The Sacred Law A Point Within a Circle

Figure 3 –

The diagram of the proof used by Euclid for Thales' Theorem.

"Ritualistically, this is a symbol of control of conduct; a standard of right living. The symbol has an extreme antiquity. Early Egyptian monuments are carved with the Alpha and the Omega or symbol of God in the center of a circle embordered by two upright parallel perpendicular serpents, representing the power and wisdom of the Creator. The symbol apparently came into Masonry from an operative practice, known to but a few Master workmen on Cathedrals and great buildings.

Any school boy knows it now; put a dot on a circle anywhere; draw a straight line across the circle through its center; connect the dot with the points at which the line through the center cuts the circle; the result is a perfect square.

This was the Operative Master's great secret - knowing how to "try the square" It was by this that he tested the working tools of the Fellows of the Craft; did he do so often enough, it was impossible either for their tools or their work "to materially err".
