The Politics of the Black Nation Georgia A. Persons, 2017-07-12 This volume of the National Political Science Review the official publication of the National Political Science Association is anchored by a major symposium on The Politics of the Black Nation the book authored by Matthew Holden in 1973 which is now considered one of the most influential books in the field of black politics Twenty five years provide a sufficient timespan on which to base a retrospective of the book and simultaneously to reflect upon the evolution of the black liberation struggle more formally called African American politics In

the present age there is not much talk about a black nation certainly not as was heard during the 1960s and mid 1970s Yet there is a persistent sense of separateness in that there is constant thought and talk of Black America as a significantly separate communal entity Black Americans are seen as a racially and culturally distinct community holding to social political economic interests which have special significance and poignancy for them Holden s perception of the nature of the times in the early seventies stands in sharp contrast to how contemporary analysts of African American politics tend to perceive the nature of African Americans role in political life and their position in American society in the present age In this retrospective readers have the opportunity to get a sense of what Holden argued of the seven essays that make up his seminal volume and to consider how well Holden s observations have stood the tests of time In addition to the essays presented at the symposium which pointedly discuss Holden s work there are essays dealing with African American Politics in Constancy and Change by contributors including Charles Henry David Covin Robert C Smith Clyde Lusane Cheryl Miller D Linell Finley and Sekou Franklin among others Other features are a highly informative discussion of the Literary Digest magazine s Straw Vote Presidential Polls 1916 1936 and a Introduction to Political Psychology Prof. Dr. Bilal Semih Bozdemir, Schemas cognitive structures that organize knowledge and guide information processing are fundamental in shaping political judgments They consist of preconceived notions about political entities including parties ideologies and individuals that affect how information is perceived and interpreted For instance an individual with a schema that associates an opposing political party with corruption may filter new information through this lens leading to an automatic dismissal or reinterpretation of positive news about that party The influence of schemas is further compounded by the social context in which individuals operate Group norms and values often dictate what is deemed acceptable within a political discourse This social interdependence affects not only personal judgments but also broader political ideologies that dominate public discussions
