Population Health And Aging

Jacqueline L. Angel, Keith E. Whitfield

Population Health And Aging:

Population Health and Aging Albert I. Hermalin, Professor of Health Systems Administration and Population Health Michael A Stoto, 2002-09-15 Population Health is an emerging field that draws heavily on two disciplines demography and epidemiology In recent years as demographers have become increasingly interested in health transitions and trajectories and as epidemiologists have become increasingly interested in population level disease dynamics the two fields have converged in many ways But their separate histories cultures languages organizations and missions have acted as impediments to dialogue among practitioners in the two fields This volume seeks to improve conversation across the disciplines It brings together reports on current research that provide examples of work that bridges or has the potential to bridge the two fields and helps identify organizational and institutional pathways that can encourage collaboration *Demography of Population Health, Aging and Health Expenditures* Christos H. Skiadas, Charilaos Skiadas, 2020-08-24 This book provides theoretical and applied material for estimating vital parts of demography and health issues including the healthy aging process along with calculating the healthy life years lost to disability It further includes the appropriate methodology for the optimum health expenditure allocation Through providing data analysis statistical and stochastic methodology probability approach and important applications the book explores topics such as aging and mortality birth death processes self perceived age life time and survival as well as pension and labor force By providing a methodological approach to health problems in demography and society including and quantifying important parameters this book is a valuable guide for researchers theoreticians and practitioners from various disciplines *The Aging Population in the Twenty-First Century* National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Statistics for an Aging Population, 1988-02-01 It is not news that each of us grows old What is relatively new however is that the average age of the American population is increasing More and better information is required to assess plan for and meet the needs of a graying population The Aging Population in the Twenty First Century examines social economic and demographic changes among the aged as well as many health related topics health promotion and disease prevention quality of life health care system financing and use and the quality of care especially long term care Recommendations for increasing and improving the data available as well as for ensuring timely access to them are also included *Public Health and Aging* Steven Mark Albert, Vicki A. Freedman, PhD, 2010 Print CourseSmart [Handbook of Research on Economic and Social Impacts of Population Aging](#) Bayar, Yilmaz, 2021-06-25 The increases in global wealth and the developments in the field of health have led to decreases in mortality rates increases in life expectancy and decreases in fertility rate leading to a population that is rapidly consisting more and more of older individuals The demographic changes affect nearly all parts of society including economics education health social security systems socio cultural activities and more Thus it is essential to study the impacts that an aging population will have on society The

Handbook of Research on Economic and Social Impacts of Population Aging analyzes the economic and social impacts of population aging from a multidisciplinary perspective Covering topics such as life expectancy social welfare health social security and more this book is essential for social scientists sociologists demographers economists medical professionals government officials policymakers professionals researchers managers students and academicians looking to understand the effects of an aging population on modern society **The Health of Aging Hispanics** Jacqueline L. Angel, Keith E.

Whitfield, 2007-08-06 The emergence of the Hispanic population in the United States and the increasing profile of Latin America on the North and South American continents have raised the profile of Latino issues in the American consciousness Much of this attention however has revolved around trends in culture art food and music or pathological concerns about poverty crime drugs and immigration At best the scholarly and policy assessments of the implications of the impact of Latinos in the United States revolve around Mexican Americans Puerto Ricans and Central Americans

as well as the children of an older Cuban population and their struggles to achieve a measure of education healthcare employment and civil rights What have not been adequately addressed are the demographic trends affecting Latinos in the United States Mexico and Latin America particularly the aging of the Hispanic population and its resultant health and long term care needs That Latinos are living longer and shifting from a youthful population to an increasingly older cohort is little known except among the small cadre of Hispanic gerontologists Ironically this invisibility of aging Hispanics is juxtaposed to the almost picked response of the U S media and public toward the aging of the general U S population and the social and political controversies over Social Security Medicare and health care costs The policy debates of an aging U S population as a whole arise from substantial research and policy analysis a level of attention not seen with regard to the aging of the Hispanic population **Aging, Health, and Longevity in the Mexican-Origin Population** Jacqueline L. Angel, Fernando

Torres-Gil, Kyriakos Markides, 2012-02-09 Aging Health and Longevity in the Mexican Origin Population creates a foundation for an interdisciplinary discussion of the trajectory of disability and long term care for older people of Mexican origin from a binational perspective Although the literature on Latino elders in the United States is growing few of these studies or publications offer the breadth and depth contained in this book *Social Determinants of Health for the Global Aging*

Population in Pandemic and Disaster Environments Lené Levy-Storms, Mary Beth Morrissey, Marcia G. Ory, Camille Castelyn, Soohyoung Rain Lee, 2025-02-18 From a biopsychosocial perspective physical and to a lesser extent mental health have been a priority for researchers policymakers and healthcare providers relative to social health The hegemony of physical health weakened during the COVID pandemic as mental and social health also emerged as equally important and at risk at the same time Not since the 1960s has society attended to the social vulnerabilities of older adults particularly in institutional settings For the first time the urgency of providing care for older adults has transcended physical settings as frontline workers in hospitals prisons schools and other community based settings as well as families in their own homes also

emerged as vulnerable The institutional care workforce faces an ongoing crisis at the same time some countries have restricted migration posing a threat to in home and community based long term care COVID has forced healthcare policymakers to prioritize both acute and long term health issues simultaneously as society tries to regain full functionality COVID and future natural and unnatural disasters associated with climate change threats to democracy discrimination against societal groups based on age gender race ethnicity religion and income status promise to challenge us all to acknowledge and act such that our well being is everybody s well being across the life course We are all aging and how different age groups fare affects how other age groups fare

Population Aging Daniel Cotlear,2010-12-13 Latin America and the Caribbean will soon face the challenges of an aging population This process which took over a century in the rich world will occur in two or three decades in the developing world seven of the 25 countries that will age more rapidly are in LAC Population aging will pose challenges and offer opportunities This book explores three sets of issues First is a group of issues related to the support of the aging and poverty in the life cycle This covers questions of work and retirement income and wealth and living arrangements and intergenerational transfers It also explores the relation between the life cycle and poverty Second is the question of the health transition How does the demographic transition impact the health status of the population and the demand for health care And how advanced is the health transition in LAC Third is an understanding of the fiscal pressures that are likely to accompany population aging and to disentangle the role of demography from the role of policy in that process This book provides an introduction to the concepts and techniques at the intersection of demography and economics It summarizes the policy debate about potential reforms needed to make population aging an opportunity for development

Aging, Place, and Health Satariano,Marlon Maus,2017-03-03 Aging Place and Health A Global Perspective examines the interplay of biological social and environmental factors affecting the health and well being of aging individuals their families and communities With a strong interdisciplinary focus this book provides a clear coherent structure to address the diversity of topics in this increasingly vital field The second edition maintains the ecological approach using the same framework as in the first edition The ecological model serves as a template for the organization of the book The new edition provides a more global focus and introduces new topics such as the impact of technology This edition also introduces a new co editor as well as specific chapters prepared by leading experts in the field
