Polish Psychological Verbs At The Lexicon-syntax Interface In Crosslinguistic Perspective:

Polish Psychological Verbs at the Lexicon-syntax Interface in Cross-linguistic Perspective Adam Biały, 2005 This book is a comparative study of Polish psychological verbs The analysis concentrates on the lexicon syntax interface of psych verbs and constitutes an argument in favour of its strong dependence on event structure The aim of this study is to show that the class of Polish psych verbs as in many other languages is not uniform The analysed subclasses are differentiated on the basis of their causation and stativity The marriage of those semantic traits and their structural representation is possible only if it is performed via event structure configuration a layer which appears to underlie the conceptualisation of events Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen ,2005
