Migrants and Political Change in Latin America Luis F. Transforming Latin America Craig Arceneaux, David Pion-Berlin, 2005-07-14 This ambitious book offers a clear and unified framework for understanding political change across Latin America The impact of U S hegemony and the global economic system on the region is widely known and scholars and advocates alike point to Latin America's vulnerability in the face of external forces In spite of such foreign pressure however individual countries continue to chart their own courses displaying considerable variation in political and economic life Looking broadly across the Western Hemisphere with examples from Brazil the Southern Cone the Andes and Central America Arceneaux and Pion Berlin identify general rules that explain how international and domestic politics interact in specific contexts The detailed accessible case studies cast new light on such central problems as neoliberal economic reform democratization human rights regional security environmental degradation drug trafficking and immigration And they

consider not only what actors institutions and ideas matter in particular political contexts but when where and how they matter By dividing issues into the domains of high and low politics and differentiating between short term problems and more permanent concerns they create an innovative typology for analyzing a wide variety of political events and trends

competitive democracies in Latin America To explain this transformation Daniel H Levine analyzes the development of modern mass based political parties with pervasive organizations and commanding strong loyalties the changing structure and content of social and political conflict and the gradual emergence of common norms governing political behavior This book does not pretend to be a general survey of Venezuelan politics Rather it is an attempt to understand for both theoretical and practical purposes the development of shared rules of the game for political action in a heterogeneous society Once these norms are accepted by key elites and then imposed on recalcitrant oppositions they provide a means of controlling and managing political conflict without eliminating it Mr Levine s conclusions are based primarily on case studies of specific political conflicts His study of conflicts over educational reform uncovers the conditions in which a traditional sector of society Catholic groups and institutions moved from violent total opposition to the political system to a position of accommodation In the second case study he examines the role of students in politics with special reference to the integration of students in national patterns of conflict and opposition Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
