Political Action Mass Participation In Five Western Democracies:

Political Action Samuel Henry Barnes, Max Kaase, 1979 Offers a study of conventional and unconventional political behaviour in five developed nations Drawing on survey data from Britain Holland West Germany the United States and Austria this work seeks to explain the waves of political protest that swept through the advanced industrial democracies in the late 1960s Political Action Samuel Henry Barnes, 1979 *The Unchanging American Voter* Eric R. A. N. Smith, 1989-10-04 One of the most elegant pieces of political analysis I have seen in years It challenges a generation of research on levels of conceptualization and supposed change in the nature of the electorate and it does so clearly thoroughly and convincingly A truly superior work Gary Jacobson University of California San Diego This book is technically sophisticated clearly written and it makes an important point It will have a significant impact on students of public opinion and voting Henry Brady University of Chicago **Canadian Democracy from the Ground Up** Elisabeth Gidengil, 2014-01-01 Canada is often held up as an example of a healthy democracy However the Canadian public is less enthusiastic about the way our democracy works This first of a kind book approaches the democratic deficit from the perspective of everyday Canadians and assesses the performance of Parliament and the media in light of their perceptions and expectations In doing so a number of chapters highlight the disjuncture between perceptions and performance Canadian Democracy from the Ground Up is essential for anyone who would like to learn how to build a better democracy one that meets the expectations of the Canadian public Citizenship and Involvement in European Democracies Jan W. Van Deth, José Ramón Montero, Anders Westholm, 2007-02-12 This is an examination of the results of a cross national analysis of citizenship and participation among citizens in 12 European democracies The book investigates the relationships between social and political involvement and between small scale and large scale democracies **Popular Contention, Regime, and Transition** Eitan Y. Alimi, Avraham Sela, Mario Sznajder, 2016-07-11 Although episodes of resistance and contention in authoritarian and authoritarian like regimes constitute the majority of mass political movements worldwide the theories and models of popular contention have been developed on liberal democratic assumptions Prompted by the recent revolutionary waves in the Middle East and North Africa Popular Contention Regime and Transition offers a deeper understanding of the complex and indeterminate linkages between popular protest regime type and transitions in democratic and authoritarian regimes alike Through a diverse array of case studies from countries around the world this volume places the Arab Spring uprisings in comparative perspective demonstrating the similarities and parallels between contentious events in democratic and authoritarian like regimes Leading scholars in the fields of political science sociology and international studies discuss topics such as the set of initial conditions involved in the protest prospects of contention and forms of protest as well as the role of historical legacies regime responses the military social polarization and external factors in the divergent outcomes of protest By situating the study of contention in authoritarian and semi authoritarian regimes in comparative perspective

Popular Contention Regime and Transition generates powerful insights into the impetus dynamics and consequences of contention in all contexts

Green Parties in National Governments Ferdinand Muller-Rommel, Thomas Poguntke, 2013-11-05 By the late 1990s Green parties had entered national governments in five Western European countries Finland Italy Germany France and Belgium This book aims to provide an understanding of the differences and similarities of Green parties in coalition governments

The European Voter Jacques Thomassen, 2005-07-28 This book provides a systematic comparative analysis of how and why voting behaviour has changed in Europe in recent decades It has been widely argued that radical changes have occurred in the how and why of voting behaviour in Europe as a result of changes in the structure of society most notably the rise in material affluence and educational attainment and the decline in religious observance and the size of the working class But most tests of this proposition have been undertaken on single countries This book however systematically tests the validity of this proposition across various European countries The argument that social

change has altered voting behaviour has been increasingly challenged on the grounds that it takes too little account of changes in the choices that are put before voters by the parties such as the promises and proposals that are put forward at election time This book therefore also assesses the relative explanatory power of claims that voting behaviour has changed because of changes in society against claims that it responds to changes in the offerings of political parties And it is clear from the analyses reported in this book that contrary to the claims of much of the extant literature the latter argument appears better able to account for many of the patterns and changes in European voting behaviour and thus the book constitutes an important challenge to much current academic orthodoxy This is the first book to provide a systematic comparison of the long term dynamics of the voting behaviour of individual voters across such a wide range of European countries taking into account the dynamics of the choices put before voters by the parties and for the first time relating this to the way voters behave Comparative Politics is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics The General Editors are Max Kaase Professor of Political Science Vice President and Dean School of Humanities and Social Science International University Bremen and Kenneth Newton Professor of Comparative Politics University of Southampton The series is published in association with the European Consortium for Political Research

Baun, 2016-09-16 This work is a cross national examination of the relationship between political culture and constitutionalism The countries studied include Nigeria Turkey and Japan Questions explored include whether constitutions must evolve and whether constitutionalism is only a western concept

The Presidentialization of Politics Thomas Poguntke, Paul Webb, 2007-04-27 The Presidentialization of Politics shows that the politics of democratic societies is moving towards a presidentialized working mode even in the absence of formal institutional changes These developments can be explained by a combination of long term structural changes in modern politics and societies contingent factors which fluctuate over time While these contingent short term factors relate to the personalities of office holders the overall political agenda and the majority situation in parliament there are several structural factors which are relatively uniform across modern nations First the internationalization of modern politics which is particularly pronounced within the European Union has led to an executive bias of the political process which has strengthened the role of political top elites vis vis their parliamentary groups and or their parties Their predominance has been amplified further by the vastly expanded steering capacities of state machineries which have severely reduced the scope of effective parliamentary control At the same time the declining stability of political alignments has increased the proportion of citizens whose voting decisions are not constrained by long standing party loyalties In conjunction with the mediatization of politics this has increased the capacity of political leaders to by pass their party machines and to appeal directly to voters As a result three interrelated processes have led to a political process increasingly moulded by the inherent logic of presidentialism increasing leadership power and

autonomy within the political executive increasing leadership power and autonomy within political parties and increasingly leadership centred electoral processes The book presents evidence for this process of presidentialization for 14 modern democracies including the US and Canada While there are substantial cross national differences the overall thesis holds modern democracies are increasingly following a presidential logic of governance through which leadership is becoming more central and more powerful but also increasingly dependent on successful immediate appeal to the mass public Implications for democratic theory are considered *Human Rights Responsibilities in the Digital Age* Jonathan Andrew,Frédéric Bernard,2021-08-26

This book examines the tangled responsibilities of states companies and individuals surrounding human rights in the digital age Digital technologies have a huge impact for better and worse on human lives while they can clearly enhance some human rights they also facilitate a wide range of violations States are expected to implement efficient measures against powerful private companies but at the same time they are drawn to technologies that extend their own control over citizens Tech companies are increasingly asked to prevent violations committed online by their users yet many of their business models depend on the accumulation and exploitation of users personal data While civil society has a crucial part to play in upholding human rights it is also the case that individuals harm other individuals online All three stakeholders need to ensure that technology does not provoke the disintegration of human rights Bringing together experts from a range of disciplines including law international relations and journalism this book provides a detailed analysis of the impact of digital technologies on human rights which will be of interest to academics research students and professionals concerned by this issue Comparing Pluralist Democracies Mattei Dogan,2019-03-06

Comparative Environmental Politics Paul F. Steinberg,Stacy D. Vandever,2012-02-17 Combining the theoretical tools of comparative politics with the substantive concerns of environmental policy experts explore responses to environmental problems across nations and political systems How do different societies respond politically to environmental

problems around the globe Answering this question requires systematic cross national comparisons of political institutions regulatory styles and state society relations The field of comparative environmental politics approaches this task by bringing the theoretical tools of comparative politics to bear on the substantive concerns of environmental policy This book outlines a comparative environmental politics framework and applies it to concrete real world problems of politics and environmental management After a comprehensive review of the literature exploring domestic environmental politics around the world the book provides a sample of major currents within the field showing how environmental politics intersects with such topics as the greening of the state the rise of social movements and green parties European Union expansion corporate social responsibility federalism political instability management of local commons and policymaking under democratic and authoritarian regimes It offers fresh insights into environmental problems ranging from climate change to water scarcity and the disappearance of tropical forests and it examines actions by state and nonstate actors at levels from the local to the continental The book will help scholars and policymakers make sense of how environmental issues and politics are connected around the globe and is ideal for use in upper level undergraduate and graduate courses
