The Structure of Interdisciplinary Science Rolf Hvidtfeldt, 2018-06-25 This book presents a novel approach to the analysis of interdisciplinary science based on the contemporary philosophical literature on scientific representation The basic motivation for developing this approach is that

epistemic issues are insufficiently dealt with in the existing literature on interdisciplinarity. This means that when interdisciplinary science is praised as it often is, it is far from clear to what extent this praise is merited, at least if one cares about various more or less standardised measures of scientific quality. To develop a more adequate way of capturing what is going on in interdisciplinary science, the author draws inspiration from the rich philosophical literature on modelling, idealisation, perspectivism, and scientific pluralism. The discussion hereof reveals a number of critical pitfalls related to transferring mathematical and conceptual tools between scientific contexts which should be relevant and interesting for anyone actively engaged in funding, evaluating, or carrying out interdisciplinary science.

The Social Sciences in a Global Age Dipankar Sinha, 2020-11-25. The book focuses on the status and role of the social sciences in the current millennium. Drawing inspiration from a range of theorists, it critically examines the key debates on the social science stream and focuses on its relevance in our times in the background of changing state-market dialectics. It specifically scrutinises knowledge politics of the global times to reveal how the neoliberal project aligns and fuses steep economic conditionalities with professional-cultural parameters of higher academia to constrain autonomy and weaken radical expressions in social science pedagogy and research. Asserting that the humanistic core of social sciences has the potential to resist acts of reducing knowledge to a monochromatic form, the book argues that the social science stream can challenge and resist such hegemonic ambitions. It also identifies and analyses the contradictions, dilemmas, predicaments, and false steps of social scientists and avoids a reductive approach based on the West versus non-West binary. The volume will be of interest to scholars and researchers of the social sciences in general and of sociology, politics of knowledge, political theory, political sociology, and education in particular.
