People's ideas and assumptions about world politics shape and construct the theories that help explain world conflicts and events. These assumptions can be classified into various known theoretical perspectives; the most dominant is political realism. Political realism is the most common theoretical approach when it is in means of foreign policy and international issues. It is known as "realpolitik" and emphasis that the most important actor in global politics is the state, which pursues self-interests, security, and growing power (Ray and Kaarbo 3). Political Conflict Essays In Political S:

The Politics of Objectivity Peter J. Steinberger, 2015-08-10 Modern political conflict characteristically reflects and represents deep seated but also unacknowledged and unanalyzed disagreements about what it means to be objective In defending this proposition Peter J Steinberger seeks to reaffirm the idea of rationalism in politics by examining important problems of public life explicitly in the light of established philosophical doctrine The Politics of Objectivity invokes thereby an age old though now widely ignored tradition of western thought according to which all political thinking is inevitably embedded in and underwritten by larger structures of metaphysical inquiry Building on earlier studies of the idea of the state and focusing on highly contested practices of objectivity in judgement this book suggests that political conflict is an essentially discursive enterprise deeply implicated in the rational pursuit of theories about how things in the world really are
