Harold D. Lasswell: An Annotated Bibliography Rodney Muth, Mary M. Finley, Marcia F. Muth, 1990-07-31 *Policy Sciences and the Human Dignity Gap* Susan G. Clark, Evan J. Andrews, Ana E. Lambert, 2024-06-19 This book presents a comprehensive and actionable framework for individuals and leaders seeking to promote human dignity within healthy environments Rooted in the policy sciences approach it equips readers with the essential concepts tools and skills necessary to address indignity and unhealthy conditions collectively Despite international commitments and domestic laws advocating for human dignity a glaring human dignity gap persists in numerous regions and problem contexts This book sheds light on this disparity examining its manifestations in global environmental change development efforts water insecurity wildfires human wildlife conflict access to public health and much more While existing scholarship often focuses on legal rights the authors emphasize untapped opportunities for everyday citizens and leaders to foster human dignity within their communities and beyond By offering fresh perspectives practical concepts and exercises this book empowers readers to bridge the performance gap ultimately enabling the realization of human dignity from the grassroots level It provides innovative strategies and frameworks to address this pressing global issue making it an invaluable resource for scholars policymakers and concerned citizens alike

Science for Governing Japan's Population Aya Homei, 2022-11-17 A major new study tracing historical roots of the interplay between policy population and science in Japan from the 1860s 1950s

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *The Politics of Migration in Indonesia and Beyond* Riwanto Tirtosudarmo, 2019-01-22 This book examines the social and political dimensions of migration from a perspective between the realms of demography and politics It approaches the issue of migration by highlighting the important power relations that have previously been neglected in studies in the area The book starts by investigating Indonesian migration to provide an understanding of internal migration It then looks beyond its national borders for a wider understanding of Asia and showcases several case studies both in Indonesia and beyond to illustrate the intricate politics of migration Further it considers the politics of migration from the sending country perspective and unravels the link between migration and security The book provides reviews of the wider literature relating to population mobility and distribution and shows readers how to adopt a new perspective in the study of movement of people an issue that is becoming increasingly important as movement of people unfolds globally in terms of both volume and direction This book is a valuable resource for students academics and researchers in the area of demography and social politics especially those interested in migration and refugees It also offers insights for those interested in understanding decentralization in greater depth

Science and Ideology in the Policy Sciences Paul Diesing, 2017-07-05 The purpose of this book is to examine how ideology operates in the sense of influencing the conduct of inquiry in the policy sciences defined as economics political science and sociology The author seeks to identify the main ideologies and show how each ideology produces a preference

for certain problems methods and hypotheses how it sensitizes scientists to certain phenomena and suggests certain interpretations of those phenomena and how it closes off other phenomena and concepts from investigation and testing or at least distorts that investigation In this book Diesing critically examines all the major schools of policy related social thought from 1930 to 1975 He deals with Neoclassical Economics and its various applications the Keynesians the Systems Approach the Schumpeter perspective the Critical Intellectuals the Pluralists the J K Galbraith School New Left Marxism and the Ecological Paradigm of Schumacher and others The world looks different if your perspective is that of a rational small businessman working in a society of hypothetical perfect competition as opposed to that of a proletarian looking up at your oppressors Part One is descriptive and evaluative considering each ideology in turn Part Two considers the policy implications In 1982 Diesing published a remarkable book entitled *Science and Ideology in the Policy Sciences* When I interviewed Diesing in Buffalo in the summer of 1984 he told me that to date the publication had been reviewed in only two professional journals I was astounded *Science Ideology* was the best book I had read in a decade and it related directly to all the policy sciences The lack of professional response may partially reflect Diesing's disinterest in self promotion but beyond this is the community problem Scholars are recognized within disciplines but there is only a tiny community of social science I consider this to be the most brilliant of Diesing's books Like all of Diesing's works it remains highly relevant today from the introduction by Richard Hartwig

Water Policy Science and Politics M. Dinesh Kumar, 2018-03-07 *Water Policy Science and Politics An Indian Perspective* presents the importance of politics and science working together in policymaking in the water sector Many countries around the developed and developing world including India are experiencing major water scarcity problems that will undoubtedly increase with the impacts of climate change This book discusses specific topics in India's water agriculture and energy sectors focusing on scientific aspects academic and political discourse and policy issues The author presents cases from the interrelated sectors of water resources supplies sanitation and energy and climate including controversial topics that illustrate how science and politics can work together Challenges the linear and conventional approaches to water management and water policymaking in India that are also applicable in developing countries across South Asia and Sub Saharan Africa Presents best practice ideas and methods that help science and politics work together Highlights a key gap of communication between science and policy in water research with solutions on how this can be addressed

Population in the Human Sciences Philip Kreager, Bruce Winney, Stanley Ulijaszek, Cristian Capelli, 2015-03-05 The Human Sciences address problems in nature and society that often require coordinated approaches of several scientific disciplines and scholarly research embracing the social and biological sciences and history When we wish for example to understand how some sub populations and not others come to be vulnerable why a disease spreads in one part of a population and not another or which gene variants are transmitted across generations then a remarkable range of disciplinary perspectives need to be brought together from the study of institutional structures cultural boundaries and social

networks down to the micro biology of cellular pathways and gene expression The need to explain and address differential impacts of pressing contemporary issues like AIDS ageing social and economic inequalities and environmental change are well known cases in point Population concepts models and evidence lie at the core of approaches to all of these problems if only because accurate differentiation and identification of groups their structures constituents and relations between sub populations are necessary to specify their nature and extent The study of population thus draws both on statistical methodologies of demography and population genetics and sustained observation of the ways in which populations and sub populations are formed maintained or broken up in nature in the laboratory and in society In an era in which research needs to operate on multiple levels population thinking thus provides a common ground for communication and critical thought across disciplines Population in the Human Sciences addresses the need for review and assessment of the framework of interdisciplinary population studies Limitations to prevailing postwar paradigms like the Evolutionary Synthesis and Demographic Transition were becoming evident by the 1970s Subsequent decades have witnessed an immense expansion of population modelling and related empirical inquiry with new genetic developments that have reshaped evolutionary population and developmental biology The rise of anthropological and historical demography and social network analysis are playing major roles in rethinking modern and earlier population history More recently the emergence of sub disciplines like biodemography and evolutionary anthropology and growing links between evolutionary and developmental biology indicate a growing convergence of biological and social approaches to population *Resources in Education* ,1990-07
