

The Polar Regions

The polar regions are the areas around both the North Pole, also known as the Arctic, and the South Pole, also known as Antarctica.

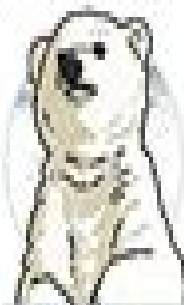

The Arctic

Location

The Arctic is located in the northernmost part of Earth and lies within the Arctic Circle (a line of latitude near the top of the Earth).

Landscape

The Arctic is largely covered by water, the Arctic Ocean, and most of this is frozen. These frozen areas are known as sea ice. Usually, a thick blanket of snow covers the sea ice.

Climate

- The Arctic is persistently cold with temperatures often as low as -34°C (-33°F).
- In winter, it is continuously dark often with clear skies.
- In summer, there is continuous daylight and cloudy near the coasts.

Wildlife

Animals in the Arctic have adapted to survive its harsh weather conditions. These include:

- musk oxen
- polar bears
- Arctic foxes

Antarctica

Location

Antarctica is a continent and is located in the southernmost part of the Earth within the Antarctic Circle. Its name means 'opposite to the Arctic'. It is surrounded by the Southern Ocean.

Landscape

Antarctica is around 14.2 million square kilometres (5.5 million square miles) in size. Around 98% of the land is covered in thick ice.

Climate

- Antarctica is the coldest, windiest, and driest continent on Earth.
- It experiences extreme low temperatures.
- Like the Arctic, Antarctica experiences continuous darkness in winter and continuous daylight in summer.

Wildlife

Many species of penguin live in Antarctica including the emperor penguin. Other animals living there include:

- orcas
- leopard and elephant seals
