Poisoning and Toxicology Compendium Jerrold B. Leikin, Frank P. Paloucek, 1998 Small Animal Toxicology - E-Book Michael E. Peterson, Patricia A. Talcott, 2005-11-11 This revised and expanded reference is a valuable aid for the practicing veterinary clinician in diagnosing and determining treatment for toxic exposures in small animals and for veterinary students as a supplement to their classroom instruction. It contains chapters addressing nontraditional areas of toxicology not covered in conventional toxicology texts. It also covers areas of toxicology which seem basic but are rarely discussed such as taking a toxicological history, establishing a minimum database, providing supportive care and managing emergency treatment of the poisoned patient. The book is organized into three sections including 20 new chapters and new topics such as grapes and raisins, lilies, Christmas time plants, mercury and accidental poisoning in non traditional pets. New two color design makes the book more esthetically pleasing and allows for quick retrieval of information. Toxic Plant Information Summary tables make treatments for plant intoxications easy to find. Toxic Plant Quick Reference Based on Clinical Signs tables are included to support small animal veterinarians in cases of potential toxic plant ingestion. Summary charts at the beginning of each chapter in the Specific Toxicants section contain bulleted lists with clear cut information on the specific toxicant, the clinical signs and prognosis. A comprehensive review of all known potentially toxic substances is provided from A acetaminophen to Z zinc including the very latest on grape and raisin toxicity making this the most up to date and thorough text in this field. 45 different experts contribute to this book all from the field of veterinary toxicology and medicine. 20 new chapters have been added. New topics include a list of toxicants affecting body systems, management of toxins in pregnancy, diagnostic toxicology, bacterial toxins and cosmetic toilet articles. Snake bite injuries are treated in two separate expanded chapters: Pit Vipers and Coral Snakes. Section on pharmaceuticals includes bromides, anticonvulsants, tricyclic antidepressants, monoamine oxidase inhibitors, B adrenergic toxicities and vitamins A and D.
