Political Machines Governing A Technological Society:

Political Machines Andrew Barry, 2001-07-23 Technology assumes a remarkable importance in contemporary political life Today politicians and intellectuals extol the virtues of networking interactivity and feedback and stress the importance of new media and biotechnologies for economic development and political innovation Measures of intellectual productivity and property play an increasingly critical part in assessments of the competitiveness of firms universities and nation states At the same time contemporary radical politics has come to raise questions about the political preoccupation with technical progress while also developing a certain degree of technical sophistication itself In a series of in depth analyses of topics ranging from environmental protest to intellectual property law and from interactive science centres to the European Union this book interrogates the politics of the technological society Critical of the form and intensity of the contemporary preoccupation with new technology *Political Machines* opens up a space for thinking the relation between technical innovation and political inventiveness

The Political Machine Adam T. Smith, 2020-08-04 *The Political Machine* investigates the essential role that material culture plays in the practices and maintenance of political sovereignty Through an archaeological exploration of the Bronze Age Caucasus Adam Smith demonstrates that beyond assemblies of people polities are just as importantly assemblages of things from ballots and bullets to crowns regalia and licenses Smith looks at the ways that these assemblages help to forge cohesive publics separate sovereigns from a wider social mass and formalize governance and he considers how these developments continue to shape politics today Smith shows that the formation of polities is as much about the process of manufacturing assemblages as it is about disciplining subjects and that these material objects or machines sustain communities orders and institutions The sensibilities senses and sentiments connecting people to things enabled political authority during the Bronze Age and fortify political power even in the contemporary world Smith provides a detailed account of the transformation of communities in the Caucasus from small scale early Bronze Age villages committed to egalitarianism to Late Bronze Age polities predicated on radical inequality organized violence and a centralized apparatus of rule From Bronze Age traditions of mortuary ritual and divination to current controversies over flag pins and Predator drones *The Political Machine* sheds new light on how material goods authorize and defend political order

Redeploying Urban Infrastructure Jonathan Rutherford, 2019-07-31 This book explores urban futures in the making as seen through the lens of urban infrastructure The book describes how socio technical arrangements of energy and water provision are being recast in continuing efforts towards realising sustainable transformation of cities It critically investigates how infrastructure comes to matter by analyzing the shifting capacities and entanglements of diverse actors with these systems the various means they use to envision enact and contest changes and the wide ranging social and political implications of emerging infrastructure transitions Drawing on original research into urban infrastructure debates and projects in Stockholm and Paris the author develops a novel conceptual framework for studying and acknowledging the

active vital role of infrastructure in constituting a material politics of urban transformation Straddling the latest theoretical insights and empirical investigation of urban planning practice and socio technical engineering of systems and flows Redeploying Urban Infrastructure forges new timely reflections and perspectives which will be of interest to the growing multidisciplinary community of scholars investigating infrastructure and to academics and practitioners with a concern for understanding the wider politics of urban futures

Computing the News Sylvain Parasie, 2022-10-11 Faced with a full blown crisis a growing number of journalists are engaging in seemingly unjournalistic practices such as creating and maintaining databases handling algorithms or designing online applications Data journalists claim that these approaches help the profession demonstrate greater objectivity and fulfill its democratic mission In their view computational methods enable journalists to better inform their readers more closely monitor those in power and offer deeper analysis In *Computing the News* Sylvain Parasie examines how data journalists and news organizations have navigated the tensions between traditional journalistic values and new technologies He traces the history of journalistic hopes for computing technology and contextualizes the surge of data journalism in the twenty first century By importing computational techniques and ways of knowing new to journalism news organizations have come to depend on a broader array of human and nonhuman actors Parasie draws on extensive fieldwork in the United States and France including interviews with journalists and data scientists as well as a behind the scenes look at several acclaimed projects in both countries Ultimately he argues fulfilling the promise of data journalism requires the renewal of journalistic standards and ethics Offering an in depth analysis of how computing has become part of the daily practices of journalists this book proposes ways for journalism to evolve in order to serve democratic societies

Regulating Next Generation Agri-Food Biotechnologies Michael Howlett, David Laycock, 2013-05-07 Agri food bio technology policy and regulation is transitioning from an early period focused on genetic engineering technologies to next generation rules and regulatory processes linked to challenges originating in a wide variety of new technological processes and applications Can lessons learned from past and current regulatory oversights of agricultural biotechnology and other high technology sectors help us address new and emerging regulatory challenges in the agri food genetics sector The expert contributors in this volume discuss the experiences of a wide range of North American European and Asian countries with high technology regulation to address four key questions related to the past and future development of agri food genomics regulation across the globe how unique is agri food biotechnology regulation and how can it be evaluated using the existing tools of regulatory analysis developed in examinations of other sectors is a government to governance model of regulatory regime development found in many other sectors relevant in this rapidly evolving sphere of activity is a stages model of regulatory regime development accurate And if so at which stage are we currently positioned in the regulation of agri food genomics products and technologies what drives movement between stages in different countries and sectors In assessing such drivers what are the key links between sectoral meso developments and more general macro

and micro developments such as international relations and administrative behaviour By updating extending and challenging earlier empirical and theoretical social science perspectives on agricultural bio technological regulation this volume helps to inform future policy formulation It will be of interest to practitioners and students of biotechnology agriculture and science and technology policy and regulatory processes more generally

Audible Infrastructures Kyle Devine, Alexandrine Boudreault-Fournier, 2021-01-11 Our day to day musical enjoyment seems so simple so easy so automatic Songs instantly emanate from our computers and phones at any time of day The tools for playing and making music such as records and guitars wait for us in stores ready for purchase and use And when we no longer need them we can leave them at the curb where they disappear effortlessly and without a trace These casual engagements often conceal the complex infrastructures that make our musical cultures possible Audible Infrastructures takes readers to the sawmills mineshafts power grids telecoms networks transport systems and junk piles that seem peripheral to musical culture and shows that they are actually

pivotal to what music is how it works and why it matters Organized into three parts dedicated to the main phases in the social life and death of musical commodities resources and production circulation and transmission failure and waste this book provides a concerted archaeology of music's media infrastructures As contributors reveal the material environmental realities and political economic conditions of music and listening they open our eyes to the hidden dimensions of how music is made delivered and disposed of In rethinking our responsibilities as musicians and listeners this book calls for nothing less than a reconsideration of how music comes to sound

The Will to Predict Eglė Rindzevičiūtė, 2023-05-15 In *The Will to Predict* Eglė Rindzevičiūtė demonstrates how the logic of scientific expertise cannot be properly understood without knowing the conceptual and institutional history of scientific prediction She notes that predictions of future population economic growth environmental change and scientific and technological innovation have shaped much of twentieth and twenty first century politics and social life as well as government policies Today such predictions are more necessary than ever as the world undergoes dramatic environmental political and technological change But she asks what does it mean to predict scientifically What are the limits of scientific prediction and what are its effects on governance institutions and society Her intellectual and political history of scientific prediction takes as its example twentieth century USSR By outlining the role of prediction in a range of governmental contexts from economic and social planning to military strategy she shows that the history of scientific prediction is a transnational one part of the history of modern science and technology as well as governance Going beyond the Soviet case Rindzevičiūtė argues that scientific predictions are central for organizing uncertainty through the orchestration of knowledge and action Bridging the fields of political sociology organization studies and history *The Will to Predict* considers what makes knowledge scientific and how such knowledge has impacted late modern governance
