Scientist Looks At Creation:

Creation's testimony to its God; or, The accordance of science, philosophy and revelation Thomas Ragg, 1873 **The Evolution Controversy in America** George E. Webb, 2021-05-11 A comprehensive intellectual history of America's century old debate over teaching evolution in public schools For well over a century the United States has witnessed a prolonged debate over the teaching of organic evolution in the nation's public schools The controversy that began with the publication of Darwin's *Origin of the Species* had by the 1920s expanded to include theologians politicians and educators The Scopes trial of 1925 provided the growing antievolution movement with significant publicity and led to a decline in the teaching of evolution In *The Evolution Crisis in America* George E Webb details how efforts to improve science education in the wake of Sputnik resurrected antievolution sentiment and led to the emergence of creation science as the most recent expression of that sentiment Creationists continue to demand balanced treatment of theories of creation and evolution in public schools even though their efforts have been declared unconstitutional in a series of federal court cases Their battles have been much more successful at the grassroots level garnering support from local politicians and educators Webb attributes the success of creationists primarily to the lack of scientific literacy among the American public *Creation Basics & Beyond*, 2020
