- Scientific topics have become politicized.
- Political Polarization
  - Increased since 1980s (Azzimonti, 2013)
  - Labels “Right Wing” and “Left Wing” partly to blame. (Seyle & Newman, 2006)
- Why, even in the face of mounting empirical data, do groups refuse to agree on important topics?

## Political Reasoning:

*Political Reasoning and Cognition* Shawn Rosenberg, Dana Ward, Stephen Chilton, 2013-07-12 This work presents a new alternative approach to studying the formation of political ideologies and attitudes addressing a concern in political science that research in this area is at a crossroads The authors provide an epistemologically grounded critique on the literature of belief systems explaining why traditional approaches have reached the limits of usefulness Following the lead of such continental theorists such as Jurgen Habermas and Anthony Giddens who stress the importance of Jean Piaget to the development of a strong theoretical perspective in political psychology the authors develop a different epistemology theory and research strategy based on Piaget then apply it in two empirical studies of belief systems and finally present a third theoretical study of political culture and political development

### **A New Model of Political Reasoning**

Kanzhen Li, 2021-02-16 Why politics and international relations seem to be driven by power strategies in some conditions but seem to be attached to values beliefs in other situations Based on findings in political psychology and international relations the book builds a new political reasoning model a two layered motivation heuristic complex The model grasps the internal mechanism that drives the co existent and dynamic relationship between material and ideational considerations in making political choices phenomena diverse and evolving across situations and periods Applied to the case of China and human rights the model helps understand several questions that attract those who are interested in the topic e g the roots and contents of strategic and conceptual factors that continuously influence China s human rights idea policies if why and how the strategy ideational relationships in such idea policies evolve across periods and the role that China s national security condition and external pressure play during such evolving relationships

Fives, 2012-11-06 In modern democracies existing moral pluralism conflicts with a commitment to resolve political disputes by way of moral reasoning Given this fact how can there be moral resolutions to political disputes and what type of reasoning is appropriate in the public sphere Fives explores this by closely analysing the work of MacIntyre and Rawls

*Reasoning and Choice* Paul M. Sniderman, Richard A.

Brody, Philip E. Tetlock, 1991 A major new theoretical explanation of how ordinary people decide what to favour and what to oppose politically      Political Reason in the Age of Ideology Daniel Mahoney, 2017-07-05 A little over one hundred years after his birth and not quite twenty five years since his death interest in the French political philosopher and sociologist Raymond Aron 1905 1983 continues to grow Aron is now widely recognized as one of the most significant intellectual figures of the postwar period whose wide ranging reflections played a key part in preserving liberal democracy in Europe and abroad His sober analyses of modern society his trenchant critique of ideological politics and every form of totalitarianism and his philosophical reflections on politics and history have given powerful support to democratic liberalism throughout the western world Aron s work combines passion and observation disinterested reflection and love of liberty in a way that is an imitable model for humane and balanced political reflection In this stimulating collection of essays inspired by the centennial of Aron s birth a distinguished group of North American and European scholars including Pierre Manent Stanley Hoffmann Irving Louis Horowitz Liah Greenfeld Claude Lefort and Aurelian Craiutu examine four key aspects of Aron s thought and work his educative legacy his reflections on other philosophers and intellectuals his distinctive approach to international relations and the unique character of his own political reflection The result is a masterful engagement with Aron s intellectual legacy and a thoughtful coming to terms with the political and intellectual substance of the twentieth century      Public Reason and Political Community Andrew Lister, 2013-10-24 Public Reason and Political Community defends the liberal ideal of public reason against its critics but as a form of moral compromise for the sake of civic friendship rather than as a consequence of respect for persons as moral agents At the heart of the principle of public justification is an idealized unanimity requirement which can be framed in at least two different ways Is it our reasons for political decisions that have to be unanimously acceptable to qualified points of view otherwise we exclude them from deliberation or is it coercive state action that must be unanimously acceptable otherwise we default to not having a common rule or policy on the issue at hand Andrew Lister explores the anti perfectionist dilemma that results from this ambiguity He defends the reasons model on grounds of the value of political community and applies it to recent debates about marriage      **Research Handbook on Political Partisanship** Henrik Oscarsson, Sören Holmberg, 2020-05-29 Based on cutting edge global data the Research Handbook of Political Partisanship argues that partisanship is down but not out in contemporary democracies Engaging with key scholarly debates from the rise of right wing partisanship to the effects of digitalization on partisanship contributions highlight the significance of political partisanship not only in the present but in the future of democracies internationally      *Political Complexity* Diana Eva-Ann Richards, 2010-06-02 This collection illustrates how nonlinear methods can provide new insight into existing political questions Politics is often characterized by unexpected consequences sensitivity to small changes non equilibrium dynamics the emergence of patterns and sudden changes in outcomes These are all attributes of nonlinear processes Bringing together a variety of recent nonlinear modeling approaches Political Complexity explores what happens

when political actors operate in a dynamic and complex social environment The contributions to this collection are organized in terms of three branches within non linear theory spatial nonlinearity temporal nonlinearity and functional nonlinearity The chapters advance beyond analogy towards developing rigorous nonlinear models capable of empirical verification Contributions to this volume cover the areas of landscape theory computational modeling time series analysis cross sectional analysis dynamic game theory duration models neural networks and hidden Markov models They address such questions as Is international cooperation necessary for effective economic sanctions Is it possible to predict alliance configurations in the international system Is a bureaucratic agency harder to remove as time goes on Is it possible to predict which international crises will result in war and which will avoid conflict Is decentralization in a federal system always beneficial The contributors are David Bearce Scott Bennett Chris Brooks Daniel Carpenter Melvin Hinich Ken Kollman Susanne Lohmann Walter Mebane John Miller Robert E Molyneaux Scott Page Philip Schrodtt and Langche Zeng This book will be of interest to a broad group of political scientists ranging from those who employ nonlinear methods to those curious to see what it is about Scholars in other social science disciplines will find the new methodologies insightful for their own substantive work Diana Richards is Associate Professor of Political Science University of Minnesota The Woman Citizen's Library: Political science, by J. Macy Shailer Mathews, 1913 The underlying theme of these essays by reformers such as Jane Addams and Florence Kelly is women s civic responsibility to play a vital role in public affairs Essays, Scientific, Political, and Speculative Herbert Spencer, 1891 **Harmonies of political economy** Frederic Bastiat, 1870 *Cobbett's Political Register* William Cobbett, 1923 **Reasoning and Choice** Paul M. Sniderman, Richard A. Brody, Philip Eyrikson Tetlock, 1991 Drawing on a multitude of data sets and building on analyses carried out over more than a decade Reasoning and Choice offers a major new theoretical explanation of how ordinary citizens figure out what they favor and oppose politically Reacting against the conventional wisdom which stresses how little attention the general public pays to political issues and the lack of consistency in their political opinions the studies presented in this book redirect attention to the processes of reasoning that can be discerned when people are confronted with choices about political issues These studies demonstrate that ordinary people are in fact capable of reasoning dependably about political issues by the use of judgmental heuristics even if they have only a limited knowledge of politics and of specific issues An important point is that both the well educated and the less educated use heuristics in political reasoning but that the well educated tend to employ different heuristics and take into account more factors in their consideration of issues Essays in Honor of John Dewey, on the Occasion of His Seventieth Birthday, October 20, 1929 John Dewey, 1929 **The Science of Politics** Sheldon Amos, 1890 **Principles of Politics from the Viewpoint of the American Citizen** Jeremiah Whipple Jenks, 1909 Government by Natural Selection Hugh Taylor, 1915 The Complete Works of Sir Philip Sidney ...: The defence of poesie.
