Police Society:

The Police and Society Victor E. Kappeler, Brian P. Schaefer, 2018-09-11 The most productive route to understanding the dynamic interrelationships of the police with society is to examine the recurring central themes in policing The articles in this anthology represent some of the best scholarship on compelling issues Selected for both their complementary and competing natures the articles serve as touchstones for one another often challenging previous conceptions Many selections question the methods by which information was acquired the practices that evolved from that information and the background assumptions behind the construction of practices Some of the many issues and conflicts addressed in this collection include What is the nature of the police role and function Who benefits from police service Who is harmed How are public safety and social order secured while maintaining individual rights and freedoms To what extent do our expectations about the police and society reflect our values and demands Are the police a society unto themselves Is policing at a critical crossroads The editors assembled this volume with the goal of helping readers to identify underlying assumptions to dissect how values influence inquiries and to discover connections A better understanding of the role of the police in society provides a solid foundation for assessing the efficacy of future police society relationships **Role of Police in a Changing Society**

Police Visibility Bryce Clayton Newell,2021-06-15 Police Visibility presents empirically grounded research into how police officers experience and manage the information politics of surveillance and visibility generated by the introduction of body cameras into their daily routines and the increasingly common experience of being recorded by civilian bystanders Newell elucidates how these activities intersect with privacy free speech and access to information law and argues that rather than being emancipatory systems of police oversight body worn cameras are an evolution in police image work and state surveillance expansion Throughout the book he catalogs how surveillance generates information the control of which creates and facilitates power and potentially fuels state domination The antidote he argues is robust information law and policy that puts the power to monitor and regulate the police squarely in the hands of citizens

Police Selection and Training J.C. Yuille,2012-12-06 The New Police Officer During the past twenty years the tasks required of police officers have expanded and changed with dramatic rapidity The traditional roles of the police had been those of law enforcement and the maintenance of public order As a consequence police officers were typically large bodied males selected for their physical abilities and trained to accept orders and enforce the law Over the past two decades however the industrialized nations have placed a variety of new demands on police officers To traditional law enforcement and public order tasks have been added social work mental health duties and community relations work For example domestic disputes violence between husbands

and wives lovers relatives etc have increased in frequency and severity or at least there has been a dramatic increase in reporting the occurrence of domestic violence Our societies have no formal system to deal with domestic disputes and the responsibility to do so in most countries has fallen to the police In fact in some areas as many as 607 of calls for service to the police are related to domestic disputes see the chapter in this text by Dutton As a result the police officer has had to become a skilled social worker able to intervene with sensitivity in domestic situations Alternatively in the case of West Germany the officer has had to learn to work cooperatively with social workers see the chapter by Steinhilper

Human Relations and Police Work Larry Miller, Michael Braswell, John Whitehead, 2009-11-23 The sixth edition of this well received volume provides the opportunity for readers to experience the problems inherent in the various roles of a law enforcement officer through an experiential case study approach presenting situations that address police community relations crisis prevention juvenile justice the emotionally distressed mentally ill police stress ethical dilemmas and administrative supervisory issues Solving the problems in these 63 scenarios promotes thoughtful and stimulating class discussion on the challenging nature of police work
