**Policing and Mental Health** John McDaniel, Kate Moss, Ken Pease, 2020-02-25 This book explores the relationship between policing and mental health Police services around the world are innovating at pace in order to develop solutions to the problems presented and popular models are being shared internationally Nevertheless disparities and perceptions of unfairness remain commonplace Innovations remain poorly funded and largely unproven Drawing together the insights of eminent academics in the UK the US Australia and South Africa the edited collection evaluates the condition of mental health and policing as an interlocked policy area uncovering and addressing a

number of key issues which are shaping police responses to mental health. Due to a relative lack of academic texts pertaining to developments in England and Wales, the volume contains a distinct section on relevant policies and practices. It also includes sections on US and Australian approaches focusing on Crisis Intervention Teams (CITs), Mental Health Intervention Teams (MHITs), stressors, and innovations from Boston in the US to Queensland in Australia. Written in a clear and direct style, this book will appeal to students and scholars in policing, criminology, sociology, mental health, cultural studies, social theory, and those interested in learning about the condition and trajectory of police responses to mental health.

**Improving Police Response to Persons with Mental Illness** Thomas Joseph Jurkanin, Larry T. Hoover, Vladimir Sergevnin, 2007. The Ghostbusters refrain "Who you gonna call" typically connotes a lighthearted response to an unusual problem, but in the context of a human being suffering a mental health crisis, the refrain is anything but lighthearted. In an ideal world, who you gonna call would be a trained mental health professional. In the real world, the cry for help is usually received by the police. Police respond because there is no one else to assist. Police officers rank mental health crisis situations as far more stressful than crimes in progress. A person suffering from mental illness is, by definition, not fully rational. Although they are likewise not fully irrational, behavior is unpredictable and unpredictable behavior for the police is potentially dangerous behavior. As a consequence, outcomes of engagement between law enforcement and mental health consumers are too often tragic. No organization is more concerned about inadequate response than the police themselves. *Improving Police Response to Mental Illness* provides best practices guidance. A national pool of experts provides both insight and recommendations ranging from the conceptual to the pragmatic. Law Enforcement Training Models, written specifically for the book, each chapter addresses a given critical component including social policy, police response alternatives, training, legal constraints, and cooperative agreements with mental health service providers. This is an indispensable volume on the subject of police and mental health and is designed for police practitioners, mental health professionals, and scholars of social policy.

**Community Mental Health in Canada, Revised and Expanded Edition** Simon Davis, 2013-11-15. *Community Mental Health in Canada* offers a timely critical overview of the provision of public mental health services in Canada, past, present, and future. This new edition has been substantially revised and expanded and includes a deeper discussion of stigma, the recovery vision, the pharmaceutical industry, and mental health law, in addition to an array of new topics. Recent developments such as the creation of the Mental Health Commission of Canada in 2007 and the release of its national mental health strategy document in 2012 are also discussed. Accessibly written and highly informative, it is an indispensable resource for students, practitioners, and policy makers, as well as service recipients and their families.
