Policy Controversies In Higher Education:

Policy Controversies in Higher Education Samuel Kimball Gove, Thomas M. Stauffer, 1986-11-18 As we enter the mid eighties higher education is faced with deepening crises stemming from declines in both funding and enrollment and from rapidly changing social needs This volume of essays contributed by distinguished scholars from various disciplines identifies and discusses the many problems that will require attention in the coming decades if our colleges and universities are to continue to supply quality educational opportunities on a broad scale In seeking solutions to these problems the authors stress the need for a realistic appraisal of the policymaking system It is emphasized that educators and policymakers will need to take into account the levels at which political and policy making activity occur and the complex political interrelationships existing among the different levels of institutional governmental and public authority *Problems of Higher Education in India* C. M. Ramachandran, With special reference to Kerala *Higher Education: Handbook of Theory and Research* Laura W. Perna, 2023-02-24 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic The Handbook focuses on a comprehensive set of central areas of study in higher education that encompasses the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community Each annual volume contains chapters on current important issues pertaining to college students and faculty organization and administration curriculum and instruction policy diversity issues economics and finance history and philosophy community colleges advances in research methodology and other key aspects of higher education administration The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world **The Governance of British Higher Education** Michael Shattock, Aniko Horvath, 2019-10-03 Book of the Week Times Higher Education Forms of institutional governance critically shape the culture creativity and academic outcomes of higher education The book provides a new updated and research based account of the changing face of the governance of British higher education Historically British universities were deemed amongst the most if not the most autonomous in Europe with governance rooted in their collegial disciplinary structures This assessment must now be decisively revised although the belief systems deriving from it remain buried deep in university culture Drawing on the authors investigation of the governance of higher education in the four UK nations including extensive on site interviews and discussions with government policy makers the book shows how global national and system level pressures have changed the face both of the external governance of higher education institutions and how universities govern themselves Government priorities new funding methodologies and marketisation have all played a part in this process Since the mid 1980s there have been drastic

changes in the external environment reinforced by the increasing diversity within the higher education system as a whole and between the national sub systems In addition a new private sector of higher education has been created New forms of institutional governance are emerging which may have profound effects on research and teaching and on academic creativity and innovation The study discusses the effects of a state regulated system compared with the more heterarchical system which preceded it It offers a comparison of the effects of devolved governance to Wales Scotland and Northern Ireland on the respective higher education systems and their impact on institutional governance The study concludes that England is becoming increasingly an outlier and discusses the long term implications for the coherence of a British higher education system

Global Issues in Higher Education Pamela B. Richards, 2007 In most developed countries a high proportion of the population up to 50 percent now enter higher education at some time in their lives Higher education is therefore very important to national economies both as a significant industry in its own right and as a source of trained and educated personnel for the rest of the economy It follows that there are enormous stakes involved for a particular country even though the payoff of serious reforms may take decades and thus be counterproductive to the political forces responsible for designing and implementing such reforms since their horizons tend to be very short This new book tackles important issues in this dynamic field

American Higher Education John R. Thelin, 2017-02-17 The latest book in the Core Concepts in Higher Education series brings to life issues of governance organization teaching and learning student life faculty finances college sports public policy fundraising and innovations in higher education today Written by renowned author John R Thelin each chapter bridges research theory and practice and discusses a range of institutions including the often overlooked for profits community colleges and minority serving institutions A blend of stories and analysis this exciting new book challenges present and future higher education practitioners to be informed and active participants capable of improving their institutions

The States and Public Higher Education Policy Donald E. Heller, 2003-05-01 Among the many challenges facing higher education today affordability access and accountability are increasingly commanding the attention of the public and policymakers alike As students and their families struggle to meet rising tuition prices and state resources for the funding of higher education are constrained policymakers confront issues of affordability within state and institutional budgets Changing demographics and challenges to affirmative action complicate the admissions process even as colleges and universities seek to diversify enrollments And issues of institutional accountability have given rise to the restructuring of higher education governing boards and systems and to a reexamination of the role of public trustees in governance In *The States and Public Higher Education Policy* Donald E Heller and other higher education scholars and practitioners explore the debates surrounding issues of affordability access and accountability In a concluding chapter Heller considers the impact of technology on public colleges and universities a subject that dominates many discussions of higher education Offering a broad perspective that will appeal to policymakers and educators *The States and Public Higher Education Policy* provides an

unobstructed view of key issues that will shape the future of higher education *The European Higher Education Area* Adrian Curaj, Liviu Matei, Remus Pricopie, Jamil Salmi, Peter Scott, 2015-10-12 Bridging the gap between higher education research and policy making was always a challenge but the recent calls for more evidence based policies have opened a window of unprecedented opportunity for researchers to bring more contributions to shaping the future of the European Higher Education Area EHEA Encouraged by the success of the 2011 first edition Romania and Armenia have organised a 2nd edition of the Future of Higher Education Bologna Process Researchers Conference FOHE BPRC in November 2014 with the support of the Italian Presidency of the European Union and as part of the official EHEA agenda Reuniting over 170 researchers from more than 30 countries the event was a forum to debate the trends and challenges faced by higher education today and look at the future of European cooperation in higher education The research volumes offer unique insights regarding the state of affairs of European higher education and research as well as forward looking policy proposals More than 50 articles focus on essential themes in higher education Internationalization of higher education Financing and governance Excellence and the diversification of missions Teaching learning and student engagement Equity and the social dimension of higher education Education research and innovation Quality assurance The impacts of the Bologna Process on the EHEA and beyond and Evidence based policies in higher education The Bologna process was launched at a time of great optimism about the future of the European project to which of course the reform of higher education across the continent has made a major contribution Today for the present that optimism has faded as economic troubles have accumulated in the Euro zone political tensions have been increased on issues such as immigration and armed conflict has broken out in Ukraine There is clearly a risk that against this troubled background the Bologna process itself may falter There are already signs that it has been downgraded in some countries with evidence of political withdrawal All the more reason for the voice of higher education researchers to be heard Since the first conference they have established themselves as powerful stakeholders in the development of the EHEA who are helping to maintain the momentum of the Bologna process Their pivotal role has been strengthened by the second Bucharest conference Peter Scott Institute of Education London General Rapporteur of the FOHE BPRC first edition **Current Problems in Higher Education** ,1980 **Some Policy Issues in Higher Education** Higher Education Policy Group,1974 **Intruding on Academe** Jack R. Van Der Slik,2001 In this fascinating theoretically informed case study of policy making Jack R Van Der Slik demonstrates partisan politics in action in Illinois Specifically he shows how major changes in governing state universities were enacted over the objections of members of the higher education community who preferred to maintain the status quo In 1991 Republican Governor Jim Edgar enthusiastically aided by Lieutenant Governor Bob Kustra began a political effort to decentralize the system of systems which had governed state universities since the 1960s Despite partisan defeat of their plan in 1993 Edgar and Kustra managed to neutralize support for the status quo in the educational community After their 1995 landslide reelection which brought about

Republican majorities in both houses of the legislature Edgar and Kustra were so successful in achieving their goals that they actually had to restrain the legislature's enthusiasm for decentralization the legislature wanted to extend decentralization to community colleges To account for these policy shifts Van Der Slik interviewed twenty five significant players from the executive branch of Illinois government from the legislature and from the educational community Grounding his study theoretically he compared his findings to previous studies in American policy making Jack Kingom's 1984 notion of the crucial role of the policy entrepreneur arguments in 1993 by Frank R Baumgartner and Bryan D Jones that public policies are inherently unstable and that discoverable phenomena can account for policy eruption and research in 1995 by Charles O Jones covering presidential transitions from Kennedy to Reagan In this analysis of political give and take Van Der Slik notes that elected officials proposed a solution to the problems of bureaucratic bloat and unresponsiveness that leaders of the higher education community would not support Political leaders based their actions on bold intuition rather than on a rational consideration of the consequences Given the possibility of change Van Der Slik observes politicians instinctively knew what policies to effect To a remarkable degree the political actions in Illinois fit the theoretical formulations of previous scholarship in national policy making As key participants recount their own actions and their observations then Van Der Slik places what happened in Illinois into a larger context
