Medieval and Early Modern Representations of Authority in Scotland and the British Isles Kate Buchanan,Lucinda H.S. Dean,2016-05-20 What use is it to be given authority over men and lands if others do not know about it Furthermore what use is that authority if those who know about it do not respect it or recognise its jurisdiction And what strategies and language written and spoken visual and auditory material cultural and political did those in authority throughout the medieval and early modern era use to project and make known their power These questions have been crucial since regulations for governance entered society and are found at the core of this volume In order to address these issues from an historical perspective this collection of essays considers representations of authority made by a cross section of society within the British Isles Arranged in thematic sections the 14 essays in the collection bridge the divide between medieval and early modern to build up understanding of the developments and continuities that can be followed across the centuries in question Whether crown or noble government or church burgh or merchant all desired power and influence but their means of representing authority were very different These essays encompass a myriad of methods demonstrating power and disseminating the image of authority including material culture art literature architecture and landscapes saintly cults speeches and propaganda martial posturing and strategic alliances music liturgy and ceremonial display Thus this interdisciplinary collection illuminates the variable forms in which authority was presented by key individuals and institutions in Scotland and the British Isles By placing these within the context of the European powers with whom they interacted this volume also underlines the unique relationships developed between the people and those who exercised authority over them
