peace with nature rather than in conflict with our natural environment The new direction in thinking which is advanced by Greens political ecologists and Green political organizations engaged in electoral action at various levels in liberal democracies can have a far reaching effect on our lifestyles our neighbourhoods and cities and on our politics Exam in ing various streams of environmentalist and ecological thought this book presents an overview of the origins and nature of political ecology as well as a summary of the differences and similarities between political ecology and social ecology The unambiguous premise of the book is that the resolution of the current planetary crisis hinges on the fate and outcome of this new politics Page 4 of cover Political Ecology Across Spaces, Scales, and Social Groups Susan Paulson, Lisa L.

Gezon, 2005 Environmental issues have become increasingly prominent in local struggles national debates and international policies In response scholars are paying more attention to conventional politics and to more broadly defined relations of power and difference in the interactions between human groups and their biophysical environments Such issues are at the heart of the relatively new interdisciplinary field of political ecology forged at the intersection of political economy and cultural ecology This volume provides a toolkit of vital concepts and a set of research models and analytic frameworks for researchers at all levels The two opening chapters trace rich traditions of thought and practice that inform current approaches to political ecology They point to the entangled relationship between humans politics economies and environments at the dawn of the twenty first century and address challenges that scholars face in navigating the blurring boundaries among relevant fields of enquiry The twelve case studies that follow demonstrate ways that culture and politics serve to mediate human environmental relationships in specific ecological and geographical contexts Taken together they describe uses of and conflicts over resources including land water soil trees biodiversity money knowledge and information they exemplify wide ranging ecological settings including deserts coasts rainforests high mountains and modern cities and they explore sites located around the world from Canada to Tonga and cyberspace **The Routledge Handbook of**
