Cynk, *Military Air Power in Europe Preparing for War* Norman Ridley, 2023-01-24 The First World War had seen the mechanization of warfare Battle fronts had become immobilized in the grip of machine guns and heavy artillery leading to slaughter on an unprecedented scale The end of the war saw exhausted governments extricating themselves from the carnage but some leaders were concerned that sooner or later another major war would follow As France s Marshal Foch put it the Treaty of Versailles was only a twenty year truce The overriding concern was to find ways in future of avoiding the kind of static battle fronts that had consumed so many in such futile efforts Military aviation was seen as the one great innovation that had the potential to do this by revolutionizing warfare It would not only augment the effectiveness of ground forces in a tactical role but it also had the means of reaching out strategically beyond the battlefronts to strike at the enemy s trade supplies communications and industrial production All through the war military aviation had been firmly under the control of army commanders but there was soon a fierce debate over the way it should develop The development of an air doctrine within each of the major European powers was fraught with difficulty as the nascent air arms struggled with varying degrees of success to free themselves from army control to find a new independent identity This book examines the way in which these air arms competed for prominence within the military structures of six major European nations Germany Britain France Soviet Union Poland and Italy with different resources ambitions and philosophies in the years from the beginning of aviation right up to the start of the Second World War

Vichy Air Force at War Jonathan Sutherland, Diane Canwell, 2011-01-01 At the beginning of World War II the French faced the German invasion with 4 360 modern combat aircraft and 790 new machines currently arriving from French and American factories each month When the phony war finally ended some 119 of 210 squadrons were ready for action on the north eastern front The others were reequipping or stationed in the French colonies Of the 119 squadrons France could bring into action only one fourth of the aircraft were battle ready With France overrun by June 1940 what remained of the French air force was either concentrated in the unoccupied zone or had been hastily redeployed to the colonies Nonetheless in retaliation for the British attack on the French fleet in Oran French bombers based in French Morocco carried out retaliatory air raids over Gibraltar The Armee de l Air de Vichy was born and would fight to the best of its ability against the Free French s allies in theatres as distant as north west Africa Syria Lebanon Madagascar and the Far East Not only would they take to the skies against the British and later the Americans they would also willingly take part in aerial duels against Free

French pilots Only a handful of books have been written on French aircraft but never has there been a complete history of the operations of the Vichy Air Force and its fratricidal war This title literally spans the globe examining forgotten air combats It is also important to note that many of the Vichy pilots that survived the air combats later volunteered to join the Free French and would fight with great courage and distinction alongside the very pilots that they had been trying to kill
