Political Campaigning Stanley Kelley, 1960 Negative Campaigning Richard R. Lau, Gerald M. Pomper, 2004 Negative campaigning is frequently denounced but it is not well understood Who conducts negative campaigns Do they work What is their effect on voter turnout and attitudes toward government Just in time for an assessment of election 2004 two distinguished political scientists bring us a sophisticated analysis of negative campaigns for the Senate from 1992 to 2002 The results of their study are surprising and challenge conventional wisdom negative campaigning has dominated relatively few elections over the past dozen years there is little evidence that it has had a deleterious effect on our political system and it is not a particularly effective campaign strategy These analyses bring novel empirical techniques to the study of basic normative questions of democratic theory and practice

Presidential Campaigns and Presidential Accountability Michele P. Claibourn, 2011-02-01 In investigating the presidential campaigns and early administrations of Barack Obama George W Bush and Bill Clinton *Presidential Campaigns and Presidential Accountability* shows how campaign promises are realized in government once the victor is established in the Oval Office To measure correlations between presidential campaigns and policy making Michele P Claibourn closely examines detailed campaign advertising information survey data about citizen s responses to campaigns processes that create expectations among constituents and media attention and response to candidates Disputing the notion that presidents ignore campaign issues upon being elected *Presidential Campaigns and Presidential Accountability* contends that candidates raise issues that matter and develop ideas to address these issues based on voter reactions Conventional disappointment in presidential campaigns stems from a misunderstanding of the role that presidents play in a system of separate institutions sharing power and Claibourn forces us to think about presidential campaigns in the context of the presidency what the president realistically can and cannot do Based on comparisons of the Clinton Bush and Obama campaigns and the first years of the subsequent presidential administrations Claibourn builds a

generalized theory of agenda accountability showing how presidential action is constrained by campaign agendas

Campaigns and Elections Stephen K. Medvic, 2021-11-29 Stephen K Medvic's *Campaigns and Elections* is a comprehensive yet compact core text that addresses two distinct but related aspects of American electoral democracy: the processes that constitute campaigns and elections and the players who are involved. In addition to balanced coverage of process and actors, it gives equal billing to both campaigns and elections and covers contests for legislative and executive positions at the national, state, and local levels, including issue-oriented campaigns of note. The book opens by providing students with the conceptual distinctions between what happens in an election and the campaigning that precedes it. Significant attention is devoted to setting up the context for these campaigns and elections by covering the rules of the game in the American electoral system as well as aspects of election administration and the funding of elections. Then the book systematically covers the actors at every level: candidates and their organizations, parties, interest groups, the media, and voters, and the macro-level aspects of campaigns such as campaign strategy and determinants of election outcomes. The book concludes with a big picture assessment of campaign ethics and implications of the permanent campaign. New to the Fourth Edition: Fully updated through the 2020 elections, looking ahead to the 2022 midterms. Covers the impact of the COVID-19 pandemic on the 2020 election as well as the January 6, 2021 insurrection at the US Capitol. Adds new sections in Chapter 3 on election integrity and the assessment of election administration. Reviews recent Supreme Court cases on gerrymandering and faithless electors. Expands coverage of social media as a source of news of the increasingly partisan nature of the media and of the role of media fact checking in campaigns and elections. Reorganizes the chapters on the various actors so that the chapter on candidates leads directly to the chapter on campaigns. Fully updates the resources listed at the end of each chapter.

Political Communications Simon Atkinson, John Bartle, Roger Mortimore, 2013-10-23 This work examines political communications in British general elections. Like its predecessors, it has a dual purpose: first to make available the reflections of those who participated in it, and second to provide analysis of the media, the parties, and public opinion polls in the campaign.

Political Representation and Elections in Britain (Routledge Library Editions: Political Science Volume 12) Peter Pulzer, 2013-04-15 Originally published in 1972, this edition includes expanded sections on class and voting and elites and participation in modern democracy. Many popular misconceptions about the militancy of party activists, the relations between MPs and constituents, the role of TV, and the fairness of the electoral system are critically examined. Equally important is the review of representational theories from Greek to Victorian in the light of what we know today about the workings of Parliament, the role of pressure groups, and the mixture of rational and irrational motives in human behaviour. A range of twentieth-century critiques, including those of Robert Michels, Joseph Schumpeter, Robert Dahl, and Peter Bachrach, is presented. Wherever possible, British experience is compared with that of the USA, continental Europe, or the Commonwealth.

Campaign Reform Larry M. Bartels, Lynn Vavreck, 2010-08-04 What is wrong with American

political campaigns How could the campaign process be improved This volume brings the expertise of leading political scientists to the public debate about campaign reform These scholars probe the reality behind the conventional wisdom that nasty vacuous campaigns dominated by big money and cynical media coverage are perverting our political process and alienating our citizenry Some of their conclusions will be startling to campaigners and critics alike For example attack advertisements prove to be no more effective than self promotional advertisements but are more substantive Indeed candidates in their advertisements and speeches focus more on policy and less on strategy and process than any major news outlet including the New York Times The volume suggests that as a result prospective voters in 1996 knew more about the candidates issue positions than in any presidential election in decades yet turnout and public faith in the electoral process continued to decline For aspiring reformers Bartels and his colleagues provide a bracing reality check For students and scholars of electoral politics political communication and voting behavior they provide an authoritative summary and interpretation of what we know about the nature and impact of political campaigns The insights and evidence contained in this volume should be of interest to anyone concerned about the present state and future prospects of American electoral process Larry M Bartels is Professor of Politics and Public Affairs and Stuart Professor of Communications and Public Affairs in the Woodrow Wilson School Princeton University Lynn Vavreck is Assistant Professor of Government Dartmouth College Other contributors are Bruce Buchanan Tami Buhr Ann Crigler John G Geer Kathleen Hall Jamieson Marion Just Daron R Shaw and John Zaller

The Legislative Legacy of Congressional Campaigns Tracy Sulkin, 2011-04-11 Do members of Congress follow through on the appeals they make in campaigns The answer to this question lies at the heart of assessments of democratic legitimacy This study demonstrates that contrary to the conventional wisdom that candidates appeals are just cheap talk campaigns actually have a lasting legacy in the content of representatives and senators behavior in office Levels of promise keeping vary in a systematic fashion across legislators across types of activity across time and across chamber Moreover legislators responsiveness to their appeals shapes their future electoral fortunes and career choices and their activity on their campaign themes leaves a tangible trace in public policy outputs Understanding the dynamics of promise keeping thus has important implications for our evaluations of the quality of campaigns and the strength of representation in the United States
