**Sovereignty, Civic Participation, and Constitutional Law** Brecht Deseure, Raf Geenens, Stefan Sottiaux, 2021-04-12 This book brings recent insights about sovereignty and citizen participation in the Belgian Constitution to scholars in the fields of law philosophy history and politics Throughout the Western world there are increasing calls for greater citizen participation Referendums citizen councils and other forms of direct democracy are considered necessary antidotes to a growing hostility towards traditional party politics This book focuses on the Belgian debate where the introduction of participatory politics has stalled because of an ambiguity in the Constitution Scholars and judges generally claim that the Belgian Constitution gives ultimate power to the nation which can only speak through representation in parliament In light of this direct democracy would be an unconstitutional power grab by the current generation of citizens This book critically investigates this received interpretation of the Constitution and by reaching back to the debates among Belgium's 1831 founding fathers concludes that it is untenable The spirit if not the text of the Belgian Constitution allows for more popular participation than present day jurisprudence admits This book is the first to make recent debates in this field accessible to international scholars It provides a rare source of information on Belgium's 1831 Constitution which was in its time seen as modern constitutionalism's greatest triumph and which became a model for countless other constitutions Yet the questions it asks reverberate far beyond Belgium Combining new insights from law philosophy history and politics this book is a showcase for continental constitutional theory It will be a valuable resource for academics and researchers in constitutional law political and legal philosophy and legal history Chapters 3 4 11 and 15 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <https://www.taylorfrancis.com/books/sovereignty-civic-participation-constitutional-law-brecht-deseure-raf-geenens-stefan-sottiaux/e1043249781003039525>

The Politics of Ethnic Survival Gary B. Cohen, 2006 This book examines how one of Imperial Austria's principal ethnic conflicts that between Czechs and Germans developed in one of the major cities during the era of industrialization and urban growth It shows how the inhabitants of Prague the capital of Bohemia constructed and articulated ethnic group loyalties and social solidarities over the course of the nineteenth century The German speaking inhabitants of the Bohemian capital developed a group identification and defined themselves as a minority as they dealt with growing Czech

political and economic strength in the city and with their own sharp numerical decline in the 1910 census only seven percent of the metropolitan population claimed that they spoke primarily German The study uses census returns extensive police and bureaucratic records newspaper accounts and memoirs on local social and political life to show how the German minority and the Czech majority developed demographically and economically in relation to each other and created separate social and political lives for their group members The study carefully traces the roles of occupation class religion and political ideology in the formation of German group loyalties and social solidarities The social relations which bound together the members of the German speaking minority and the social boundaries which separated them from the Czech majority at the end of the nineteenth century proved to be selective and considerable contact went on across the lines in many facets of individuals everyday life As the German minority developed a shared group life what came to define them and to separate them from the Czech majority was a shared Austro German ethnic and national loyalty an Austro German national liberal ideology the defense of common middle class and lower middle class social and political interests and a shared German public life Both German speaking Catholics and Jews could share in the sense of German community and group solidarity provided they upheld middle class liberal values The bonds of community for the middle class and lower middle class Germans in Prague established in the 1860s tended to exclude German speaking wage laborers and lower middle class radical nationalists who might challenge liberal national values Despite all the efforts to strengthen German community solidarity and combat assimilation of German speakers with the Czech majority from the 1880s to after 1900 the organized German community could do little to prevent the absorption of working class German speakers into the Czech population of the industrial districts

**Power in Business and the State** Frank Bealey, 2002-11 It is commonplace that political power is becoming more centralized and remote This ground breaking book argues that this happened through a slow development which began before globalisation

**Boom and Bust** J. D. Hunley, 2019-07-03 Originally published in 1987 this study assesses the extent to which social and economic conditions affected the outcome of Reichstag and Landtag elections It discusses the economic development in the district of Düsselndorf both before and during the period covered 1867 1878 it also examines those social conditions in the region that remained static from 1867 1878 but also considers as a background to each election or set of elections short term changes in economic and social conditions

**The Money Machines** Clifton K. Yearley, Professor Clifton K Yearley, 1970-01-01 The Money Machines advances the

provocative thesis that the mechanisms for financing state and local government in the Northern United States from 1860 to 1920 were deeply enmeshed with those financing the extralegal often illegal activities of the major political parties complicating reform or change mandated by the post Civil War breakdown of the North's legal fiscal machinery Few reformers then recognized the interdependence of government and the party money machines fewer still acknowledged the effectiveness or social value of the extralegal machines On the contrary basic fiscal reform in this period was characterized by attempts to exorcise politics in any form which in turn provoked counteraction from politicians whose organizations had the same need for efficient reliable revenue systems as did governments Dr Yearley demonstrates the failure of the established legal money machines to cope with the demands of postwar governments facing industrialization and urbanization He characterizes the revolt of old and new middle classes against fiscal inequity and inefficiency and shows how much of the North's new wealth escaped taxation altogether while much of its old wealth similarly went into hiding Because of its forbidding complexities tax reform was sustained by a small group of experts from the middle class whose sincerity and competence were unquestionable but whose reformism evidenced the peculiar views and prejudices of their class Here therefore the graft grabbing politician is presented in a fresh light In his efforts to maintain his sources of revenue and power he emerges as a vital instrument of mass democracy of the new politics of the ever growing urban lower classes as well as their principal source of government welfare or support The author reevaluates the Gilded Age politician in several important ways principally regarding his power relationship to the business communities and his ability to perform his job well despite middle class disdain and continual allegations of fraud and incompetence Further Dr Yearley shows that often politicians were ahead of reformers in their fiscal thinking in recognizing and utilizing taxation of income rather than of property The volume considers in some depth several individual reformers revealing them to be among other things prototypes of present academic experts used by government to manage problems too complex for laymen The book then proceeds to explain essential changes made in local fiscal systems and which of these were to be the most effective explanations that are of particular interest in view of the continuing crises in state and local financing today *Elections Without Order* Richard
