Police Analysis And Planning For Vehicular Bombings Prevention Defense And Response Paperback:

Police Analysis and Planning for Homicide Bombings Ellis John, 2007 *Police Analysis and Planning for Homicide Bombings* is oriented toward planning police operations in the public sector but will be usable by other public officials as well as by some military and private sector police operations. It addresses police threat assessment of vulnerability assessment to defense against and response to attacks by homicide bombs. It begins with an essay on the distinctions between military and police operations and includes an examination of the U S counter terrorist policy and structure assessment of explosive weapons of mass destruction and the terrorist ability to make and use them the legal limitations of police response operations in the United States and defensive response to this form of attack. It concludes with commentary on actions that may be needed if this threat continues to develop in the United States. Relying upon both experience and research the author has synthesized the varied military law enforcement and private security approaches into a detailed analysis of the threat posed by terrorist use of homicide bombs and the necessary internal response. With the first hand experience of applying the knowledge in an actual threat environment the combination of historical perspective and reality confrontation produces an effective examination of the topic for the police administrator and emergency planner

The Evil of Terrorism Uriel Rosenthal, Erwin R. Muller, 2007 The United States and other countries throughout the world have suffered from catastrophic terrorism causing mass casualties. Elsewhere terrorists have taken the lives of prominent people in ostentatiously cruel ways. In Iraq bloody terrorist attacks are an endemic phenomenon. They have become part of daily life. There is no reason to expect a reduction of the new terrorism in the foreseeable future. On the contrary there will be new waves of terrorism including attacks with unconventional means. The globalization of the new terrorism is reflected not only in the mobility of terrorists but especially in the worldwide distribution of ideas and methods practiced by terrorist networks. The world is facing the threat of a shift from terrorism to terror towards a society intimidated by a continuous threat of arbitrary massive violence. This book addresses the shift in many parts of the world from terrorism to an atmosphere of terror. It stresses the lack of symmetry between democratic governments which have to obey the role of law and international conventions and terrorists cherishing a total denial of rules and norms. The authors formulate five missions for democratic governments: do not deny the most serious threat, make life as difficult as possible for terrorists, upgrade the quality of acute crisis management in the case of a terrorist attack, improve the quality of consequences management after terrorist attacks and increase the effort to channel collective stress in the aftermath of a terrorist assault. The authors claim that the fight against terrorism is first and foremost a responsibility of democratic states. Throughout its existence the United Nations has been unable to give shape and substance to an effective counterterrorism strategy. An alliance of democratic states would be in a much better position to take on the legitimate fight against international terrorism
