Unarmed and Dangerous Jon Shane,Zoë Swenson,2018-07-17 There is tremendous controversy across the United States and beyond when a police officer uses deadly force against an unarmed citizen but often the conversation is devoid of contextual details These details matter greatly as a matter of law and organizational legitimacy In this short book authors Jon Shane and Zo Swenson offer a comprehensive analysis of the first study to use publicly available data to reveal the context in which an officer used deadly force against an unarmed citizen Although any police shooting even a justified shooting is not a desired outcome often termed lawful but awful in policing circles it is not necessarily a crime The results of this study lend support to the notion that being unarmed does not mean not dangerous in some ways explaining why most police officers are not indicted when such a shooting occurs The study s findings show that when police officers used deadly force during an encounter with an unarmed citizen the officer or a third person was facing imminent threat of death or serious injury in the vast majority of situations Moreover when police officers used force their actions were almost always consistent with the accepted legal and policy principles that govern law enforcement in the overwhelming proportion of encounters as measured by indictments Noting the dearth of official data on the context of police shooting fatalities Shane and Swenson call for the U S government to compile comprehensive data so researchers and practitioners can learn from deadly force encounters and improve practices They further recommend that future research on police shootings should examine the patterns and micro interactions between the officer citizen and environment in relation to the prevailing law The

unique data and analysis in this book will inform discussions of police use of force for researchers policymakers and students involved in criminal justice public policy and policing Performance Measures for the Criminal Justice System ,1993 A
