean basins over varying timescales and spatial scales providing the scientific basis for addressing important societal concerns such as climate change natural hazards and the health and viability of living and non living resources along our coasts and in the open ocean The book evaluates the scientific and technical readiness to move ahead with the establishment of a research driven ocean observatory network and highlights outstanding issues These issues include the status of planning and development factors that affect the timing of construction and installation the cost and requirements for maintenance and operations needs for sensor development and data management the impact on availability of ships and deep submergence facilities and the role of research based observatories within national and international operational ocean observing systems being developed and implemented
