Education in Scotland Margaret M Clark, Margaret Clark, Pamela Munn, 2005-08-10 Education in Scotland is markedly different from what happens in the rest of the UK with a different National Curriculum school boards to oversee school management and a General Teaching Council which has been in existence since 1965 Whilst there are many examples of successful and innovative practice in Scotland the system is quite often not recognised as different by writers who talk about the UK education system as if it were one smooth whole This book describes recent developments in both legislation and practice in Scotland drawing comparisons with the English system Chapters cover administration and management the professional competence of teachers early years education provision the National Curriculum in Scotland Secondary Education Special Educational Needs *Education in Scotland* Ellen Margaret Doherty, George Albert Male, United States. Reconstructions of Secondary Education John Gray, Andrew McPherson, David Raffe, 2012-05-16 British secondary education has changed in major ways since 1945 This book examines some consequences and implications of both change and stability drawing on a unique series of national surveys of school leavers in Scotland The authors provide an empirical and theoretical account of central problems of contemporary schooling Their analysis covers certification curriculum and selection the effects of educational expansion trends in educational inequality the impact of comprehensive reorganisation truancy and alienation from schooling the explanation of differences in performance between schools and the implications for the public accountability of schools From these analyses the authors develop a critique of the theory of the education system that underpinned expansion They examine this theory's logical and empirical status as myth and elaborate how the political system and social science might jointly overcome some of the methodological difficulties that beset social and educational research The Leadership Class in Scottish Education Walter M. Class Rules James McEnaney,2021-09-08 Every single person in Scotland has some kind of stake in the effectiveness of the nation s schools so in writing this book my goal was to explain the intricacies and inconsistencies of the system and to explore its strengths and weaknesses in a way that would make sense to as many people as possible How much do we really know about the state of Scottish education Why do inequalities continue to dictate the school experiences of children across the country What can be done to address the problems in the school system James McEnaney does what he claims pundits and politicians cannot or will not do tell the truth about Scottish schools Class Rules makes the key issues and information surrounding Scotland s education system accessible to all McEnaney delves into the successes and failures of the Curriculum for Excellence interrogates the rhetoric around closing the attainment gap between the richest and poorest pupils and considers the impact of the global Covid 19 pandemic Most importantly this book also looks to the future to ask what changes can be made to improve the system for young people across the country and is a must read for anyone interested in the future of schools in Scotland

McKinney, Raymond McCluskey, 2019-05-23 This book analyses the development of Catholic schooling in Scotland over the course of the nineteenth and twentieth centuries Scholarship of this period tends to be dominated by discussions of the 1872 and 1918 Education Scotland Acts while these crucial acts are certainly not neglected in this volume the editors and contributors also examine the key figures and events that shaped Catholic education and Catholic schools in Scotland Focusing on such diverse themes as lay female teachers and non formal learning this volume illuminates many under researched and neglected aspects of Catholic schooling in Scotland This wide ranging edited collection will illuminate fresh historical insights that do not focus exclusively on Catholic schooling but are also relevant to the wider Scottish educational community It will appeal to students and scholars of Catholic schooling schooling in Scotland as well as Christian schooling more generally **Foreign and Comparative Education** Severin Kazimierz Turosienski, 1934 *Education's Abiding Moral Dilemma* Sheldon Rothblatt, 2007-05-14 The conflict between access and quality in education has been front page news for decades Policies regarding the role of elite universities the organisation of secondary education admissions criteria courses of study high stakes testing and fiscal and programme accountability have changed with uncommon frequency resulting in confusion and uncertainty Yet it is the argument of this book that the tension between access to education and the preservation of quality is another chapter in the much longer history of merit selection in England Scotland and America and should be seen in its proper contexts The underlying cause of the difficulties however is the dilemma created by two

competing conceptions of virtue one determined by merit judged competitively and the other more vaguely but emotionally supported by a broader view of worth Merit is consistent with liberal democracy but worth is the special province of social democracy None of the distinctions is easily categorised by political party or ideology They are the result of opposite moral impulses inherent in plural democratic societies undergoing the strains of internal and global competition Teacher Education for the Changing Demographics of Schooling Lani Florian,Nataša Pantić,2017-04-09 The book takes as its premise the argument that diverse learner groups are a fact of demographic change that should be considered foundational in the preparation of teachers rather than be problematized as a challenge It promotes the idea of teacher education for inclusive education based on a consideration of what it means to educate all children together Divided into four parts the book considers key issues for teacher education teacher agency teacher education for diversity and a research agenda for the future In today s world the demographic profile of students in schools is more complex than ever before and the increasing cultural linguistic and developmental diversity of today s classrooms along with the pressure to achieve high academic standards for everybody has significant implications for how classroom teachers should be prepared to meet these demands This book advances a new understanding of inclusive education that addresses the limitations inherent in current approaches that problematize differences between learner groups by promoting a view of difference as an aspect of human individuality It considers the implications of the research evidence underpinning teacher education for diversity and makes suggestions for future research in the field *Educational Authorities and the Schools* Helene Ärlestig,Olof Johansson,2020-05-28 This book describes and analyses the organisation functions and development of national educational authorities and agencies and the influence they have on local schools in 20 countries around the world It examines the governing chain in the respective countries from both a theoretical and descriptive perspective It does so against the background of the stability and rigour of the governing chains having been challenged with some researchers considering the chain to be broken However the view that comes to the fore in this book is that the chain is still present and contains both vertical implementation structures and intervening spaces for policy interpretation How schools become successful is important for the individual students as well as the local community and the national state A vast quantity of research has looked at what happens in schools and classrooms At the same time national governance and politics as well as local prerequisites are known to exert influence on schools and their results to a high degree Societal priorities problems and traditions provide variety in how governance is executed This book provides an international overview of the similarities and differences between educational agencies and how their work influences schools
