struggles on markets are manifold The clothing market has been a privileged site for such contention with global clothing brands and retailers being targets of consumer mobilization for the past 20 years Labels and product lines now attest for the ethical quality of clothes which has in turn given rise to ethical fashion The Fight for Ethical Fashion unveils the actors and processes that have driven this market transformation through a detailed study of the Europe wide coordinated campaign on workers rights in the global textile industry the Clean Clothes Campaign Drawing on insights from qualitative fieldwork using a wide range of empirical sources Philip Balsiger traces the emergence of this campaign back to the rise of consumer campaigns and shows how tactics were adapted to market contexts in order to have retailers adopt and monitor codes of conduct By comparing the interactions between campaigners and their corporate targets in Switzerland and France two countries with a very different history of consumer mobilization for political issues this ground breaking book also reveals how one campaign can provoke contrasting reactions and forms of market change *Cross-Border Solidarities in Twenty-First Century Contexts* Janet M. Conway,Pascale Dufour,Dominique Masson,2024-04-08 Conditions for global solidarities and social movements have changed radically since their high point in the 1990s United Nations conferences This collection considers how political solidarities are being understood and constructed in a variety of cross border struggles and for what ends under twenty first century conditions In studies grounded in different world regions at a variety of scales authors address how the Cold War divide and its aftermath have structured contemporary asymmetries in European LGBT movements and in global feminisms how colonial difference in Latin America confronts feminist and social justice movements with problems of translation across worlds how travelling concepts essential to constructing solidarities across distance and difference traverse linguistic divides and attendant power imbalances in world cities and transnational networks how rurality as a form of colonial difference challenges established categories of intersectional feminism Feminist politics of power and difference and attention to gendered agency are at the centre of this inquiry into the possibility of twenty first century solidarities across borders **Empathy Beyond US Borders** Gary Adler,2019-05-02 Why do colleges and churches travel to help distant others and what does transnational civic engagement actually accomplish The Third World in the Global 1960s Samantha Christiansen,Zachary A. Scarlett,2013 Decades after the massive student protest movements that consumed much of the world the 1960s remain a significant subject of scholarly inquiry While important work has been done regarding radical activism in the United States and Western Europe events in what is today known as the Global South Asia Africa and Latin America have yet to receive the attention they deserve This volume inserts the Third World into the study of the 1960s by examining the local and international articulations of youth protest in various geographical social and cultural arenas Rejecting the notion that the Third World existed on the periphery it situates the events of the 1960s in a more inclusive context building a richer more nuanced understanding of the era that better reflects the dynamism of the period *Groups, representation and democracy* Darren Halpin,2013-07-19 Whether called pressure groups NGOs social movement

organisations or organised civil society the value of groups to the policy process to economic growth to governance to political representation and to democracy has always been contested However there seems to be a contemporary resurgence in this debate largely centred on their democratising potential can groups effectively link citizens to political institutions and policy processes Are groups an antidote to emerging democratic deficits Or do groups themselves face challenges in demonstrating their legitimacy and representativeness This book debates the democratic potential and practice of groups focussing on the vibrancy of internal democracies and modes of accountability with those who join such groups and to the constituencies they advocate for It draws on literatures covering national European and global levels and presents new empirical material from the UK and Australia

attracted masses of Jews in Britain and the USA and developed into broad social movements The tradition of popular movements for the defense of Jews worldwide continued during the rise of Nazism in Germany in the 1930s and during the campaign for the rights of Jews in the USSR in the 1970s

Petitioning and Power Relations in Pre-Modern Eurasia David Zaret, 2025-08-05 Petitioning was the main route by which the agency of subjects engaged the authority of rulers Most studies explore it as a practice for sending requests to central and local representatives of state power in empires kingdoms and city states Yet the practice occurs in other fields of power for example in medieval papal governance seigneurial regimes and other types of lordship e g queenship Petition and response was the inverse twin to command and obey and just as inherent and indispensable for managing pre modern power relations Requests by petitioners were endlessly diverse Petitions were the universal request form for subjects who sought assistance with every conceivable problem or opportunity In addition to

resolving conflicts with other subjects or officials there were requests for appointments promotions to higher positions or social ranks exemptions pardons privileges pensions salary increases charitable relief and more Some petitioners were docile and ingenuous others were ingenious even predatory petitioners whose initiatives reveal high levels of agency This is the first truly comparative analysis of pre modern petitioning across Eurasia Across a wide range of historical case studies and cutting against the grain of the dominant one dimensional social science perspective on pre modern power relations David Zaret shows petitioning in pre modern Eurasia to have been a dynamic tool of state and not as is often assumed merely an instrument of protest or imitation of religious prayer Comparative study shows the practice to have been remarkably uniform and one whose ubiquity and prominence are astounding for its diverse socio cultural contexts there are Sumerian Akkadian and Aramaic petitions in ancient Mesopotamia demotic petitions in Egypt when Pharaohs ruled then Greek ones after imposition of Ptolemaic rule Other contexts for the practice include Zoroastrian Persia Hellenic and Roman cultures of benefaction Christianity Islam Daoism Confucianism and the syncretic mix of Shinto and Buddhism in Japan In so doing Zaret bridges literatures of two fields and makes important contributions to both historical research on petitioning which is often confined to case studies and theories of power relations arguably the most heavily plowed field in social theory to offer revisionist perspectives on the fluid nature of power and politics in the pre modern world *European Solidarities* Lars Magnusson,2007 This volume discusses tensions between a market Europe and a social Europe between politics of serial dumping and politics of social protectionism and between Europe as a possibility and as a threat **Methods of Social Movement Research** Bert Klandermans,Suzanne Staggenborg,2002 Citing the critical importance of empirical work to social movement research the editors of this volume have put together the first systematic overview of the major methods used by social movement theorists Original chapters cover the range of techniques surveys formal models discourse analysis in depth interviews participant observation case studies network analysis historical methods protest event analysis macro organizational analysis and comparative politics Each chapter includes a methodological discussion examples of studies employing the method an examination of its strengths and weaknesses and practical guidelines for its application
