and why the biggest publishers of guidebooks are no longer around Walsh devotes entire chapters to many of gaming's most popular franchises including Tony Hawk's Pro Skater, Gears of War and Diablo among others. From inauspicious beginnings with Daikatana to authoring the books for the entire Bioshock trilogy with plenty of highs, lows and Warp Pipes along the way, Walsh delivers a rare treat to twenty-first-century gamers. The Walkthrough is sure to satisfy the curiosity of anyone who grew up with the works of BradyGames and Prima Games sprawled across their laps. With over one hundred books to his credit and countless weeks spent at many of the most famous studios in North America, he is uniquely qualified to give an insider's perspective of a little-known niche within the multi-billion-dollar industry.

The Silicon Island-A Blessing in Disguise? A Place where Semiconductors & Geopolitics meet Colley Hwang, Eric Huang, 2023-04-01

Never count on a handful of aces up your sleeve: a game-changer may just turn your longstanding advantage into a future liability. Semiconductors and the supply chains are Taiwan's most significant strategic assets to engage with the international community. In retrospect, Taiwan's semiconductor industry, led by industry leaders like Morris Chang and Ming Kai Tsai, had achieved a global leading position. Corporate strategies employed by Taiwan's representative rivals, as Intel (U.S.) and Samsung (Korea), all feed into their distinct future development. Semiconductors are ubiquitous in an era of Internet of Things. Ironically, though, is Taiwan's semiconductor industry coming as the most coveted possession or Taiwan's sacred mountain? The rapid changes of global status have upended global geopolitics, which can far outweigh the impact on enterprises in terms of technological innovation and business reform. Bearing the brunt amid the clash of interests between the U.S. and China, Taiwan again is sensing the strong gunpowder smell. In the face of Japan-Korea competition coupled with ASEAN and South Asian emerging players breathing down the neck, Taiwan needs to mull it over and address these austere yet meaningful challenges to maintain its cutting edge in the semiconductor industry. How would Taiwan create a back-to-back miracle against the backdrop of risks posed by geopolitics?

Media Franchising Derek Johnson, 2013-03-22

Johnson astutely reveals that franchises are not Borg-like assimilation machines but rather complicated ecosystems within which creative workers strive to create compelling shared worlds. This finely researched breakthrough book is a must-read for anyone seeking a sophisticated understanding of the contemporary media industry. Heather Hendershot, author of *What's Fair on the Air: Cold War, Right Wing Broadcasting and the Public Interest*. While immediately recognizable throughout the U.S. and many other countries, media mainstays like *X-Men*, *Star Trek*, and *Transformers* achieved such familiarity through constant reincarnation. In each case, the initial success of a single product led to a long-term embrace of media franchising, a dynamic process in which media workers from different industrial positions shared in and reproduced familiar culture across television, film, comics, games, and merchandising. In *Media Franchising*, Derek Johnson examines the corporate culture behind these production practices as well as the collaborative and creative efforts involved in conceiving, sustaining, and sharing intellectual properties in media work worlds. Challenging connotations of homogeneity, Johnson shows how the cultural and industrial logic of franchising has encouraged

media industries to reimagine creativity as an opportunity for exchange among producers licensees and even consumers Drawing on case studies and interviews with media producers he reveals the meaningful identities cultural hierarchies and struggles for distinction that accompany collaboration within these production networks Media Franchising provides a nuanced portrait of the collaborative cultural production embedded in both the media industries and our own daily lives
