Political Issues In New Zealand Education:

Political Issues in New Zealand Education John A. Codd, Richard Kendall Harker, Roy Nash, 1990 Reforming New Zealand Secondary Education R. Openshaw, 2009-08-31 This timely book argues that the New Zealand educational reforms were the product of longstanding unresolved educational issues that came to a head during the profound economic and cultural crisis of the 1970s and early 1980s **Encyclopedia of Language and Education** Ruth Wodak, David Corson, 1997 Made up of eight volumes the Encyclopedia of Language and Education is the first attempt at providing an overview of the subject **Historical Perspectives on Teacher Preparation in Aotearoa New Zealand** Tanya Fitzgerald, Sally Knipe, 2019-07-11 This book documents and critiques the historical origins and historiography of schooling and teacher preparation in New Zealand The country has a unique educational history as the overview of the history and development of schools for the nation's children both Pakeha European and Maori will highlight **Political Philosophy, Educational Administration and Educative Leadership** Reynold Macpherson, 2013-10-01 In this book Reynold Macpherson initiates a politically critical theory of educative leadership as a fresh line of inquiry in the practice research and theory of educational administration and educational leadership Divided into four parts the book introduces the sub discipline of political philosophy to the field of educational administration management and leadership It does this by clarifying the knowledge domain of each and identifying how four political ideologies specifically pragmatism communitarianism communicative rationalism and egalitarian liberalism have primarily informed and surreptitiously provided contestable justifications for power in the development of practice research and theory in the field of study The book goes on to offer three case studies illustrating how political philosophy can be used to interpret how people become leaders and administrators of educational institutions and systems Additional case studies then demonstrate how crises in governance in educational institutions and systems can be analyzed and improvements made using the tools of political philosophy The final part uses the sub discipline to critique the author's decades of research into educative leadership and concludes the book by both establishing the relativity of politically critical critique and the ideology it favours neo pragmatism Political Philosophy Educational Administration and Educative Leadership will provide practitioners researchers and theorists in educational administration management and leadership with a deeper appreciation of power by formally introducing them to the assumptions limits and tools of political philosophy **Schooling Reform In Hard Times** Bob Lingard, John Knight, Paige Porter, 2003-09-02 Based on research carried out under Labour governments throughout the 1990s in Western Australia the authors consider the social political and economic conditions under which policy is formulated understood and enacted They look at how the state structure affects the content and nature of policy statements and provide an outline of the history of policy developments and point to future possibilities and probabilities Outcomes within funding ceilings accountability frameworks and national guidelines are but some of the changes referred to The emergence of competency based standards in education

and training in schools workplaces and the professions is evident throughout Australia at state level but the concern is whether issues of education should be played out within the state and outside civil society The authors argue for the mediation in implementation of policy rather than a lambasting of policy formulation and implementation This text is intended for heads of education departments PGCE BEd MED students and researchers interested in education policy and planning Education policymakers and educational historians

A Companion to Research in Teacher Education Michael A. Peters, Bronwen Cowie, Ian Menter, 2017-05-31 This state of the art Companion assembles and assesses the extant research available on teacher education and provides clear guidelines on future directions It addresses an important need in a collection that will be of value for teachers teacher educators policymakers and politicians There has been little sustained long term or systematic research to provide empirical support for the broad aspects of teacher education policy largely because such research has been chronically underfunded and based on traditional practitioner knowledge Many of the changes to teacher education are contentious and yet are occurring in rapid succession These policies and movements have important consequences for education teacher quality and the future of the teaching profession At the same time the policies and initiatives that support these changes seem to be based more on ideology business interests and tradition than on research and empirical findings The nature quality and effectiveness of teacher preparation have increasingly become a central focus for education policy worldwide in a fiercely argued debate among governments think tanks world policy agencies education researchers and teacher organisations

Freeing Ourselves Russell Bishop, 2011-11-19 This book draws together many previously published articles and book chapters produced by the author over the past 20 years of work in the field of indigenous

education However rather than just being a compilation of a series of papers this book is a record of the development of an indigenous approach towards large scale theory based education reform that is now being implemented in two different forms in almost half of the secondary schools in New Zealand Fundamental to this theorising is the understanding identified by Paulo Freire over forty years ago that answers to the conditions oppressed peoples find themselves in is not to be found in the language or understandings of the oppressors Rather it is to be found in those of the oppressed This realisation has been confirmed by the examples in this book The first is seen where it is identified how researching in Maori contexts needs to be conducted dialogically within the world view and understandings of Maori people Secondly dialogue in its widest sense is crucial for developing a means whereby Maori students are able to participate successfully in education The book details how researching the impact of colonization on his mother's Maori family enabled the author to develop a means of researching within indigenous Maori contexts It then details how the lessons learnt here appealed as being a means by which the marginalization of Maori students in mainstream public school classrooms could be re theorised and how schools and education systems could be reorganised so as to support indigenous students to be successful learners
