Policy Exploration Through Microanalytic Simulation:

Policy Exploration Through Microanalytic Simulation Guy H. Orcutt, Steven Caldwell, Richard F. Wertheimer, 1976

Microsimulation Modelling of the Corporate Firm Frank W. van Tongeren, 2013-03-09 My interest in microsimulation started to develop when I was exposed to the works of Guy Orcutt and his associates on microsimulation of households in the USA and those of Gunnar Eliasson and his associates on simulation of Swedish firms Their approaches promised the exciting possibility to represent an entire economic system by simulating the behaviour of individual microeconomic units on a computer The construction of a large scale microsimulation model seemed to be a worthwhile adventure which could yield much more detailed results than existing models It was also evident that microsimulation of firms is a relatively underdeveloped area in spite of the large number of operational microsimulation models of households in the USA and Europe Developing the computer implementation has been an integral part of the research Translating initially vague ideas into mathematical formulae and subsequently into a structured computer language provides a testing ground for consistency of ideas When writing this book I have purposefully abstained from describing the computer program and dedicated solution algorithms The reason is that the book is primarily directed towards readers interested in economics and therefore uses the language of economics and not that of computer science The simulation model has been programmed for the personal computer in Turbo Pascal Sophisticated memory management techniques have lifted constraints on the number of firms which can be simulated on the PC

Practical Microsimulation Modelling Cathal O'Donoghue, 2021 This book brings together a description and examples of the main methods used in microsimulation modelling used in the field of income distribution analysis It is structured to develop and use the different types of models used in the field with a focus on household targeted policy

Small Area Estimation and Microsimulation Modeling Azizur Rahman, Ann Harding, 2016-11-30 Small Area Estimation and Microsimulation Modeling is the first practical handbook that comprehensively presents modern statistical SAE methods in the framework of ultramodern spatial microsimulation modeling while providing the novel approach of creating synthetic spatial microdata Along with describing the necessary theories and their advantages and limitations the authors illustrate the practical application of the techniques to a large number of substantive problems including how to build up models organize and link data create synthetic microdata conduct analyses yield informative tables and graphs and evaluate how the findings effectively support the decision making processes in government and non government organizations Features Covers both theoretical and applied aspects for real world comparative research and regional statistics production Thoroughly explains how microsimulation modeling technology can be constructed using available datasets for reliable small area statistics Provides SAS codes that allow readers to utilize these latest technologies in their own work This book is designed for advanced graduate students academics professionals and applied practitioners who are generally interested in small area estimation and or microsimulation modeling and dealing with vital issues in social

and behavioural sciences applied economics and policy analysis government and or social statistics health sciences business psychology environmental and agriculture modeling computational statistics and data simulation spatial statistics transport and urban planning and geospatial modeling Dr Azizur Rahman is a Senior Lecturer in Statistics and convenor of the Graduate Program in Applied Statistics at the Charles Sturt University and an Adjunct Associate Professor of Public Health and Biostatistics at the University of Canberra His research encompasses small area estimation applied economics microsimulation modeling Bayesian inference and public health He has more than 60 scholarly publications including two books Dr Rahman s research is funded by the Australian Federal and State Governments and he serves on a range of editorial boards including the International Journal of Microsimulation IJM Professor Ann Harding AO is an Emeritus Professor of Applied Economics and Social Policy at the National Centre for Social and Economic Modelling NATSEM of the University of Canberra She was the founder and inaugural Director of this world class Research Centre for more than sixteen years and also a co founder of the International Microsimulation Association IMA and served as the inaugural elected president of IMA from 2004 to 2011 She is a fellow of the Academy of the Social Sciences in Australia She has more than 300 publications including several books in microsimulation modeling

Improving Information for Social Policy Decisions -- The Uses of Microsimulation Modeling Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Panel to Evaluate Microsimulation Models for Social Welfare Programs, National Research Council, 1991-02-01 This volume second in the series provides essential background material for policy analysts researchers statisticians and others interested in the application of microsimulation techniques to develop estimates of the costs and population impacts of proposed changes in government policies ranging from welfare to retirement income to health care to taxes The material spans data inputs to models design and computer implementation of models validation of model outputs and model documentation

Complex Systems in Finance and Econometrics Robert A. Meyers, 2010-11-03 Finance Econometrics and System Dynamics presents an overview of the concepts and tools for analyzing complex systems in a wide range of fields The text integrates complexity with deterministic equations and concepts from real world examples and appeals to a broad audience

Complexity and Planning Gert de Roo, Jean Hillier, 2016-05-23 Complexity complex systems and complexity theories are becoming increasingly important within a variety disciplines While these issues are less well known within the discipline of spatial planning there has been a recent growing awareness and interest As planners grapple with how to consider the vagaries of the real world when putting together proposals for future development they question how complexity complex systems and complexity theories might prove useful with regard to spatial planning and the physical environment This book provides a readable overview presenting and relating a range of understandings and characteristics of complexity and complex systems as they are relevant to planning It recognizes multiple relational approaches of dynamic complexity which enhance understandings of and facilitate working with contingencies of place time

and the various participants behaviours In doing so it should contribute to a better understanding of processes with regard to our physical and social worlds *Methods of Interregional and Regional Analysis* Walter Isard,Iwan J. Azis,Matthew P.

Drennan,Ronald E. Miller,Sidney Saltzman,Erik Thorbecke,2017-07-05 This landmark textbook introduces students to the principles of regional science and focuses on the key methods used in regional analysis including regional and interregional input output analysis econometrics regional and spatial programming and industrial and urban complex analysis gravity and spatial interaction models SAM and social accounting welfare analysis and applied general interregional equilibrium models The coherent development of the materials contained in the set of chapters provides students with a comprehensive background and understanding of how to investigate key regional problems For the research scholar this publication constitutes an up to date source book of the basic elements of each major regional science technique More significant it points to new directions for future research and ways interregional and regional analytic approaches can be fused to realise much more probing attacks on regional and spatial problems a contribution far beyond what is available in the literature

Journal of Human Services Abstracts ,1977 *Urban-Rural Interactions* Eveline van Leeuwen,2010-03-10 Modern Europe has rural roots Even today as much as 90 per cent of Europe EU25 consists of rural areas in which half of the population lives While different rural areas often face different challenges the shift from agricultural production towards a multifunctional landscape and the increasing value assigned to environmental values affect all rural areas The ambition to develop a more diversified rural economy as well as the bottom up approach and local focus of many rural policies require a clear knowledge of the current socio economic function of towns and town hinterland linkages Therefore the aim of this study is to contribute to the understanding of the current function of towns in Europe in general and in the Netherlands more specifically By using both micro and macro approaches the multifaceted relationships between town hinterland and the rural economy are explored at different spatial levels and for different actors in particular for households farms and firms The Possibility of Politics Stein Ringen,2017-09-04 The Possibility of Politics explores the power of political reform specifically reform of the modern welfare state Can reform be effective if limited to cautious and piecemeal interventions that avoid radicalism and revolution Can it also avoid unwanted consequences Will the welfare state survive in the future Stein Ringen views the welfare state as a large scale experiment in political reform To ask if the welfare state works is to ask if political reform is possible at all By its nature the welfare state is reform on a grand scale for it attempts to change the circumstances individuals and families live under without changing and disrupting society itself But is it realistic to believe a population can get together set goals and then try to meet these goals through collective actions specifically public policies without causing unintended consequences and destroying the state in the process The welfare state attempts idealistically to redistribute welfare without reshaping the economic processes that cause inequities in the first place Ringen considers how well redistribution has met the test in terms of political legitimacy its intended effects on poverty and inequality as well as its

undesired and unintended effects on economic efficiency and the quality of private life Ultimately does the welfare state work Further is the welfare state a good thing In considering these questions The Possibility of Politics should be of particular value to academics and advanced students interested in political theory public economics social administration and political sociology Stein Ringen is professor of sociology and social policy at Oxford University and a Fellow of Green College He teaches social and political theory and research methodology for graduates in social policy sociology politics economic and social history and other subjects Evidence-Based Policy Making in the Social Sciences Stoker, Gerry, Evans,

Mark, 2016-09-29 This book gathers an expert group of social scientists to showcase emerging forms of analysis and evaluation for public policy analysis Each chapter highlights a different method or approach putting it in context and highlighting its key features before illustrating its application and potential value to policy makers Aimed at upper level undergraduates in public policy and social work it also has much to offer policy makers and practitioners themselves

Prolonged Connections Steven Ruggles, 1987 **Proceedings**, 1985 **A Subtle Balance** Edward A. Parson, 2015-06-15 A Subtle Balance critically reflects on major trends and enduring challenges over the last four decades of public policy and governance During this time a tension has existed between two aims for public decisions that they be based on the best available evidence and analysis and that they be fully democratic This period has seen a continuing drive for more direct citizen engagement in decision making and governments trying to address major policy issues through novel consultative and collaborative processes In essays that offer detailed and novel insights into the recent history of specific issues in social policy environmental policy and processes of policy advice and decision making contributors elaborate on how these trends have played out in diverse areas of practice what their consequences have been and how specific institutional reforms could reset the requisite balance between expertise evidence and democracy in Canadian public policy Inspired by the wide ranging contributions to scholarship and practice of A R Rod Dobell A Subtle Balance draws on the influences of distinguished scholars and sophisticated practitioners of public policy to assess recent changes in governance Contributors include Martin Bunton Barry Carin Ian Clark Rachel Culley Rod Dobell Lia Ernst Jill Horwitz John Langford Justin Longo Michael Prince Harry Swain Charles Ungerleider Josee van Eijndhoven Michael Wolfson and David Zussman **Systems Approaches and Their Application** Mats-Olov Olsson, Gunnar Sjöstedt, 2006-01-16 This book describes the application of systems thinking across a broad field of cases representing research teaching decision support and construction All cases are presented by experts who have actually been involved in the activities they describe The broad selection of cases captures the great variation of systems thinking and how it is integrated into models and theories and solid knowledge pertaining to different substantive areas **Forecasting Urban Travel** David E. Boyce, Huw C.W.L. Williams, 2015-02-27 Forecasting Urban Travel presents in a non mathematical way the evolution of methods models and theories underpinning travel forecasts and policy analysis from the early urban transportation studies of the 1950s to current applications throughout the
