Policy Making In A Disorderly World Economy Iui Conference Reports:

Policy Making in a Disorderly World Economy Gunnar Eliasson, 1983 **Policy making in a disorderly world economy** Industrial Institute for economic and social research, Gunnar Eliasson, Mark Sharefkin, Bengt-christer Ysander, 1983

Mainstreams in Industrial Organization H.W. de Jong, William G. Shepherd, 2013-06-29 The present two volumes contain the essays and part of the discussions as presented at the conference on Mainstreams in Industrial Organization held at the University of Amsterdam 21-23 August 1985 The theme was chosen because the field of studies commonly designated industrial organization in the Anglo Saxon countries or market theory in Continental Europe has experienced important alterations during the past decade Partly this reflects changing theoretical views inside the field in which shifts in the core concepts have occurred and different emphasis is laid on time honoured views and results Partly critical views have been voiced from outside the field As in all open scientific debate they have to be weighed and if necessary taken into account Partly also divergent developments in thinking between the Anglo Saxon European and Japanese areas need to be considered because both the problems and the ways of approaching them still differ The variety of views theories and results is testimony to the vitality of this field of economics variety is generated by the creative endeavours from which the chaff is being beaten out by critical discussions That is especially true for the concept of competition itself which industrial organization economists are debating intensively

Routledge Handbook of Evolutionary Economics Kurt Dopfer, Richard R Nelson, Jason Potts, Andreas Pyka, 2023-11-27 While dating from post Classical economists such as Thorstein Veblen and Joseph Schumpeter the inception of the modern field of evolutionary economics is usually dated to the early 1980s Broadly speaking evolutionary economics sees the economy as undergoing continual evolutionary change Evolutionary change indicates that these changes were not planned but rather were the result of innovations and selection processes These often involved winners and losers but most importantly they resulted in actors learning what was and was not working Evolutionary economics in contrast to mainstream economics emphasises the relevance of variables such as technology institutions decision rules routines or consumer preferences for explaining the complex evolutionary changes in the economy In so doing evolutionary economics significantly broadens the scope of economic analysis and sheds new light on key concepts and issues of the discipline This handbook draws on a stellar cast list of international contributors ranging from the founders of the field to the newest voices The volume explores the current state of the art in the field of evolutionary economics at the levels of the micro e.g. firms and households meso e.g. industries and institutions and macro e.g. economic policy structure and growth Overall the Routledge Handbook of Evolutionary Economics provides an excellent overview of current trends and issues in this rapidly developing field

Competition in Europe P. de Wolf, 2012-12-06 Competition in Europe which has been chosen as the title for the Essays in Honour of Henk W de Jong contains two key concepts that characterize his scientific contribution to Industrial Organisation Professor H W de Jong is in the first place an economist

who is highly inspired by the dynamics of markets in general and the dynamics and conditions of competition in particular In the second place H W de Jong is a real European economist not in the sense that his theoretical insights are limited to Europe but in the sense that his ideas and policy suggestions especially those concerning competition policy reflect his sincere involvement in the European integration process and the economic conditions and perspectives of a Common Market for the European Community In his many illustrations of the evolution of markets and the performance of enterprises in different business environments H W de Jong also demonstrates his knowledge of historical and political aspects of different economies in Europe often in comparison with the United States and Japan

Advanced Public Procurement as Industrial Policy Gunnar Eliasson, 2010-03-10 This study is about the macroeconomic effects of positive externalities or industrial spillovers around advanced production The case explored is the technology dividend around Swedish aircraft industry and in particular around the aircraft manufacturer Saab and the major industrial project of the JAS 39 Gripen multirole combat aircraft The project is partly an updating of my book in Swedish Technology 1 Generator or a National Prestige Project from 1995 but extends the analysis in several directions The study includes a chapter on spillovers from advanced production in an industrially developing economy South Africa that has acquired the JAS 39 Gripen for its Air Force There is also a chapter in which the results for Sweden are discussed in the wider context of advanced public procurement in Europe The text has been organized such that the main chapters have been written for academic readers Two supplements include the technical details of data collection mathematical models and calculation methods The first chapter is brief and focused on the results It has the character of an extended executive summary The second chapter summarizes the entire story problems results and methods This project would not have been possible without the generous support of a number of people First of all great thanks go to all those people with crowded calendars in Swedish industrial firms that have set aside time to respond to my questions Most of them have been listed at the end of the book

Firm Objectives, Controls and Organization Gunnar Eliasson, 2012-12-06 The actual organization and use of information systems in American European and Japanese firms are investigated and compared with theoretical conclusions Finally following the experimental evolution of the information products over the past twenty years the results presented indicate that information and communication firms are now starting to offer the kind of business information systems predicted by the analysis The transformation of business information systems technology can be followed in the Chronicle which is provided on diskette and which covers the development of modern IT and telecommunications industries The data are arranged to allow researchers to reconfigure the data according to their own needs

Evolutionary and Neo-Schumpeterian Approaches to Economics Lars Magnusson, 2007-11-23 not gentle to the capitalists Schumpeter 1991 Thus by instead portraying the conflict between entrepreneurial activity and the sociology of the modern state he came quite close to the analysis carried out by Thorstein Veblen some decades earlier who emphasized the conflict between progressive technology and the institutions of a

contemporary predatory dynastic State of early modern times superficially altered by a suffusion of democratic and parliamentary institutions Veblen 1964 p 398 Modern neo Schumpeterian approaches have continued to build on this groundwork provided by their master During recent years there has been a great upsurge of discussion on technology innovations technological regimes etc from the dynamic perspective provided by Schumpeter Dosi 1984 Rosegger 1985 Dosi et al 1988 Thus the search process for temporal extra profits has been stressed and has been used for modelling attempts The wider institutional framework for technological change and innovation activity has also been strongly developed more recently Hence emphasis has grown in the study of technological and industrial regimes path dependency and the network approach developed recently that social relationships structure the opportunities and constraints that face firms and agents that for example carry out innovations Snehota 1990 *Social Innovations, Institutional Change, and Economic Performance* Timo J. Hämmäläinen, 2007-01-01 much needed examination of a neglected issue how societies regions and institutions adjust to our rapidly changing economic world W Brian Arthur Santa Fe Institute New Mexico This is a marvellously rich work of synthesis bringing together a very wide range of theoretical perspectives to make sense of contemporary patterns of economic and social change Its range of reference is remarkable and it is further proof that much of the most interesting theoretical and empirical work today is being done on the boundaries of disciplines Geoff Mulgan Director The Young Foundation **Visible Costs and Invisible Benefits** Gunnar Eliasson, 2017-11-16 This book examines the historic role of professional and demanding military customers in industrial development Particular emphasis is paid to public procurement of military equipment as a catalyst for innovation and the civilian commercialization of military technologies from gunpowder and cannons to submarines missiles and aircraft is documented by many case illustrations that show how macro level productivity advance has been generated A complementary volume to *Advancing Public Procurement as Industrial Policy* 2010 which focused on the spillover effects of the Swedish combat aircraft Gripen in this book Gunnar Eliasson widens the perspective to cover product development across the Swedish defense industry with an emphasis on regional economic development and macro economics inter alia through the involvement of Saab aircraft and Kockums submarines in partnership ventures in Australia Norway and Brazil The volume is organized into four parts Part one examines the historical transformation of the Swedish economy over the past three centuries from agriculture and raw materials to an advanced industrial economy Part two presents detailed case studies to illustrate the spillover effects of procurement projects and military industrial partnerships Part three explains the spillover phenomenon theoretically within a dynamic micro to macro economic perspective Particular emphasis is placed on the empirical credibility of model based economy wide and dynamic cost benefit calculations The book concludes with a section on fostering industrial development through public procurement The result is a book that will appeal to economists in the industrial economics and management fields to technical marketing and purchasing executives in business and to policy makers in public procurement concerned

with innovation and long run industrial development Foundations of Economic Change Andreas Pyka, Uwe Cantner, 2017-11-15 The book illustrates the considerable advances in modern evolutionary economics and addresses core questions of economic behaviour interaction of heterogeneous actors in uncertain environments and the possibility of aggregating observations on a macro economic level It presents the foundations of economic change as the major building blocks of an economic approach that focusses on complex processes driven by endogenous innovation as well as crisis The theoretical considerations are complemented by econometric studies to demonstrate the relevance of evolutionary economic thinking to improve our understanding of the most challenging issues related to economic growth and development An Energy Policy Simulation Model of the Norwegian Economy Sverre Christian Munck, 1983 *Mainstreams in Industrial Organization: Theory and international aspects* H. W. de Jong, William G. Shepherd, 1986 *Economic Growth in a Nordic Perspective* Økonomiske råd (Denmark). Sekretariatet, 1984 Index of Conference Proceedings Received British Library.
