Political Institution Of Private Property:

The Political Institution of Private Property Itai Sened,1997-07-24 In this book Itai Sened examines the political institution of property and other individual rights His argument is that the foundation of such rights is to be found in the political and economic institutions which grant and enforce them and not in any set of moral principles or nature The book further argues that individual rights are instituted through a political process and not by any hidden market forces The origin of rights is placed in a social contract that evolves as a political process in which governments grant and protect property and other individual rights to constituents in return for economic and political support Extending neo institutional theory to the subject and using a positive game theoretic approach in its analysis this book is an original contribution to scholarship on the evolution of rights

The Political Economy of the American Frontier Ilia Murtazashvili,2013-09-16 This book offers an analytical explanation for the origins of and change in property institutions on the American frontier during the nineteenth century Its scope is interdisciplinary integrating insights from political science economics law and history This book shows how claim clubs informal governments established by squatters in each of the major frontier sectors of agriculture mining logging and ranching substituted for the state as a source of private property institutions and how they changed the course of who received a legal title and for what price throughout the nineteenth century Unlike existing analytical studies of the frontier that emphasize one or two sectors this book considers all major sectors as well as the relationship between informal and formal property institutions while also proposing a novel theory of emergence and change in property institutions that provides a framework to interpret the complicated history of land laws in the United States

State Institutions, Private Incentives, Global Capital Andrew Carl Sobel,2010-09-23 The growth of global finance since 1960 constitutes one of the most important transformations in social relations during the twentieth century Using historical statistical and graphical techniques State Institutions Private Incentives and Global Capital examines three important aspects of this phenomenal shift in the international political economy First Andrew Sobel explores the reawakening of the international financial markets mapping their extraordinary transformation since the early 1960s and discussing the role of politics in that metamorphosis The author then offers a fresh understanding of the systematic differences in access for borrowers in this rapidly transforming and expanding global capital pool He then demonstrates the influence of political factors in producing differential access to the global capital pool Showing how the character and stability of a country s political system affects investors s decisions to invest in that country Sobel breaks new ground in

understanding the basis for the frequent admonitions by the World Bank and others that a stable political and legal system are essential for states to attract significant foreign investment With the growing debate about the effect of financial interdependence on the ability of states to conduct economic policy and indeed to preserve their independence in the face of unprecedented economic linkages this book will be of interest to political scientists and economists as well as policy makers concerned with the impact of financial globalization and the causes of differentials in access to capital Andrew C Sobel is Assistant Professor of Political Science and Resident Fellow Center in Political Economy Washington University St Louis He is the author of Domestic Choices International Markets Dismantling National Barriers and Liberalizing Securities Markets

market institutions and the military Each chapter not only provides a summary of our current state of knowledge on the topic but also advances claims that emphasise the research frontier on the topic and that should encourage greater investigation The final section encompassing seven chapters examines the relationship between institutions and a variety of important outcomes such as political violence economic performance and voting behavior The idea is to consider what features of the political sociological and economic world we understand better because of the scholarly attention to institutions Featuring contributions from leading researchers in the field from the US UK Europe and elsewhere this Handbook will be of great interest to all students and scholars of political institutions political behaviour and comparative politics Jennifer Gandhi is Associate Professor Department of Political Science Emory University Rub n Ruiz Rufino is Lecturer in International Politics Department of Political Economy King s College London *Annals of the American Academy of Political and Social Science*, 1907 Modern Political Institutions Simeon Eben Baldwin, 1908 **Manual of the State of West Virginia for the Years 1907-1908**, 1907 **Manual of the State of West Virginia [Legislative, Executive and Judicial Depts]** West Virginia. Secretary of State, 1907 **Political Culture and Institutional Development in Costa Rica and Nicaragua** Consuelo Cruz, 2005-08-22 Democracy s checkered past and uncertain future in the developing world still puzzles and fascinates In Latin America attempts to construct resilient democracies have been as pervasive as reversals have been cruel This book is based on a wealth of original historical documents and contemporary interviews with prominent political actors and analyses five centuries of political history in these paradigmatic cases of outstanding democratic success and abysmal failure It shows that while factors highlighted by standard explanations matter it is political culture that configures economic development institutional choices and political pacts in ways that directly affect both democracy s chances and its quality But it also claims that political culture is a dynamic combination of rational and normative imperatives that define actors views of the permissible shape their sense of realism structure political struggles and legitimate the resulting distribution of power

Policy-Making in the GCC Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike
