The book takes as its starting point claims that financial traders caused the 2007 8 global food crisis by speculating in financial instruments linked to the prices of staple grains The introduction of new regulations to curb the excesses of the financial sector in order to protect the food insecure reinforces the dominant perception that law can solve the problem Chadwick investigates a number of different legal regimes spanning public international law international economic law transnational governance private law and human rights law to gather evidence for a counterclaim law is part of the problem. The character of the contemporary global food system a food system that is being progressively financialized owes everything to law If world hunger is to be eradicated Chadwick argues then greater attention needs to be paid to how different legal regimes operate to consistently privilege the interests of the wealthy few over the needs of poor and the hungry The Political Economy of African Famine R. E. Downs, Donna O. Kerner, Stephen P. Reyna, 2019-07-19 Originally published in 1991 This volume explores the combination of political and economic forces that influence different levels of food supply The book begins with a discussion of famine theories ranging from cultural ecology to neo Marxism Following this survey is a series of essays by anthropologists geographers economists and development practitioners that explores the role of Western institutions in African famine analyzes famine in particular countries and documents the relationship between famine and gender This book takes an unusually broad look at famine by including analyses of countries where hunger has rarely been studied and by examining African famine from both African and Western perspectives Its concluding proposals for eradicating famine make

innovative and provocative contributions to current global debates on food and nutrition The Political Economy of Hunger in Zimbabwe Thomas D. Shopo,1985 Hunger, Famines, and Poverty Nurul Islam,1997 The Moral Demands of Affluence Garrett Cullity,2006-09-21 How much are we morally required to do to help people who are much worse off than us On any credible moral outlook other people s pressing need for assistance can ground moral requirements on us to help them requirements of beneficence How far do those requirements extend One way to think about this is by means of a simple analogy an analogy between joining in efforts to help people at a distance and rescuing a needy person yourself directly Part I of Garrett Cullity s book examines this analogy In some ways the analogy is not only simple but politically and metaphysically simplistic However it contains an important truth we are morally required to help other people indirectly as well as directly But the number of needy people in the world is enormous and their need is very great Once we start to recognize requirements to help them when is it morally acceptable to stop Cullity answers this question in Part II Examining the nature of beneficence he argues that its requirements only make sense on the assumption that many of the interests we share in common rich and poor alike are interests it is not wrong to pursue
