Political Participation In Rural China Center For Chinese Studies:

Political Participation in Rural China John P. Burns, 1988 **Political Culture and Participation in Rural China** Yang Zhong, 2013-06-17 Despite China's rapid urbanisation and industrialisation most Chinese still live in the vast countryside or have rural household registration. Although there was significant economic improvement in rural areas in the 1980s the rural economy has been stagnating or deteriorating since then and the book argues that the rural urban income gap is giving rise to the potential for political instability throughout China. This book based on extensive original research including interview fieldwork in rural areas examines the nature of political culture and participation in rural China discussing issues such as the support or lack of it for democratic values levels of political interest the ways in which Chinese peasants interact with village and local officials subjective factors that motivate them to vote or not to vote in village elections and rural people's views on market oriented economic reforms local and national government and the Communist Party. The book argues that although hitherto peasants' riots sit ins and demonstrations have been localised and uncoordinated they are frequent and have the potential to cause serious political crises for China's rulers. It concludes by considering the future political development of China's vast countryside **Education, Culture, and Identity in**

Twentieth-century China Glen Peterson, Ruth Hayhoe, Yongling Lu, 2001 A comprehensive collection on twentieth century educational practices in China **Rural Policy Implementation in Contemporary China** Anna Ahlers, 2014-01-10 At the turn of the millennium the disparities between rural and urban livelihoods underdevelopment and administrative shortcomings in the Chinese countryside were increasingly seen as posing a manifest threat to social harmony and economic and political stability. At that time the term 'three rural problems' (sannong wenti) was coined which defined the main issues of rural life that needed to be targeted by government action: agriculture (nongye), villages (nongcun) and farmers (nongmin). In turn with the launch of the 11th Five Year Plan in 2006 a pledge was made to shift the focus of developmental efforts to the long neglected countryside which is still home to half of the Chinese population. This book presents an analysis of adaptive local policy implementation in China in the context of the Building of a New Socialist Countryside (BNSC) policy framework. Based on intensive field work in four counties in Fujian Jiangxi Shaanxi and Zhejiang Provinces between 2008 and 2011 it offers detailed analyses of the form and impact of county governments' strategic agency at certain stages and within certain fields of the implementation process for example the design of local BNSC programs the steering of project funding implementation and evaluation the establishment of model villages and the management of public participation. Further this study illustrates that BNSC is far more than the empty slogan described by many observers when it was launched in 2005/2006. Instead it has already brought about considerable shifts in terms of the process and outcomes of rural policy implementation. Altogether the results of this research challenge existing paradigms by showing how against the background of contemporary approaches to rural development and recent reforms initiated by the central state local bureaucracies' strategic agency can actually push

forward effective albeit not necessarily optimal policy implementation to some extent which serves the interests of central authorities local implementors and rural residents By tying into the larger debates on China's state capacity and authoritarian adaptability this book enriches our understanding of the inner workings of the Chinese political system As such it will prove invaluable to students and scholars of Chinese politics public policy and development studies more generally

American Studies of Contemporary China David L. Shambaugh, 2016-09-16 Examines the historical evolution of contemporary China studies in the United States reflecting the growth and maturation of the field since the Communist Party seized power in 1949

China During the Cultural Revolution, 1966-1976 Tony H. Chang, 1999-01-30 One of the most tumultuous periods in modern Chinese history the Cultural Revolution affected virtually all Chinese people and all aspects of Chinese life including art music and drama education factory management economic planning and medical care Studies of the Cultural Revolution in both Chinese and Western languages have burgeoned over the past three decades This comprehensive easy to use bibliography provides a guide to published English language sources on the Cultural Revolution With over a thousand entries it includes books monographs dissertations and audio visual materials on a broad range of topics from the military education religion and economics to foreign relations population art literature and drama Including titles published through the end of 1997 and a few in 1998 the book provides a general overview of the literature on the Chinese Cultural Revolution and its impact on China Its scope and coverage make it a useful resource for any library whose readers have an interest in modern Chinese history

Rural Democracy in China B. He, 2007-09-17 This book examines village democracy and the prospects of China's democratization It explains how three key factors township economy and kinship shape village democracy and account for rural variations It considers the extension of village to township elections the idea of a mixed regime and its impact on political development in China

Mobilizing for Development Kristen E. Looney, 2020-05-15 Mobilizing for Development tackles the question of how countries achieve rural development and offers a new way of thinking about East Asia's political economy that challenges the developmental state paradigm Through a comparison of Taiwan 1950s 1970s South Korea 1950s 1970s and China 1980s 2000s Kristen E Looney shows that different types of development outcomes improvements in agricultural production rural living standards and the village environment were realized to different degrees at different times and in different ways She argues that rural modernization campaigns defined as policies demanding high levels of mobilization to effect dramatic change played a central role in the region and that divergent development outcomes can be attributed to the interplay between campaigns and institutions The analysis departs from common portrayals of the developmental state as wholly technocratic and demonstrates that rural development was not just a byproduct of industrialization Looney's research is based on several years of fieldwork in Asia and makes a unique contribution by systematically comparing China's development experience with other countries Relevant to political science economic history rural sociology and Asian Studies the book enriches our understanding of state led development

and agrarian change *Chinese Politics and Society* Flemming Christiansen, Shirin Rai, 2014-02-04 An introduction to Chinese Politics which provides an accessible overview of the structures and dynamics of Chinese politics today Concentrating on the era since 1949 the text takes a look at politics in the widest sense analysing political institutions within the crucial broader context of Chinese history and the pressures of social economic and cultural changes **Handbook of China's Governance and Domestic Politics** Chris Ogden, 2013-01-03 This Handbook provides an in depth overview of how China is governed how its domestic political system functions and the critical issues that it currently faces Governed by the world's largest political party in the world's longest ruling Communist regime China is undergoing a transitional period of rapid economic and social development How this period is managed will have significant implications for the Chinese state and its population concerning China's governance structures and economy as well as the country's justice public health education and internal external security concerns This transition to a modern state is not without its challenges particularly in terms of how the Chinese state deals with diverse issues such as social inequality corruption separatism increasing individualism and political reform China's governance and domestic politics also have possible major global consequences especially in the context of China's continued rise within the international system This Handbook will improve understandings of the core national dynamics of this rise and as levels of international interdependence with China increase can offer vital insights concerning China's domestic attributes Gaining a better knowledge of China's internal workings can also help better appreciate the multiple and varied problems that China's leaders will face in the coming decades Critically many of the core internal issues facing China also have potential external repercussions principally in terms of rising social unrest nationalism environmental degradation resource shortages and attitudes towards globalization This book aims to cover these issues and will help readers to fully comprehend China's ongoing contemporary global significance **The Party and the Arts in China** Richard Curt Kraus, 2004-04-02 In this original exploration of the dynamic and potent interface between Chinese culture and politics Richard Kraus examines the impact of the market on the once comprehensive system of state patronage of the arts in the PRC The author uses all genres of art to explore the changing nature of politics seen through such phenomena as ideology propaganda censorship and the relationship of artists to the state Kraus makes three provocative arguments First the commercialization of China's cultural life has been intellectually liberating but also poses serious economic challenges that artists are sometimes slow to master Second despite conventional wisdom in the West that China's economic reforms have not been followed by serious political reform he shows that the shift from state patronage to a mixed system of private and public sponsorship is in fact a fundamental political change Third Western recognition of the reformation in China's cultural life has been obscured by a combination of ignorance ideological barriers and foreign policy rivalry Cogent witty and deeply informed this comprehensive overview of the Chinese arts scene will be an essential text for all observers of contemporary China *Social Mentality and Public Opinion in China* Fanbin Zeng, 2023-02-24 This book

explores the relationship between social mentality public opinion media and other factors through mixed methods in China especially since the 21st century The book deploys qualitative and quantitative research and adopts a multi disciplinary perspective and diverse research methods The studies are built on and contribute to the burgeoning literature seeking to anatomise the relationship between social mentality media and public opinion from the point of view of sociology and communication It also aims to explore how media can be used to appease public opinion As the first systematic study of the interconnection between social mentality and public opinion this book provides empirical support and a theoretical framework for both areas It will thus be a great read for students and scholars of communication sociology and social psychology especially for those with a focus on China and new media

The Politics of Chinese Communism Ilpyong J. Kim, University of California, Berkeley. Center for Chinese Studies, 1973-01-01

Citizens and Groups in Contemporary China Victor Falkenheim, 2020-08-06 Citizens and Groups in Contemporary China began with two symposia held in 1977 and 1978 The first a workshop on The Pursuit of Interest in China was held in August 1977 at the University of Michigan and was organized by Michel Oksenberg and Richard Baum It was supported by a grant from the Joint Committee on Contemporary China of the Social Science Research Council and the American Council of Learned Societies using funds provided by the Andrew Mellon Foundation Its principal goal was to use detailed case studies to explore the relevance of interest group approaches to the study of Chinese politics The second a panel organized by the editor for the 1978 Chicago meeting of the Association of Asian Studies sought to apply participatory approaches to the role of social groups in the Chinese political process The striking degree of overlap in the focus methodology and participants in both meetings suggested to a number of the paper writers that there was a need for a more eclectic approach which would focus simultaneously on individual and group actors The recognition that a volume based on such an approach might serve the needs of students and scholars seeking to examine the dynamics of informal influence and power in China was the stimulus for publishing the studies presented here in book form ix

Manager Empowerment in China Ray Yep, 2003-12-08 Institutional changes in rural China caused by the economic reforms of the post Mao era have led to a new pattern of state society interaction in the rural polity Central to this is the spectacular rise of a group of managerial elites Contrary to economic predictors this has been accompanied by the development of an interdependence between these managers and the state This book provides an analysis of the new state society relationship and demonstrates the complexity and fluidity involved in institutional development and market transformation

Globalization and Public Sector Reform in China Kjeld Erik Brødsgaard, 2014-04-24 This book analyses public sector reform comprehensively in all parts of China s public sector government bureaucracy public service units and state owned enterprises It argues that reform of the public sector has become an issue of great concern to the Chinese leaders who realize that efficient public administration is key to securing the regime s governing capacity and its future survival The book shows how thinking about public sector reform has shifted

in recent decades from a quantitative emphasis on small government which involved the reduction in size of what was perceived as a bloated bureaucracy to an emphasis on the quality of governance which may result in an increase in public sector personnel The book shows how although Western ideas about public sector reform have had an impact Chinese government continues to be best characterized as state capitalism with the large state owned enterprises continuing to play an important and increasing role in the economy and in business However state owned enterprises no longer provide care for large numbers of people from the cradle to the grave finding an alternative efficient way of delivering basic welfare and health care is the big challenge facing China's public sector

Local Government and Politics in China

Yang Zhong, 2015-02-18 After over a decade of administrative and economic reform in mainland China the center has become increasingly remote and less important for many localities In many ways the mobilization capacity of the central government has been weakened Central government policies are often ignored and local officials are often more interested in personal projects than in centrally directed economic plans In this study of local government and politics in China the author explores when and why local government officials comply with policy directives from above Drawing on interviews with government officials in various municipalities and a review of county records and other government documents he provides the first in depth look at policy implementation at the county and township levels in the PRC The book examines the impact of the Chinese cadre system on the behavior of local officials local party and government structure relationships among various levels of Chinese local government policy supervision mechanisms at local levels village governance of China and more

Grassroots Elections in China Kevin O'Brien, Suisheng Zhao, 2014-07-22 Twenty years after the launch of village elections the time is ripe to assess the progress and impact of China's most notable political reform Where have elections been conducted well and where have they been conducted poorly How have procedures changed over the years and have elections truly transformed how power is exercised in the countryside What methods are researchers employing to study elections and how have scholars from different disciplines contributed to our knowledge of grassroots politics in China This book carefully examines the implementation and effects of China's village township and people's congress elections both in terms of democratizing the polity and spurring other changes in state society relations The chapters in this book have been published across several issues of the Journal of Contemporary China

Practicing Citizenship in Contemporary China

Sophia Woodman, Zhonghua Guo, 2020-04-02 This book examines citizenship as practiced in China today from a variety of angles Citizenship in China and elsewhere in the Global South has often been perceived as either a distorted echo of the real democratic version in Europe and North America or an orientalized other that defines what citizenship is not By contrast this book sees Chinese citizenship as an aspect of a connected modernity that is still unfolding The book focuses on three key tensions a state preference for sedentarism and governing citizens in place vs growing mobility sometimes facilitated by the state a perception that state building and development requires a strong state vs ideas and practices of participatory

citizenship and submission of the individual to the collective state community village family etc vs the rising salience of conceptions of self development and self making projects Examining manifestations of these tensions can contribute to thinking about citizenship beyond China including the role of the local in forming citizenship orders how individualization works in the absence of liberal individualism and how social citizenship is increasingly becoming a reward to good citizens rather than a mechanism for achieving citizen equality This book was originally published as a Special Issue of the journal Citizenship Studies Rejuvenating Communism Jérôme Doyon, 2023-02-20 Working for the administration remains one of the most coveted career paths for young Chinese Rejuvenating Communism Youth Organizations and Elite Renewal in Post Mao China seeks to understand what motivates young and educated Chinese to commit to a long term career in the party state and how this question is central to the Chinese regime's ability to maintain its cohesion and survive Jérôme Doyon draws upon extensive fieldwork and statistical analysis in order to illuminate the undogmatic commitment recruitment techniques and other methods the state has taken to develop a diffuse allegiance to the party state in the post Mao era He then analyzes recruitment and political professionalization in the Communist Party's youth organizations and shows how experiences in the Chinese Communist Youth League transform recruits and feed their political commitment as they are gradually inducted into the world of officials As the first in depth study of the Communist Youth League's role in recruitment this book challenges the assumption that merit is the main criteria for advancement within the party state an argument with deep implications for understanding Chinese politics today
