,1993 **The Origins of Scottish Nationhood** Neil Davidson, 2000-04-20 The traditional view of the Scottish nation holds that it first arose during the Wars of Independence from England in the thirteenth and fourteenth centuries Although Scotland was absorbed into Britain in 1707 with the Treaty of Union Scottish identity is supposed to have remained alive in the new state through separate institutions of religion the Church of Scotland education and the legal system Neil Davidson argues otherwise The Scottish nation did not exist before 1707 The Scottish national consciousness we know today was not preserved by institutions carried over from the pre Union period but arose after and as a result of the Union for only then were the material obstacles to nationhood most importantly the Highland Lowland divide overcome This Scottish nation was constructed simultaneously with and as part of the British nation and the eighteenth century Scottish bourgeoisie were at the forefront of constructing both The majority of Scots entered the Industrial Revolution with a dual national consciousness but only one nationalism which was British The Scottish nationalism which arose in Scotland during the twentieth century is therefore not a revival of a pre Union nationalism after 300 years but an entirely new formation Davidson provides a revisionist history of the origins of Scottish and British national consciousness that sheds light on many of the contemporary

**YET ANOTHER TURN** The thing that doesn't fit is the thing that's most interesting Richard Feynman This volume was originally conceived as a contribution to yet another turn not captured by one of the many adjectives that have served to describe the collective meandering of the scholarly community in search of direction It was meant to mark the millennial turn a seemingly purely chronological event but one in search for great meanings and invested with loaded significances The editors wanted to seize the opportunity of the moment in order to pause and reflect on the sociology and history of social studies of science and technology The moment came and went and the new millennium barely nine months later thrust its historical marker upon the world through a horrendous and cruel shock in an unforeseen and unforeseeable way Since then the world appears more vulnerable and volatile fragmented and fraught with uncertainty The universal values as bequeathed by the Enlightenment are either refused or appear refuted The dream of a universal civilization which has accompanied the unfolding of the existing multiple modernities in their historically unique trajectories has been discarded and its promises in tatters

**Jihadism Transformed** Simon Staffell,Akil Awan,2016-12-01 Jihadist narratives have evolved dramatically over the past five years driven by momentous events in the Middle East and beyond the death of bin Laden the rise and ultimate failure of the Arab Spring and most notably the rise of the so called Islamic State For many years al Qaeda pointed to an aspirational future Caliphate as their utopian end goal one which allowed them to justify their violent

excesses in the here and now Islamic State turned that aspiration into a dystopic reality and in the process hijacked the jihadist narrative breathing new life into the global Salafi Jihadi movement Despite air strikes from above and local disillusionment from below the new caliphate has stubbornly persisted and has been at the heart of ISIS s growing global appeal This timely collection of essays examines how jihadist narratives have changed globally adapting to these turbulent circumstances Area and thematic specialists consider transitions inside the Middle East and North Africa as well as in South Asia sub Saharan Africa and Europe As these analyses demonstrate the success of the ISIS narrative has been as much about resonance with local contexts as it has been about the appeal of the global idea of a tangible and realised caliphate
