**Criminal Justice Research: Inspiration, Influence, and Ideation** Ian K. McKenzie, Ray Bull, 2017-11-01. This title was first published in 2002. A collection of criminal justice researchers select a number of books, documents, papers, and such like that they believe to be important and influential in the field of criminal justice research. Each author has written a description and critique of the selected item and have discussed the impact of each of them with regards to formulating or developing their own research. The authors also speculate on the direction they believe the area in question might be expected to develop in the first 10-15 years of the 21st century. The definition of criminal justice in this book is a broad one and that is reflected in the combination of criminologists, psychologists, sociologists, and experts on social and public administration. In all, the book attempts to examine the inspirations, influences, and thought processes which underpin criminal justice research efforts.

**Global Criminal and Sovereign Free Economies and the Demise of the Western Democracies** Robert J. Bunker, Pamela Ligouri Bunker, 2014-09-15. Much has been written about the many economic benefits of globalization and the triumph and spread of democratic liberalism with the end of the Cold War following the demise of the Soviet Union. This work takes issue with such wine and roses perspectives about the future of the Western democracies and their faith-based views on the moral purity of a globalized marketplace. It also questions many of the assumptions found in the status quo reinforcing discipline of international political economy (IPE), a discipline that focuses on the formal and legitimate economies and the facade they present that international relations and commerce is still dominated and dictated solely by the old Westphalian state-centric system. Having highlighted these concerns, this book looks at two major themes. The first theme focuses on the theoretical perception that a Dark Renaissance is taking place globally, one in which the Western liberal democracies and its citizens are ill-prepared to respond because it exists at the trans-civilization level bridging the modern to the post-modern world. The second theme focuses on the actual process of state deconstruction that is taking place. This process is leading to what may become the very undoing of the democracies. Drawing together experts from a variety of backgrounds, this work explores the increasing shift away from formal-based capitalism and evaluates through case studies how different states are responding to the challenges they face. This work will be of great interest to students and scholars of international political economy.
