Political Economy Of Competitiveness In An Enlarged Europe:

The Political Economy of Competitiveness in an Enlarged Europe J. Pellegrin, 2016-10-18 Central and Eastern European countries are entering the development race at a crucial juncture in EU enlargement and the wider phenomenon of globalization In the face of hesitant and controversial EU policy these countries need to engage sound development strategies International production networks are expected to be decisive in helping them strengthen their competitiveness and establish knowledge based economies In this book Julie Pellegrin looks at whether and how production networks develop in Central and Eastern European countries and assesses their chances of catching up with the rest of Europe **The Global Political Economy of Trade Protectionism and Liberalization** Tony Heron, 2012 Examines the social political and economic impacts of trade paying attention to the textiles and clothing sector with respect to developing countries This book is suitable for those studying and researching international and comparative political economy developing area studies economics law and geography **Social Failures of EU Enlargement** Guglielmo Meardi, 2013-06-17 Is the EU enlargement the success EU institutions proclaim Based on fifteen years of fieldwork research across Central and Eastern Europe and on migrants in the UK and Germany this book provides a less glittering answer The EU has betrayed hopes of social cohesion social regulations have been forgotten multinationals use threats of relocations and workers left without institutional channels to voice their concerns have reacted by leaving their countries en masse Yet migration for many increases social vulnerability Drawing on Hirschman s concepts of Exit and Voice the book traces the origins of such failures in the management of EU enlargement as a pure economic and market creating exercise neglecting the inherently political nature of labour relations The reinforcement of market mechanisms without political counterbalances has resulted in an increase in opportunistic exit behaviour by both employers and employees and thereby in a worsening quality of democracy at workplace national and European levels As a result of this process the EU has become more similar to the North American Free Trade Agreement between USA Canada and Mexico where social rights are marginalized and economic integration does not translate into better development **Reforming the Financial Sector in Central European Countries** S. Poloucek, 2016-01-13 The analysis in this book reflects various aspects of financial sector transformation in selected Central European countries that are expected to join the EU in 2004 The authors are Central European financial experts who provide among other things a detailed overview of the following main topics Banking Regulation and Supervision Concentration and Efficiency of the Banking Sectors Financial banking crises in selected Central European countries and Monetary and Exchange Rate Development The results of the research done by these authors reflect an interesting fact that there exist important differences in the financial sector development even in the relatively homogeneous group of selected Central European countries namely the Czech Republic Poland Slovakia and Hungary Critical Management Research in Eastern Europe M. Kelemen, M. Kostera, 2002-10-23 The process of transition in Eastern European countries is one in which ideas of

the past and present both local and Western meet and conflict Presenting a wealth of new ethnographic and interview based research Critical Management Research in Eastern Europe argues that the reform process in Central and Eastern Europe has been dominated by the traditional Western view of management practice However this approach overlooks the fact that certain managerial and organizational practices developed in Central and Eastern Europe may still be appropriate and indeed effective within this particular setting The book brings together authors from both East and West Europe to evaluate how the two systems can best be harmonized which is particularly important in the context of EU enlargement

Economic Transition in Central Europe and the Commonwealth of Independent States T. Mickiewicz,2005-11-11 Fifteen years ago twenty seven countries in Europe and Central Asia embarked on their economic transition paths For some the outcome was a considerable success Several others are still struggling to shed the inheritance of the past and to correct more recent policy mistakes Why were post Communist recessions so long in some countries and growth disappointing Why was fiscal performance so different Was democracy a factor which facilitated reforms or rather slowed them down This book discusses these questions in the context of new empirical evidence including a critical examination of the main themes in the economics of transition literature

The Political Economy of the European Constitution Luigi Paganetto,2017-11-30 The enlargement process the creation of the Monetary Union and the need to promote further the political and economic integration of Europe have ignited an intense debate at the European level among researchers and policy makers Examining the effects that political legal and regulatory institutions have on economic development this book provides new contributions on the political economy of the European constitution It covers many issues including social protection fiscal reform and regional policies that are on the table of European policy makers Furthermore it provides ideas and analysis of such issues as the problem of voting reform the centralization and decentralization of the policy process and the allocation of new policy prerogatives at the EU level which are crucial for the design of a new European constitution

Monetary Integration in Europe H. Tomann,2016-02-05 Can the European Economic and Monetary Union survive as an institution providing the highest degree of monetary integration Can it withstand crises in international markets and contribute to the stability of the global financial system This book addresses these questions emphasising the need for new forms of economic policy coordination

Privatisation and Its Limits in Central and Eastern Europe H. Engerer,2001-06-18 Hella Engerer analyses the emergence evolution and theory of property rights and establishes the limits for privatization of state owned enterprises in the transitional economies of Eastern Europe She counters the assumption that reduction of the state sector helps to create the basis for a private property system showing that privatization actually presupposes a stable framework including property order She makes use of an outstanding methodological approach reaching well beyond the limits of pure economic observation This is a major contribution to the understanding of the emerging economic order of Central and Eastern Europe

Towards Better Work A. Rossi,A. Luinstra,J. Pickles,2014-02-12 Globalization of production has created

opportunities and challenges for developing country producers and workers This volume provides solutions oriented approaches for promoting improved working conditions and labour rights in the apparel industry Security, Insecurity and Migration in Europe Gabriella Lazaridis,2016-04-01 Having often been framed in terms of security concerns migration issues have simultaneously given rise to issues of insecurity on the one hand security of borders political societal and economic security insecurity in the host country on the other social legal and economic concerns about human security with regard to both EU citizens and migrants entering Europe In terms of state security migration is a core target of increasingly globally networked surveillance capabilities whilst with respect to human security it exposes the gap between the protections that migrants formally enjoy under international law and the realities they experience as they travel and work across different countries Drawing on the latest research from across the EU *Security Insecurity and Migration* explores the concerns of states with regard to migration and the need to protect the fundamental rights of migrants An interdisciplinary examination of the issues of security and insecurity raised by migration for states their citizens and migrants themselves this book will be of interest to scholars of politics sociology and geography researching migration race and ethnicity human and state security and EU politics and policy *The Political Economy of European Union Competition Policy* Tuna Baskoy,2008-06-24 In the European Union EU competition policy occupies a central place amongst other EU public policies and is the first truly supranational public policy regulating market competition One of the stated objectives of EU competition policy is to prevent excessive concentration of economic power in the hands of a few The Multinational Enterprise, EU Enlargement and Central Europe Y. Akbar,2003-02-04 As the role of the multinational enterprise MNE in the economic development of countries grows a focus on how MNEs influence the process of regulatory and legislative structures has developed among scholars of international political economy Yusaf H Akbar draws a conceptual link between the market strategies of MNEs and the convergence of regulatory systems internationally Focusing on empirical evidence from Central Europe and industry specific case studies Akbar uses the example of the successful implementation of EU laws in Hungary as it bids to join the European Union to demonstrate the profound impact of MNE strategies **Divergent Paths in Post-Communist Transformation** O. Havrylyshyn,2006-02-20 The most comprehensive and up to date analysis of the successes and failures of 27 countries post communism transformation Looking at life after the fall of the Berlin wall in 1989 the book examines and contrasts why some countries have virtually completed their transformation to a liberal polity and economy while others lag behind **EBOOK: The European Union: Economics, Policy and History** SENIOR,2011-11-16 EBOOK The European Union Economics Policy and History Made in Estonia Marek Tiits,2006 *Economics of European Integration* Tibor Palánkai,2003 Integration theories focus on five important dimensions of the process of integration among countries the content of integration processes the organizational forms of institutions of integration regulation and governance of integration the advantages and disadvantages of integration and finally the problems of integration maturity For a long time

the literature on integration attached particular importance to the forms of integration and to cost benefit analysis Regarding the content forms and effect mechanisms of the integration processes a number of theoretical schools have emerged each emphasizing a different aspect of integration together they provide a comprehensive picture and ultimately they express the evolution of the process in all its complexity In connection with eastward enlargement from the 1990s the question of integration maturity appeared on the agenda This book distinguishes between meeting accession and membership criteria largely set in Copenhagen *The Political Economy of the Eurozone in Central and Eastern Europe* Krisztina Arató, Boglarka Koller, Anita Pelle, 2021-06-30 The idea for this volume came from the enigma that some Central and Eastern European CEE European Union EU member states have been keen to join the Eurozone while others have shown persistent reluctance Moreover the attitudes towards joining have seemingly not correlated with either the level of economic development or the time spent as part of the EU nor with any other rational reason such as the level of integration into the EU real economy or the level of trust in the EU on the part of the public Therefore at first sight the answer to the question why in why out remains rather unclear The attractiveness of the currency union has nevertheless not disappeared for the CEE countries Despite the Eurozone crisis of 2010 13 it was during that time that the Baltic states introduced the euro Then after a few years of inactivity Croatia and Bulgaria successfully applied for membership of the exchange rate mechanism in July 2020 amid the economic crisis caused by the coronavirus COVID 19 pandemic At the same time the three Visegrad countries still using their national currencies Poland Czechia and Hungary no longer have a target date to join the monetary union This volume aims to discuss these issues from horizontal aspects and through country studies with contributions from expert authors from or closely related to the CEE region **Outsourcing in the UK** Janice Morphet, 2021-04-15 In this comprehensive account Janice Morphet analyses the role and use of outsourcing within the UK public sector since the mid 1970s Morphet examines the many drivers for the use of outsourcing in the public sector including international agreements new public management performativity and austerity She also takes in to account the role and failures of the private sector and its response to the opening up of public sector competition By investigating the way that outsourcing has been used in different service sectors and across scales the book illustrates the impact it has had on ideology policy narratives and public expectations in the present Europe and Asia P. Murray, 2008-10-23 Much more than a simple examination of EU Asia relations this book examines the idea that the EU may constitute a model for East Asian regionalism It challenges specialists on the EU to understand the EU s impact on Asia and Asia s impact on the EU whilst illustrating that there is a commonality of interests in both Europe and Asia
