practices and the museum strategies that support them The third section focuses on the role of photographs in the museum articulation of difficult histories A final section addresses photograph collections in a digital environment New technologies and new media have transformed the management address and purposing in photographs in museums from cataloguing practices to streaming on social media These growing practices challenge both traditional hierarchies of knowledge in museums and the location of authority about photographs The volume emerges from PhotoCLEC a HERA funded project on museums and the photographic legacy of the colonial past in a postcolonial and multicultural Europe
