## **Political Power And Social Theory Volume 11:**

**Political Power and Social Theory** Diane E. Davis, Julian Go, 2009-12-21 It is time to consider changes in the field of comparative historical sociology as the discipline seeks to accommodate old and new trends as well as the transforming spatial scales in which political power and social theory are increasingly embedded This title showcases articles that pursue similar themes

**Political Power and Social Theory** Julian Go, 2010-12-07 Helps in advancing our interdisciplinary critical understanding of the linkages between social relations political power and historical development This title contains a section on the politics of the new middle class in the global south and post socialist societies

*Recent Marxian Theory* John F. Sitton, 1996-01-01 Brings together prominent recent analyses within the Marxist tradition that bear on class formation and social conflict in contemporary capitalism and concludes that class relations continue to be important for analyzing the historical trajectory of and challenges to capitalism although not in the way Marx imagined

**Postcolonial Sociologies** Julian Go, 2016-08-26 How can postcolonial thought be most fruitfully translated and incorporated into sociology This special volume brings together leading sociologists to offer some answers and examples The chapters offer new postcolonial readings of canonical thinkers like Karl Marx Max Weber Emile Durkheim and Robert Park

Classes Erik Olin Wright, 2023-04-18 Class analysis and class struggle are central concepts in Marx s social theory yet notoriously Marx never wrote a systematic exposition of these terms during his lifetime and succeeding generations have had to piece together interpretations from his many scattered references and discussions The problem of trying to develop a Marxist class analysis on this basis has been made all the more acute by changes in the class structure of advanced capitalism for these have thrown up a bewildering range of new social strata which seem to be difficult to reconcile with the many traditional understandings of class In *Classes* Erik Olin Wright one of the foremost Marxist sociologists and class theorists rises to the twofold challenge of both clarifying the abstract structural account of class implicit in Marx and of applying and refining the account in the light of contemporary developments in advanced capitalist societies Recentering the concept of class on the process of exploitation Wright discusses his famous notion of contradictory class locations in relation to the empirical complexities of the middle class and he provides an analysis of class structure in post capitalist societies Wright then goes on to draw out the implications of his approach and to submit it to detailed empirical testing with the use of a trans national survey of class structure and consciousness

**Decentering Social Theory** Julian Go, 2013-08-22 Social theory and research has long faced the limitations of its conventional Eurocentric focus The essays in this volume offer new thoughts and empirical studies for transcending those limitations

Power Relations in Black Lives Christa Buschendorf, 2017-11-15 According to relational sociology power imbalances are at the root of human conflicts and consequently shape the physical and symbolic struggles between interdependent groups or individuals This volume highlights the role of power relations in the African American experience by applying key concepts of Pierre Bourdieu and Norbert Elias to black literature and

culture The authors offer new readings of power asymmetries as represented in works of canonical and contemporary black writers Richard Wright Ralph Ellison Gwendolyn Brooks Toni Morrison Percival Everett Colson Whitehead rap music e g Jay Z images of black homelessness and figurations of political activism civil rights activist Bayard Rustin BlackLivesMatter in Ferguson

**Max Weber on Power and Social Stratification** Catherine Brennan,2020-07-09 First published in 1997 this book revolves around a textual analysis of the Weberian thesis that classes status groups and parties are phenomena of the distribution of power within a community An internal reconstruction of Weber s own ideas on what is called social stratification in contemporary sociological discourse is undertaken The reason for this reconstruction inheres in the fact that Weber s thought especially in the field of social stratification has been modified and misappropriated to such an extent that Weber himself is usually lost in the commentaries Moreover this reconstruction is crucial because the secondary literature does not contain a single account teasing out the analytic structure underlying Weber s statements on the nature of social inequality in various societies It is the principal intention of the book then to retrieve the essential form and significance of Weber s ideas on social stratification

*Handbook of Classical Sociological Theory* Seth Abrutyn,Omar Lizardo,2021-11-01 This is the first handbook focussing on classical social theory It offers extensive discussions of debates arguments and discussions in classical theory and how they have informed contemporary sociological theory The book pushes against the conventional classical theory pedagogy which often focused on single theorists and their contributions and looks at isolating themes capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and theoretical traditions This book presents new approaches to thinking about theory in relationship to sociological methods

Energy, Resource Extraction and Society Anna Szolucha,2018-09-03 Energy is central to the fabric of society This book revisits the classic notions of energy impacts by examining the social effects of resource extraction and energy projects which are often overlooked Energy impacts are often reduced to the narrow configurations of greenhouse gas emissions chemical spills or land use changes However this neglects the fact that the way we produce distribute and consume energy shapes society political institutions and culture The authors trace the impacts of contemporary energy and resource extraction developments and explain their significance for the shaping of powerful social imaginaries and a reconfiguration of political and democratic systems They analyse not only the complex histories and landscapes of industrial mining and energy development including oil coal wind power gas fracking and electrification but also their significance for contested energy and social futures Based on ethnographic and interdisciplinary research from around the world including case studies from Australia Germany Kenya the Netherlands Nicaragua Norway Poland Turkey UK and USA they document the effects on local

communities and how these are often transformed into citizen engagement protest and resistance This sheds new light on the relationship between energy and power reflecting a wide array of pertinent impacts beyond the usual considerations of economic efficiency and energy security The volume is aimed at advanced students and researchers in anthropology sociology human geography science and technology studies environmental studies and sustainable development as well as professionals working in the field of impact assessments

*The Promise of Power* Maya Tudor,2013-03-14 Under what conditions are some developing countries able to create stable democracies while others have slid into instability and authoritarianism To address this classic question at the center of policy and academic debates The Promise of Power investigates a striking puzzle why upon the 1947 Partition of British India was India able to establish a stable democracy while Pakistan created an unstable autocracy Drawing on interviews colonial correspondence and early government records to document the genesis of two of the twentieth century s most celebrated independence movements Maya Tudor refutes the prevailing notion that a country s democratization prospects can be directly attributed to its levels of economic development or inequality Instead she demonstrates that the differential strengths of India s and Pakistan s independence movements directly account for their divergent democratization trajectories She also establishes that these movements were initially constructed to pursue historically conditioned class interests By illuminating the source of this enduring contrast The Promise of Power offers a broad theory of democracy s origins that will interest scholars and students of comparative politics democratization state building and South Asian political history

**We Make Our Own History** Laurence Cox,Alf Gunvald Nilsen,2014-08-20 We live in the twilight of neoliberalism the ruling classes can no longer rule as before and ordinary people are no longer willing to be ruled

in the old way Pursued by global elites since the 1970s neoliberalism is defined by dispossession and ever increasing inequality The refusal to continue to be ruled like this ya basta appears in an arc of resistance stretching from rural India to the cities of the global North From this network of movements new visions are emerging of a future beyond neoliberalism We Make Our Own History responds to these visions by reclaiming Marxism as a theory born from activist experience and practice This book marks a break both with established social movement theory and with those forms of Marxism which treat the practice of social movement organising as an unproblematic process It shows how movements can develop from local conflicts to global struggles how neoliberalism operates as a social movement from above and how popular struggles can create new worlds from below
