History of Modern Tourism Eric Zuelow, 2015-10-26 Tourism is one of the largest industries in the world yet leisure travel is more than just economically important. It plays a vital role in defining who we are by helping to place us in space and time. In so doing it has aesthetic, medical, political, cultural, and social implications. However, it hasn't always been so. Tourism as we know it is a surprisingly modern thing, both a product of modernity and a force helping to shape it. *A History of Modern Tourism* is the first book to track the origins and evolution of this pursuit from earliest times to the present. From a new understanding of aesthetics to scientific change, from the invention of steam power to the creation of aircraft, from an elite form of education to family car trips to see national shrines, this book offers a sweeping and engaging overview of a fascinating story not yet widely known.

Being Poland Tamara Trojanowska, Joanna Niżyńska, Przemysław Czapliński, 2018-01-01 *Being Poland* offers a unique analysis of the cultural developments that took place in Poland after World War One, a period marked by Poland's return to independence. Conceived to address the lack of critical scholarship on Poland's cultural restoration, *Being Poland* illuminates the continuities, paradoxes, and contradictions of Poland's modern and contemporary cultural practices and challenges the narrative typically prescribed to Polish literature and film. Reflecting the radical changes, rifts, and restorations that swept through Poland in this period, Polish literature and film reveal a multitude of perspectives. Addressing romantic perceptions of the Polish immigrant, the politics of post-war cinema, poetry, and mass media, *Being Poland* is a comprehensive reference work written with the intention of exposing an international audience to the explosion of Polish literature and film that emerged in the twentieth century.

Memory, Conflict and New Media Ellen Rutten, Julie Fedor, Vera Zvereva, 2013-04-12 This book examines the online memory wars in post-Soviet states where political conflicts take the shape of heated debates about the recent past and especially World War II and Soviet socialism. To this day, former socialist states face the challenge of constructing national identities, producing national memories, and relating to the Soviet legacy. Their pasts are principally intertwined; changing readings of history in one country generate fierce reactions in others. In this transnational memory war, digital media form a pivotal discursive space, one that provides speakers with radically new commemorative tools. Uniting contributions by leading scholars in the field, *Memory, Conflict and New Media* is the first book-length publication to analyse how new media serve as a site of political and national identity building in post-socialist states. The book also examines how the construction of online identity is irreversibly affected by thinking about the past in this geopolitical domain. By highlighting post-socialist memory's digital mediations and digital memory's transcultural scope, the volume succeeds in a twofold aim: to deepen and refine both post-socialist memory theory and digital memory studies. This book will be of much interest to students of media studies, post-Soviet studies, Eastern European Politics, memory studies, and International Relations in general.
