Burn After Reading Ladislav Farago, Emerson F. Hurley, 2019-12-06 Burn After Reading first published in 1961 is an insider's look at the use of intelligence espionage and sabotage during the Second World War Author Ladislav Farago chief of research and planning in the U S Navy's Special Warfare Branch describes activities of the Allies organizations such as the O S S M I 5 Deuxieme Bureau various units in the Soviet Union and others as well as those of Germany and Japan Many of the secret operations were critical to the success or failure of the war effort and a high price was paid in terms of human lives lost as many spies and agents were captured tortured and executed Hungarian born Ladislav Farago wrote numerous books on the war and espionage including an authoritative biography of General George Patton 1963 Farago passed away on October 15 1980 The Encyclopedia of Police Science Jack R. Greene, 2007 First published in 1996 this work covers all the major sectors of policing in the United States Political events such as the terrorist attacks of September 11 2001 have created new policing needs while affecting public opinion about law enforcement This third edition of the Encyclopedia examines the theoretical and practical aspects of law enforcement discussing past and present practices **Library Book Catalog** United States. Bowker Company, 1981 *Coercive Brain-Reading in Criminal Justice* Sjors Ligthart, 2022-09-01 Emerging neurotechnology offers increasingly individualised brain information enabling researchers to identify mental states and content When accurate and valid these brain reading technologies also provide data that could be useful in criminal legal procedures such as memory detection with EEG and the

prediction of recidivism with fMRI Yet unlike in medicine individuals involved in criminal cases will often be reluctant to undergo brain reading procedures This raises the question of whether coercive brain reading could be permissible in criminal law Coercive Brain Reading in Criminal Justice examines this question in view of European human rights the prohibition of ill treatment the right to privacy freedom of thought freedom of expression and the privilege against self incrimination The book argues that at present the established framework of human rights does not exclude coercive brain reading It does however delimit the permissible use of forensic brain reading without valid consent This cautionary cutting edge book lays a crucial foundation for understanding the future of criminal legal proceedings in a world of ever advancing neurotechnology *Catalog of Copyright Entries.
