Learning Dispositions

- 'The concept of a **'disposition'** comes from developmental psychology. In everyday speech we often use it like **'temperament'**; we comment that someone has **'a cheerful disposition'**. It is seen as a quality of an individual, something he or she was born with, or an outcome of facilitating circumstances. When motivation is situated, however, as David Hickey points out, **'context has a fundamental, rather than merely a facilitative role'** (1997, p177). Lilian Katz made this point when she commented that: **Dispositions are a very different type of learning from skills and knowledge. They can be thought of as habits of mind, tendencies to respond to situations in certain ways** (1998, p30, my emphasis).'

Anxiety in a 'Risk' Society Iain Wilkinson, 2002-08-27 Few would dispute that we are living at a time of high anxiety and uncertainty in which many of us will experience a crisis of identity at some point or another At the same time news media provide us with a daily catalogue of disasters from around the globe to remind us that we inhabit a world of crisis insecurity and hazard Anxiety in a Risk Society looks at the problem of contemporary anxiety from a sociological perspective highlights its significance for the ways we make sense of risk and uncertainty argues that the relationship between anxiety and risk hinges on the nature of anxiety Iain Wilkinson believes that there is much for sociologists to learn from those who have made the condition of anxiety the focus of their life's work By making anxiety the focus of sociological inquiry a critical vantage point can be gained from which to attempt an answer to the question Are we more anxious because we are more risk conscious This is an original and thought provoking contribution to the understanding of late modernity as a risk society

The Wondering Brain Kelly Bulkeley, 2005-07-08 The explosion of new research in cognitive neuroscience has revealed fascinating dimensions of the human brain mind system But even as it brings us closer to understanding how the mind works science is producing more and perhaps even larger questions What further powers and abilities are latent within us The Wondering Brain argues that the profound questions raised by cognitive neuroscience may best be answered through a dialogue with religion Kelly Bulkeley argues that cognitive neuroscience seen in the light of religion is a unique source of insight into the natural groundings of faith morality love ecstasy and revelation And religion seen in the light of cognitive neuroscience is a powerful cultural system whose most valuable function is to stretch and expand our basic cognitive capacities Kelly Bulkeley's deep engagement with both religious thinking and the workings of cognitive neuroscience makes for a constantly surprising book full of stories that catch the reader in the unexpected place between two supposedly irreconcilable ways of being in the world

Form-Function Mapping in Content-Based Language Teaching Magdalena Walenta, 2019-01-22 This book presents a form function mapping FFM model for balancing language and content gains within content based language teaching CBLT It includes a theoretical part which outlines the FFM model

and drawing on the analysis of eclectic teaching methods and interlanguage restructuring proposes pedagogical tools for its implementation. These tools which encourage mapping of language forms onto content knowledge are hypothesized to facilitate interlanguage restructuring thus helping CBLT learners in their struggle with L2 morpho syntax. The empirical section presents the results of a quantitative qualitative study conducted among adult L1 Polish learners of English in a CBLT context. It then goes on to translate the findings which reveal that the FFM model has a positive and significant influence on interlanguage restructuring as well as a favorable reception among CBLT learners into a set of pedagogical guidelines for practitioners.

The Premiership in Focus Martyn Smith, 2012-08-31 The Premiership in Focus celebrates 15 years that have changed the face of football. When Football Focus began life on BBC1 in 1968 as Football Preview, football in England was about old wooden terraces, grounds that were ankle deep in mud or covered in snow, and a Bovril at half time. In 1992 came the Premier League and the sport changed forever. The Premier League was established as one of the most exciting, cosmopolitan and widely watched national sporting leagues in the world, and fans are now able to watch hundreds of Premiership matches live as football has seemingly taken over much of national life. Why has this happened? How has it affected the clubs, fans, players and managers? How long can it be sustained? This book aims to examine these questions as well as celebrate 15 amazing years of football. It will look back at the great moments, outstanding matches, stunning goals, incredible saves, controversial decisions and the sheer excitement that has been the Premiership.

The Phonology and Morphology of Arabic Janet C. E. Watson, 2007-11-01 This book is the first comprehensive account of the phonology and morphology of Arabic. It is a pioneering work of scholarship based on the author's research in the region. Arabic is a Semitic language spoken by some 250 million people in an area stretching from Morocco in the West to parts of Iran in the East. Apart from its great intrinsic interest, the importance of the language for phonological and morphological theory lies as the author shows in its rich root and pattern morphology and its large set of guttural consonants. Dr Watson focuses on two eastern dialects, Cairene and Sani. Cairene is typical of an advanced urban Mediterranean dialect and has a cultural importance throughout the Arab world; it is also the variety learned by most foreign speakers of Arabic. Sani, spoken in Yemen, is representative of a conservative peninsula dialect. In addition, the book makes extensive reference to other dialects as well as to classical and Modern Standard Arabic. The volume opens with an overview of the history and varieties of Arabic and of the study of phonology within the Arab linguistic tradition. Successive chapters then cover dialectal differences and similarities and the position of Arabic within Semitic, the phoneme system and the representation of phonological features, the syllable and syllabification, word stress, derivational morphology, inflectional morphology, lexical phonology and post-lexical phonology. **The Phonology and Morphology of Arabic** will be of great interest to Arabists and comparative Semiticists as well as to phonologists, morphologists and linguists more generally.
