early 1950s the decline of ideology hypothesis has commanded a great deal of attention in the intellectual community at large. The controversy has taken both empirical and polemical turns. This book concentrates on the empirical literature offering both original contributions and previously published papers of outstanding importance. Selections were made to give full play to freshness of view and diversity of sources. The book presents the hypothesis of ideological decline as set forth by two of its major spokesmen, brings together essays that subject this hypothesis to empirical tests in both Western and non-Western contexts and then presents both positive and negative evaluations of the hypothesis. Avoiding an ex cathedra definition of ideology, the editor and contributors scrutinize the nature of ideology and its workings and suggest approaches to the comparative treatment of ideologies. This book offers the first clear and wide-ranging overview of the putative decline of ideology, a concept burdened by a history of emotional argumentation. Changes in the function of ideology in the Soviet Union, the United States, Western Europe, and Japan are examined, and the ideological dimension of student movements of the 1960s is taken into account. *Ideology: Comparative and Cultural Status* is an expertly edited presentation of contrasting views of a vital topic. It is ideally suited for use in a variety of courses in the area of political thought and political sociology. Une Et Divisible? Barbara Lebrun, Association for the Study of Modern and Contemporary France (Great Britain). Conference, 2010. This book offers a selection of the papers presented at the thirtieth annual conference of the Association for the Study of Modern and Contemporary France (ASMCF) held at the University of Manchester on 5 and 6 September 2008. *Introduction: The Ideology of Political Reactionaries* Richard Shorten, 2021-12-30. *The Ideology of Political Reactionaries* offers a new perspective on the beliefs reactionaries share, presenting a theory of reactionary ideology in the process. Rather than taking self-contradictions in the reactionary imagination as a reason for diminishment, complexity is taken as a challenge. The book argues that the features that unite reactionaries lie in rhetoric. Reactionaries make three persuasive appeals: to decadence, conspiracy, and indignation. They also display some recurrent styles. The book's rhetorical approach entails a critique of the alternative approaches to reactionary politics, dubbed as dispositional, sociological, and conceptual. At the heart of the book is the textual analysis of the writings of a range of figures who are chosen in deliberate diversity and who have interacted with political audiences in different eras and settings: Edmund Burke, Joseph de Maistre, Sarah Palin, Donald Trump, Adolf Hitler, Ric Zemmour, Joe McCarthy, Anders Breivik, and Nigel Farage. Analysis of their writings helps the book to reckon with some particular puzzles of ideologies and rhetoric. These puzzles include the proximity of reactionaries to conservatism, the ambiguity of their nostalgia, the myth of their essential charisma, and the apparent fetishisation of facts. *The Ideology of Political Reactionaries* ought to interest anyone concerned about current ideological trends and, in particular, students and scholars of politics and history. **Defence and Dissent in Contemporary France** Jolyon Howorth, Patricia Chilton, 2021-09-05. This book, first published in 1984, examines France's independent nuclear weapons programme of the 1980s alongside the French peace movement, which was almost totally absent in contrast to the peace protests of the US and

the rest of Europe This book analyses this unusual pattern of defence and dissent and assesses its likely development It looks at the evolution of French post war defence policy and discusses the French peace movement attempting to explain why it was so weak *Gender, Ethnicity and Political Ideologies* Nickie Charles, Helen Hintjens, 2002-11 First Published in 2004

*Political Theory*, 2008-07-31 Political theorists are too often silent on questions of method and approach David Leopold and Marc Stears have assembled a distinguished group of contributors to break that silence and to explain and defend the research methods they utilise in their own work The result is a rich and varied collection which does not suggest that there is only one right way to conduct political theory but rather introduces readers to many of the often unelaborated methods and approaches that currently inform the work of leading scholars in the field Amongst the topics covered are the complex and contested connections between political theory and a range of adjacent disciplines including moral philosophy the empirical social sciences the history of political thought the world of real politics critical social theory and ideology Both individually and as a collection these essays will promote understanding and provoke further debate amongst students and established scholars alike They will be encouraged to reflect on their own methodological assumptions to re examine the practical tools of analysis they employ and to re evaluate why the research they do matters
