Political Change And The Crisis Of Legitimacy In Hong Kong:

Political Change and the Crisis of Legitimacy in Hong Kong Ian Scott, 1989 *Hong Kong SAR* Beatrice Leung, 1997

There are already many books on the challenges facing the Hong Kong Special Administrative Region SAR but this volume has a distinct contribution to make by offering an analysis of the evolving political order in Hong Kong and its international role. The team of authors comes from tertiary institutions within and outside Hong Kong and they all have been studying the territory for many years. The authors focus on the plans of the Chinese authorities and the expectations of Hong Kong people. The gap between the two and the associated difficulties are then analysed. The authors also examine the possibilities of crises emerging as well as the contingency plans formulated to deal with them. East Asian Perspectives on Political Legitimacy Joseph Chan, Doh Chull Shin, Melissa S. Williams, 2016-11-17. What makes a government legitimate? Why do people voluntarily comply with laws even when no one is watching? The idea of political legitimacy captures the fact that people obey when they think governments' actions accord with valid principles. For some, what matters most is the government's performance on security and the economy. For others, only a government that follows democratic principles can be legitimate. Political legitimacy is therefore a two-sided reality that scholars studying the acceptance of governments need to take into account. The diversity and backgrounds of East Asian nations provides a particular challenge when trying to determine the level of political legitimacy of individual governments. This book brings together both political philosophers and political scientists to examine the distinctive forms of political legitimacy that exist in contemporary East Asia. It is essential reading for all academic researchers of East Asian government politics and comparative politics. Political Order and Power Transition in Hong Kong Pang-kwong Li, 1997. Leading scholars of Hong Kong studies have contributed their expertise and analyses to this volume in order to better understand the dynamics of change and related issues during this historic period of Hong Kong history. This book highlights some of the key issues that have emerged in the process of transition: British policy towards Hong Kong political reforms and democratization; relations between the administration and the legislature; the transformation of senior civil service; development of political party, civil society, fiscal policy and land use etc. **The Politics of Democratization in Hong Kong** Lo Shiu-hing, 2016-07-27. An analysis of the politics of transition in Hong Kong focusing on the tug of war between China and Britain on democratization and on the interactions between the increasingly politically active people of Hong Kong and the democratizing colonial regime. The successes and failures of British policy since 1984 and the missed opportunities to democratize faster prior to Governor Patten's appointment in 1992 are examined. *Chinese Communists and Hong Kong Capitalists: 1937-1997* C. Chu, 2010-10-25. This book examines Chinese Communist activities in Hong Kong from the outbreak of the Sino-Japanese War in 1937 to the handover in 1997. It reveals a peculiar part of Chinese Communist history and traces six decades of astounding united front between the Chinese Communists and the Hong Kong tycoons and upper class business elite. **Hong Kong's Governance Under Chinese Sovereignty** Brian C. H.

Fong,2014-09-04 As a hybrid regime Hong Kong has been governed by a state business alliance since the colonial era. However since the handover in 1997 the transformation of Hong Kong's political and socio-economic environment has eroded the conditions that supported a viable state business alliance. This state business alliance which was once a solution for Hong Kong's governance has now become a political burden rather than a political asset to the post-colonial Hong Kong state. This book presents a critical re-examination of the post 1997 governance crisis in Hong Kong under the Tung Chee-hwa and Donald Tsang administrations. It shows that the state business alliance has failed to function as an organizational machinery for supporting the post-colonial state and has also served to generate new governance problems. Drawing upon contemporary theories on hybrid regimes and state capacity this book looks beyond the existing opposition centered explanations of Hong Kong's governance crisis. By establishing the causal relationship between the failure of the state business alliance and the governance crisis facing the post-colonial state Brian C H Fong broadens our understanding of the governance problems and political confrontations in post-colonial Hong Kong. In turn he posits that although the state business alliance worked effectively for the colonial state in the past it is now a major problem for the post-colonial state and suggests that Hong Kong needs a realignment of a new governing coalition. Hong Kong's Governance under Chinese Sovereignty will enrich and broaden the existing literature on Hong Kong's public governance whilst casting new light on the territory's political developments. As such it will be welcomed by students and scholars interested in Chinese politics, Hong Kong politics and governance.

Hong Kong in Focus S. G. Rioni,2002 Hong Kong in Focus Political Economic Issues

Doing Comparative Education Research Keith Watson,2001-01-01 In the newly emerging global economic order governments and policy makers are keen to seek ideas from other countries and recognise the importance of looking comparatively. This expansion of interest in comparative education brings new challenges for the discipline. Research may be undertaken by non-specialists by consultants and politicians or educationists from quite different backgrounds. The short lifespan of democratically elected governments may lend attraction to quick fix solutions. Statistics and data may be decontextualised. Added to these challenges there is the worldwide proliferation of education providers outside state control and the transformation of teaching and learning brought about by the new information technology. This book rethinks the role of comparative education in the light of these changing circumstances and looks at the new opportunities they bring.

The Dynamics of Beijing-Hong Kong Relations Sonny Shiu-hing Lo,2008-04-01 This book critically assesses the implementation of the one country two systems in the Hong Kong Special Administrative Region (HKSAR) from the political, judicial, legal, economic and societal dimensions. The author contends that there has been a gradual process of

mainlandization of the HKSAR meaning that Hong Kong is increasingly economically dependent on the People's Republic of China PRC politically deferent to the central government on the scope and pace of democratic reforms socially more patriotic toward the motherland and more prone to media self censorship and judicially more vulnerable to the interpretation of the Basic Law by the National People's Congress This book aims to achieve a breakthrough in relating the development of Hong Kong politics to the future of mainland China and Taiwan By broadening the focus of the one country two systems from governance to the process of Sino British negotiations and their thrust building efforts this book argues that the diplomats from mainland China and Taiwan can learn from the ways in which Hong Kong's political future was settled in 1982 1984

This is a book for students researchers scholars diplomats and lay people **Television, Regulation and Civil Society in Asia** Philip Kitley, 2003-08-29 Kitley critically compares Western principles of broadcasting civil society and cultural regulation with alternative Asian practices of regulation and organization **The East Asian Welfare Model** Roger Goodman, Huck-Ju Kwon, Gordon White, 2006-12-05

For many politicians and observers in the West East Asia has provided a broad range of positive images of the state's intervention in society Neoliberals grew excited by popular welfare systems that cost little in expenditure and bureaucracy Social democrats thought they had found a model for social cohesion and equality In fact the reality in East Asia is rather different from these stereotypes In this book six specialists of six different societies in East Asia Japan South Korea Taiwan China Singapore and Hong Kong examine the role of the state in their welfare systems There are detailed case studies on pensions health insurance housing and personal social services They provide an up to date detailed account of how these systems have developed as well as an examination of the question of whether these welfare regimes are the natural outgrowth of cultural traditions or the result of economic and political conditions This broad ranging and detailed study will be welcomed by both students and policy makers as the first proper academic study in English to have such a wide coverage of this topic Its clarity and authority should come as a welcome alternative to the more common misconceptions about Asian society *Critical Issues in Contemporary China* Czeslaw Tubilewicz, 2016-12-12

Critical Issues in Contemporary China Unity Stability and Development comprehensively examines key problems crucial to understanding modern day China Organized around three interrelated themes of unity stability and development each chapter explores distinct issues and debate their significance for China domestically and for Beijing's engagement with the wider world While presenting contending explanatory approaches contributors advance arguments to further critical discussion on selected topics Main issues analysed include political change military transformation legal reforms economic development energy security environmental degradation food security and safety demographic trends migration and urbanization labour unrest health and education social inequalities ethnic conflicts Hong Kong's integration cross Strait relations Given its thorough and up to date assessment of major political social and economic challenges facing China this fully revised and substantially expanded new edition is an essential read for any student of Chinese Studies *The Economic Roots of the Umbrella*

Movement in Hong Kong Louis Augustin-Jean, Anthea Cheung, 2018-02-15 In the autumn of 2014 thousands of people young and educated in their majority occupied the chief business district and seat of the government in Hong Kong The protest known as the Umbrella Movement called for genuine democracy as well as a fairer social and economic system The book aims to provide a dynamic framework to explain why socioeconomic forces converged to produce such a situation Examining increasing inequality rising prices and stagnating incomes it stresses the role of economic and social factors as opposed to the domestic political and constitutional issues often assumed to be the root cause behind the protests It first argues that globalization and the increasing influence of China's economy in Hong Kong has weighted on salaries Second it shows that the oligopolistic nature of the local economy has generated rents which have reinforced inequality The book demonstrates that the younger generation which is still finding its place in society has been particularly affected by these phenomena especially with social mobility at a low point Offering a new approach to studying the Umbrella Movement this book will appeal to students and scholars interested in Hong Kong's political landscape as well Chinese politics more broadly

Ethics in Business and Society Gerhold K. Becker, 2012-12-06 faces the urgent problem of determining what political and social conditions must be preserved in order to ensure a continuing thriving economy 2 And the ethicist we may add can draw on all of those problems and quite a few more characteristic of situations when traditional communities struggle with the impact of sudden and unprecedented wealth as well as with a technological transformation of their society of singular proportions Hong Kong is truly a society in transition a society whose time is running short and which therefore cannot afford to wait long before it has to make decisive choices choices also in ethics The time factor which is so infamous in various ethical dilemmas applies here to the society as a whole it may also account for some of its not just morally significant shortcomings II Ethics in a Cross cultural Perspective The authors of this volume are scholars and researchers based in Hong Kong who have been living and working in the territory for many years They are not only representative of the increased research interest in ethical issues across the academic spectrum of Hong Kong universities but also of the interdisciplinary approach which has become the hallmark of work in applied ethics As is well documented ethics research at long last has left behind its disciplinary confines and even more so the philosophical ivory tower and begun to permeate the full scope of the academic and scientific agenda

Policing in Hong Kong Kam C. Wong, 2015-03-06 The HKP Hong Kong Police Asia's Finest is a battle tested professional organization with strong leadership competent staff and deep culture It is also a continuously learning and reforming agency in pursuit of organisational excellence Policing in Hong Kong History and Reform is the first and only book on the development of the Hong Kong **Hong Kong's New Constitutional Order** Yash Ghai, 1997-05-01 This is the first systematic analysis of the constitutional legal economic social and political systems of Hong Kong as a special administrative region of China It examines the Basic Law against its historical and socioeconomic contexts including its international and domestic foundations and the loss and the resumption of sovereignty by China The author

offers a conceptualization of the Basic Law and locates it within China's constitutional political and legal systems. The book explores the balance as well as the tensions between the autonomy of Hong Kong and the sovereignty of China which are aggravated by the necessity to accommodate contrasting economic and political systems. It also identifies key legal and political problems that are likely to arise in implementing the Basic Law and suggests an approach to its interpretation. The Basic Law provides a fascinating example of the interaction of widely different traditions of law, politics and economy and a novel system of autonomy. Its study is therefore of great interest to scholars of comparative law and politics. This new edition covers significant political, constitutional and legal developments since the transfer of sovereignty in July 1997.

Comparative Governance Reform in Asia Clay Wescott, Bidhya Bowornwathana, 2008-08-04. Features chapters that analyze and compare the experiences of Asian countries in carrying out governance reforms. This book tackles such questions as how common reform packages designed for developed countries are implemented in developing countries. What happens in the reform diffusion process? And what are the obstacles to reform success?

Formations of Colonial Modernity in East Asia Tani E. Barlow, 1997. The essays in *Formations of Colonial Modernity in East Asia* challenge the idea that notions of modernity and colonialism are mere imports from the West and show how colonial modernity has evolved from and into unique forms throughout Asia. Although the modernity of non-European colonies is as indisputable as the colonial core of European modernity until recently, East Asian scholarship has tried to view Asian colonialism through the paradigm of colonial India, for instance, failing to recognize anti-imperialist nationalist impulses within differing Asian countries and regions. Demonstrating an impatience with social science models of knowledge, the contributors show that binary categories focused on during the Cold War are no longer central to the project of history writing. By bringing together articles previously published in the journal *positions*, east asia cultures critique editor Tani Barlow has demonstrated how scholars construct identity and history, providing cultural critics with new ways to think about these concepts in the context of Asia and beyond. Chapters address topics such as the making of imperial subjects in Okinawa, politics and the body social in colonial Hong Kong and the discourse of decolonization and popular memory in South Korea. This is an invaluable collection for students and scholars of Asian studies, postcolonial studies and anthropology.
