Political Economy Of International Labour Migration:

The Political Economy of International Labour Migration Hassan Nawaz Gardezi, 1995 Taking a wide ranging view of international labour migration Gardezi gives us deeper insight into the transfers of labour by analyzing the political economy of the countries where labour groups originate He focuses on the conditions under which labour power is reproduced and used The case study further reveals that the myth of migrants returning home with savings knowledge and a longing for material success is more wishful thinking While former studies on labour migration concentrate on its effect on GNP and foreign exchange earnings Gardezi refocusses attention on the migrant workers themselves their hopes and aspirations community life and the working conditions both at home and abroad

other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development

Australia the USA Germany Italy and Sweden At the same time it charts an emerging common regime of exploitation which threatens the depiction of some countries as more inclusionary than others The politicisation of immigration has intensified the challenge for policy makers who today must respond to populist calls for restrictive immigration policy whilst simultaneously heeding business groups calls for cheap labour and respecting legal obligations that require more liberal and welcoming policy regimes The resultant policy regimes often have counterproductive effects in many cases marginalising immigrant communities and contributing to the growth of underground and criminal economies Finally developments on the horizon driven by technological progress threaten to intensify distributional challenges While these will make the politics around immigration even more fraught in coming decades the real issue is not immigration but the loss of good jobs which will have serious implications across all Western countries This book will appeal to scholars and students of criminology social policy political economy political sociology the sociology of immigration and race and migration studies
