**Killing Strangers** T. K. Wilson,2020-09-02 A bewildering feature of so much contemporary political violence is its stunning impersonality Every major city centre becomes a potential shooting gallery and every metro system a potential bomb alley Victims just happen as the saying goes to be in the wrong place at the wrong time We accept this contemporary reality at least to some degree But we rarely ask where has it come from historically Killing Strangers tackles this question head on It examines how such violence became unchained from inter personal relationships It traces the rise of such impersonal violence by examining violence in conjunction with changing social and political realities In particular it traces both push and pull the ability of modern states to force the violence of their challengers into niche forms and the disturbing new opportunities that technological changes offer to cause mayhem in fresh and original ways Killing Strangers therefore aims to highlight the very strangeness of contemporary experience when it is viewed against a long term perspective Atrocities regularly capture media attention and just as quickly fade from public view That is both tragic and utterly predictable Deep down we expect no different And that is why such atrocities must be repeated if our attention is to be re engaged Deep down we expect that too So Killing Strangers deliberately asks the very simplest of questions How on earth did we get here

**The Midnight Kingdom** Jared Yates Sexton,2023-01-17 From the

author of *American Rule* and the host of *The Muckrake Podcast* an ambitious account of how white supremacist lies religious mythologies and poisonous conspiracy theories built the modern world and threaten to plunge us into an authoritarian nightmare To fully understand these strange and dangerous times Jared Yates Sexton takes a hard look at our nation's history namely the abuses committed by those in power and the comforting stories that shaped the way the West has viewed itself up to the present As reactionaries and authoritarians cling to myths about Western civilization *The Midnight Kingdom* exposes how political power religious indoctrination and economic dominance have been repeatedly weaponized to oppress and exploit sounding an alarm for what lies ahead as the current order frays Beginning with the Roman Empire and racing through centuries of colonization war genocide and the recurring clashes of progress and regression Sexton finds our modern world at a crossroads In an echo of past crises we have arrived at a time of historic inequality and a fading trust in our institutions Meanwhile authoritarianism is gaining momentum and the progress of the twentieth century is being rolled back at dizzying speed This catastrophic moment holds terrible potential for a return to a totalitarian past or potentially a better realer more human future The difference depends on a true reckoning with our history and the larger forces at play or hiding behind this disastrous fantasy of Western superiority Bracing and compulsively readable *The Midnight Kingdom* takes a critical look at the forces that have shaped human civilization for centuries and invites us to seek a radically different future

*Decolonizing International Relations* Branwen Gruffydd Jones, 2006-09-15 The modern discipline of International Relations IR is largely an Anglo American social science It has been concerned mainly with the powerful states and actors in the global political economy and dominated by North American and European scholars However this focus can be seen as Eurocentrism *Decolonizing International Relations* exposes the ways in which IR has consistently ignored questions of colonialism imperialism race slavery and dispossession in the non European world The first part of the book addresses the form and historical origins of Eurocentrism in IR The second part examines the colonial and racialized constitution of international relations which tends to be ignored by the discipline The third part begins the task of retrieval and reconstruction providing non Eurocentric accounts of selected themes central to international relations Critical scholars in IR and international law concerned with the need to decolonize knowledge have authored the chapters of this important volume It will appeal to students and scholars of international relations international law and political economy as well as those with a special interest in the politics of knowledge postcolonial critique international and regional historiography and comparative politics Contributions by Antony Anghie Alison J Ayers B S Chimni James Thuo Gathii Siba N Zatioula Grovogui Branwen Gruffydd Jones Sandra Halperin Sankaran Krishna Mustapha Kamal Pasha and Julian Saurin

*Becoming a Subject* Polymeris Voglis, 2002 Voglis New York U examines the relationship between the specific subject of political prisoners and certain practices of punishment in the context of a polarization that led to civil war in Greece from 1946 to 1949 He asks what impact an exceptional situation such as a civil war has on practices of punishment how the category of political

prisoners is constructed how a social and political subject is made and how political prisoners experienced their internment

Sperber,2005-07-07 In this second edition Jonathan Sperber has updated and expanded his study of the European  
Revolutions that brought millions of people across the European continent into political life between 1848 1851 The book  
offers an inclusive narrative of the revolutionary events and a structural analysis of the reasons for the revolutions ultimate  
failure A wide reaching conclusion and a detailed bibliography make the book ideal both for classroom use and for a general  
reader wishing a better knowledge of this major historical event     The Political in Rimsky-Korsakov's Operas John

Nelson,2022-02-06 During the 19th and early 20th centuries opposition to the tsarist autocracy grew in Russia To counter  
this Tsar Nicholas I instigated the Official Nationality Decree of 1833 basing this on Orthodoxy Autocracy Nationality  
Subsequent tsars who enforced repression censorship and the suppression of the peripheral counties of the Empire upheld  
this policy Nikolai Rimsky Korsakov questioned whether this Official Nationality truly represented the views of the Russian  
people and through his operas he demonstrated that the interpretation of these three premises was questionable This book  
examines each of these facets of nationality and how Rimsky Korsakov presents them in a new light in his operas It also  
shows how the composer s socio political views supported by his use of politically radical Russian writers and as expressed  
through his correspondence and discussions with family and colleagues clearly demonstrate that his political ideology as well  
as his opposition to the tsar and his bureaucracy gave a new interpretation of Russian nationality     *Revolutionary Europe*

Gavin Murray-Miller,2020-02-06 CHOICE Outstanding Academic Title 2021 *Revolutionary Europe* is an original examination  
of radical political movements during Europe s long 19th century It employs both national and transnational contexts  
incorporating new debates in Atlantic history empire studies and cultural history to give a comprehensive narrative of the  
period from 1775 to 1922 Rather than assessing revolution as a purely theoretical socially driven force or a structural  
phenomenon the book presents revolution as a process of community building and cultural identification born from instances  
of acute social and political crisis Taking into account various moments of political upheaval during the 19th century  
including the French Russian and 1848 revolutions it explores the ways in which political actors attempted to construct new  
definitions of sovereignty and social unity in a period characterized by vast social economic and governmental change In a  
wide ranging text that covers Britain and much of continental Europe in detail as well as reaching out to the Americas and  
Atlantic and Mediterranean Worlds Gavin Murray Miller provides an authoritative transnational study of revolution in the  
19th century age of high nationalism     *Alienation and Emancipation in the Work of Karl Marx* George C.

Comninel,2018-08-18 This book considers Karl Marx s ideas in relation to the social and political context in which he lived  
and wrote It emphasizes both the continuity of his commitment to the cause of full human emancipation and the role of his  
critique of political economy in conceiving history to be the history of class struggles The book follows his developing ideas

from before he encountered political economy through the politics of 1848 and the Bonapartist farce the maturation of the critique of political economy in the Grundrisse and Capital and his engagement with the politics of the First International and the legacy of the Paris Commune Notwithstanding errors in historical judgment largely reflecting the influence of dominant liberal historiography Marx laid the foundations for a new social theory premised upon the historical consequences of alienation and the potential for human freedom

**Islam and the West** Michael Thompson, 2003 The essays in *Islam and the West* Critical Perspectives on Modernity approach the interactions of Islam the West and modernity through overlapping social historical economic cultural and philosophical layers Viewed through this complex prism of analysis the

full dimensions of the relationship become clear and the result is a deeper understanding of the nature of modernity and how other societies can relate to each other      How Leaders Mobilize Workers Konstantin Vössing, 2017-06-22 This book explains why leaders choose social democracy revolution or moderate syndicalism to mobilize workers and why it matters In some countries leaders have responded effectively to their political environment while others have made ill fitting choices Vössing explains not only why leaders make certain choices but also how their choices affect the success of interest mobilization and subsequent political development Using quantitative data and historical sources this book combines an analysis of the formation of class politics in all twenty industrialized countries between 1863 and 1919 with a general theory of political mobilization It integrates economic political and ideational factors into a comprehensive account that highlights the critical role of individual leaders
